Students, university and society Margaret Scotford Archer,1972      **Education in East and West Germany** Val D. Rust,2018-05-08 Originally published in 1984 This annotated bibliography is a comprehensive record of English language materials which focus on Education in the Federal Republic of Germany FRG and the German Democratic Republic GDR It provides an excellent resource to scholars beginning with a long introductory chapter about the role of education formal and non formal in the two Germanies The socio historical context is presented but also the authors offer discussion of educational research trends The bibliography is structured in useful thematic chapters and within the categories then split into those relating to East and West Germany      **Catalogue of the University of Michigan** University of Michigan,1967 Announcements for the following year included in some vols      Lawyers in 21st-Century Societies Richard L Abel,Hilary Sommerlad,Ole Hammerslev,Ulrike Schultz,2022-05-05 This book presents an invaluable collection of essays by eminent scholars from a wide variety of disciplines on the main issues currently confronting legal professions across the world It does this through a comparative analysis of the data provided by the reports on 46 countries in its companion volume *Lawyers in 21st Century Societies Vol 1 National Reports* Hart 2020 Together these volumes build on the seminal collection *Lawyers in Society* Abel and Lewis 1988a 1988b 1989 The period since 1988 has seen an acceleration and intensification of the global socio economic cultural and political developments that in the 1980s were challenging traditional professional forms Together with the striking transformation of the world order as a result of the fall of the Soviet bloc neo liberalism globalisation the financialisation of capitalism technological innovations and the changing demography of lawyers these developments underscored the need for a new comparative exploration of the legal professional field This volume deepens the insights in volume 1 with chapters on legal professions in Africa Latin America the Islamic world emerging economies and former communist regimes It also addresses theoretical questions including the sociology of lawyers and other professions medicine accountancy state production the rule of law regional bodies large law firms access to justice technology casualisation cause lawyering diversity gender race and masculinity corruption ethics regulation and legal education Together with volume 1 it will inform and challenge conceptions of the contemporary profession and stimulate and support further research      **University of Michigan Official Publication** ,1965      Managing Legal Uncertainty Ronen Shamir,1995 With the New Deal came a dramatic expansion of the American regulatory state Threatening to undermine many of the traditional roles of the legal system and its actors by establishing a system of administrative law the new emphasis on federal legislation as a form of social and economic planning ushered in an era of legal uncertainty In this study Ronen Shamir explores how elite corporate lawyers and the American Bar Association clashed with academic legal realists over the constitutionality of the New Deal s legislative program Applying the insights of Weber and Bourdieu to the sociology of the legal profession Shamir shows that elite members of the bar had a keen self interest in blocking the expansion of

administrative law He dismisses as oversimplified the view that elite lawyers were hired guns who argued that New Deal legislation was unconstitutional solely because of their duty to represent their capitalist clients Instead Shamir suggests their alignment with the capitalist class was an incidental result of their attempt to articulate their vision of the law as scientific apolitical and judicially oriented and thereby to defend their own position within the law profession The academic legal realists on the other side of the constitutional debates criticized the rigidity of the traditional judicial process and insisted that flexibility of interpretation and the uncertainty of legal outcomes was at the heart of the legal system The author argues that many legal realists encouraged by the experimental nature of the New Deal seized an opportunity to improve on their marginal status within the legal profession by moving their discussions from academic circles to the national policy agenda

*The Politics of Social Cohesion* Nils Holtug, 2021-12-16. Immigration is a divisive policy issue in modern liberal democracies. A common worry is that immigration poses a threat to social cohesion and so to the social unity that underpins cooperation, stable democratic institutions, and a robust welfare state. At the heart of this worry is the suggestion that social cohesion requires a shared identity at the societal level. In *The Politics of Social Cohesion*, Nils Holtug gives a careful assessment of the impact of immigration on social cohesion and egalitarian redistribution. First, he critically scrutinizes an influential argument according to which immigration leads to ethnic diversity, which again tends to undermine trust and solidarity, and so the social basis for redistribution. According to this argument, immigration should be severely restricted. And second, he considers the suggestion that in response to worries about immigration, states should promote a shared identity to foster social cohesion in the citizenry. Holtug argues that the effects of immigration on social cohesion do not need to compromise social justice, and that core principles of liberty and equality, not only form the normative basis for just policies of immigration and integration but, as a matter of empirical fact, are also the values that, if shared, are most likely to produce the social cohesion among community members that provides the social basis for implementing justice.

*The Oxford Handbook of Education and Globalization* Paola Mattei, Xavier Dumay, Eric Mangez, Jacqueline Behrend, 2023. The Oxford Handbook on Education and Globalization brings together in a unique way leading authors in social theory and in political science and reflects on how these two disciplines deal with the relation between globalization and education. The handbook develops a firmer and tighter dialogue between social theory and education research and analyzes the political and institutional factors that shape the adoption of global reforms in education at multiple levels of governance. It is a must-read for anyone looking for a comprehensive overview of how globalization and education interact to result in distinct and varying outcomes across world regions.

*Religion and Civil Society in Europe* Joep de Hart, Paul Dekker, Loek Halman, 2013-07-15. Religion is back again in Europe after never having been gone. It is manifest in the revival of religious institutions and traditions in former communist countries, in political controversies about the relationship between the churches and the state, and about the freedom of religion and the freedom to criticize religion, and in public unease about religious minorities. This book is about religion and civil society in Europe. It moves from general theoretical and normative approaches of this relationship via the examination of national patterns of religion-state relations to in-depth analyses of the impact of religion and secularization on

the values pro social attitudes and civic engagement of individuals It covers Europe from the Lutheran North to the Catholic South and from the secularized West to the Orthodox East and Islamic South East with comparative analyses and country studies concluding with an overall Europe USA comparison **John Goldthorpe: Consensus And Controversy** Jon

D. Hall,1989 **East Asian Law** Lucie Cheng,Arthur Rosett,Margaret Woo,2003-09-02 This work explores the tension in East Asia between the trend towards a convergence of legal practices in the direction of a universal model and a reassertion of local cultural practices The trend towards convergence arises in part from globalisation from rule of law programs promulgated by institutions such as the International Monetary Fund and the Asian Development Bank and from widespread migration in the region whilst the opposing trend arises in part from moves to resist such globalisation This book explores a wide range of issues related to this key problem covering China in particular where resolving differences in conceptions about the rule of law is a key issue as China begins to integrate itself into the World Trade Organisation regime

**American Students** David H. Kelly,1973 **Plural Masculinities** Sofia Aboim,2016-04-22 Plural Masculinities offers a contemporary portrait of the plural dynamics and forms of masculinity emphasizing the multiple even contradictory pathways through which men are remaking their identities Proceeding from the premise that it is impossible to fully understand masculinity without considering its connection with family change and women s change it places men and masculinities within the realm of family life examining men s practices and discourses in their relationships with women and their changing femininities Combining an empirical study based in Portugal with cross national analyses of attitudes towards ideal gender arrangements in Europe and the USA this book examines the various ways in which men come to define their identities and will appeal to those working in the fields of masculinities gender studies and the sociology of the family

Observing Law through Systems Theory Richard Nobles,David Schiff,2012-12-07 This book uses Niklas Luhmann s systems theory to explore how the legal system operates as one of modern society s subsystems The authors demonstrate how this theory alters our understanding of some of the most important and controversial issues within law the nature of judicial communication and legal argument the claim that it can be right to disobey law the character of legal pluralism and globalisation time and its construction within law the significance of the rule of law and human rights and the role of appeals to and within law Systems theory enables the authors to demonstrate how the legal system observes its own operations through its own communications and how this contrasts with the manner in which law is observed by other systems such as the media and politics In this context the authors explore the constraints imposed by systems in particular the legal system upon the individuals who participate in them
