Students Under Stress David Mechanic, 1962 Handbook of Stress, Coping, and Health Virginia Hill Rice, 2000
Selected for inclusion in this book is material on stress coping and health that is considered to be the most thoroughly developed and studied within the nursing perspective There is a balance between theoretical development research measurement and implications for practice **A Biopsychosocial and Cross-Cultural Approach to the Management of a Cerebrovascular Accident** Claudia Gärtner, The Invulnerable Child Elwyn James Anthony, Bertram J. Cohler, 1987-06-08 This groundbreaking volume thoroughly explores the intriguing and sometimes baffling phenomenon of positive adaptation to stress by children who live under conditions of extreme vulnerability Examining the determinants of risk the development of competence in the midst of hardship and the nature of stress resilience THE INVULNERABLE CHILD will be of profound interests to psychiatrists developmental and clinical psychologists social workers nurses educators and social scientists and all those involved in the psychosocial well being of children Social Support and Psychiatric Disorder Traolach S. Brugha, 1995-08-24 This second volume in a series looking at the social dimensions of mental illness collates and critically examines the information currently available on social support as it impacts on mental health The international team of contributors each actively involved in both clinical and research work in this field collectively covers the whole range of perspectives from biological mechanisms through to psychological and social theory An overview of the latest published evidence and a description of the nature and origins of social support are followed by evidence from observational studies and specific interventions and trials The text concludes with a summary which will act as a valuable resource for practitioners in their evaluation of social and psychological treatments and should also serve to stimulate further research and intervention trials Practitioners and researchers in psychiatry psychology and social work are certain to welcome this timely guide **The Social Context of Coping** John Eckenrode, 2013-12-11 I am very pleased to have been asked to do a brief foreword to this second CRISP volume The Social Context of Coping I know most of the participants and their work and respect them as first rate and influential research scholars whose research is at the cusp of current concerns in the field of stress and coping Psychological stress is central to human adaptation It is difficult to visualize the study of adaptation health illness personal soundness and psychopathology without recognizing their dependence on how well people cope with the stresses of living Since the editor John Eckenrode has portrayed the themes of each of the chapters in his introduction I can limit myself to a few general comments about stress and coping Stress research began as unexplored fields often do with very simple should I say simplistic ideas about how to define the concept Early approaches were unidimensional and input output in outlook modeled implicitly on Hooke's late 17th century engineering analysis in which external load was an environmental stressor stress was the area over which the load acted and strain was the deformation of the structure such as a bridge or building Stress, Appraisal, and Coping Richard S. Lazarus, Susan Folkman, 1984-03-15 The reissue of a
