Grasshopper a 500 room Mogollon pueblo located on what is today the Fort Apache Indian Reservation in Arizona probed the past taught scholars of international repute and generated controversy This book offers an extraordinary window into a changing American archaeology and three different research programs as they confronted the same pueblo ruin Like the enigmatic Mogollon culture it sought to explore and earlier University of Arizona field schools in the Forestdale Valley and at Point of Pines Grasshopper research engendered decades of controversy that still lingers in the pages of professional journals Jefferson Reid and Stephanie Whittlesey players in the controversy who are intimately familiar with the field school that ended in 1992 offer a historical account of this major archaeological project and the intellectual debates it fostered Thirty Years Into Yesterday charts the development of the Grasshopper program under three directors and through three periods dominated by distinct archaeological paradigms culture history processual archaeology and behavioral archaeology It examines the contributions made each season the concepts and methods each paradigm used and the successes and failures of each The book transcends interests of southwestern archaeologists in demonstrating how the three archaeological paradigms reinterpreted Grasshopper illustrating larger shifts in American archaeology as a whole Such an opportunity will not come again as funding constraints ethical concerns and other issues no doubt will preclude repeating the Grasshopper experience in our lifetimes Ultimately Thirty Years Into Yesterday continues the telling of the Grasshopper story that was begun in the authors previous books In telling the story of the archaeologists who recovered the material residue of past Mogollon lives and the place of the Western Apache people in their interpretations Thirty Years Into Yesterday brings the story full circle to a stunning conclusion

Social Violence in the Prehispanic American Southwest Deborah L. Nichols, Patricia L. Crown, 2022-08-23 Spontaneous acts of violence born of human emotions like anger or greed are probably universal but social violence violence resulting from social relationships

within and between groups of people is a much more complex issue with implications beyond archaeology. Recent research has generated multiple interpretations about the forms, intensity, and underlying causes of social violence in the ancient Southwest. Deborah L. Nichols and Patricia L. Crown have gathered nine contributions from a variety of disciplines to examine social violence in the prehispanic American Southwest. Not only offering specific case studies but also delving into theoretical aspects, this volume looks at archaeological interpretations, multidisciplinary approaches, and the implications of archaeological research for Native peoples and how they are impacted by what archaeologists say about their past. Specific chapters address the impacts of raiding and warfare, the possible origins of ritual violence, the evidence for social violence manifested in human skeletal remains, the implications of witchcraft persecution, and an examination of the reasons behind apparent anthropophagy. There is little question that social violence occurred in the American Southwest. These contributions support the need for further discussion and investigation into its causes and the broader implications for archaeology and anthropology.

Correlative Archaeology Fumi Arakawa, 2022-06-02

In *Correlative Archaeology*, Fumi Arakawa applies correlative thinking practices which are derived from an East Asian view of the world that stresses connectivity to archaeological interpretations. Arakawa, a Japanese scholar who was trained in Western archaeology, argues that a correlative paradigm can help archaeologists as well as scholars and researchers from other disciplines consider competing paradigms and integrate Native American voices and narratives into interpretations of prehistoric art and landscapes.

Hinterlands and Regional Dynamics in the Ancient Southwest Alan P. Sullivan, James Bayman, 2007-01-01

Hinterlands and Regional Dynamics in the Ancient Southwest is the first volume dedicated to understanding the nature of and changes in regional social autonomy, political hegemony, and organizational complexity across the entire prehistoric American Southwest. With geographic coverage extending from the Great Plains to the Colorado River and from Mesa Verde to the international border, the volume's ten case studies synthesize research that enhances our understanding of the ancient Southwest's highly variable demographic, land use, and economic histories. For this volume, hinterlands are those areas whose archaeological records do not disclose the ceramic, architectural, and network evidence that initially led to the establishment of the Hohokam, Chaco, and Casas Grandes regional systems. Employing a variety of

perspectives such as the cultural landscapes approach heterarchy and the common pool resource model as well as technical methods such as petrographic and stylistic attribute analyses the volume s contributors explore variation in hinterland identities subsistence ecology and sociopolitical organization as regional systems expanded and contracted between the 9th and 14th centuries AD The hinterlands of the prehistoric Southwest were home to a substantial number of people and were often used as resource catchments by the inhabitants of regional systems Importantly hinterlands also influenced developments of nearby regional systems under whose footprint they managed to retain considerable autonomy By considering the dynamics between hinterlands and regional systems the volume reveals unappreciated aspects of the ancient Southwest s peoples and their lives thereby deepening our awareness of the region s rich and complicated cultural past

White and the Development of Zooarchaeology in North America** R. Lee Lyman, 2016-07-01 Theodore E White and the Development of Zooarchaeology in North America illuminates the researcher and his lasting contribution to a field that has largely ignored him in its history The few brief histories of North American zooarchaeology suggest that Paul W Parmalee John E Guilday Elizabeth S Wing and Stanley J Olsen laid the foundation of the field Only occasionally is Theodore White 1905-77 included yet his research is instrumental for understanding the development of zooarchaeology in North America R Lee Lyman works to fill these gaps in the historical record and revisits some of White's analytical innovations from a modern perspective A comparison of publications shows that not only were White's zooarchaeological articles first in print in archaeological venues but that he was also at least initially more prolific than his contemporaries While the other founders of the field were anthropologists White was a paleontologist by training who studied long extinct animals and their evolutionary histories In working with remains of modern mammals the typical paleontological research questions were off the table simply because the animals under study were too recent And yet White demonstrated clearly that scholars could infer significant information about human behaviors and cultures Lyman presents a biography of Theodore White as a scientist and a pioneer in the emerging field of modern anthropological zooarchaeology
