Canada during this period of the Cold War highlighting the consequences of government funded research for humans and nature alike The book reveals how under the guise of environmental protection research the Canadian military sprayed pesticides to clear bushed areas used radioactive substances to investigate vector borne diseases pursued race based theories of cold tolerance and enabled wide ranging tests of newly developed weapons and equipment In arguing that military research in northern Canada was a product of the Cold War Matthew S Wiseman tackles questions of government power scientific authority and medical and environmental research ethics Based on a long and deep pursuit of declassified records archival sources and oral testimony *Frontier Science* is a fascinating new history of military approaches to the human nature relationship **Resources in Education** ,1990 **Geology of North America—An Overview** Albert W.

Stress on Land in Canada Wendy Simpson-Lewis, R. McKechnie, 1983

The objective of this publication is to focus on what Canadians are doing to their land resource It examines several of our activities which produce pressures on the land contributing to land degradations or reducing the utility of the land This work constitutes one of the first ventures into the next phase of the analysis of land use in Canada the analysis of how people use the land once its use has been allocated and what the results of their management practices mean for the resource as a whole

As a first step it identifies several of the more visible pressures which are brought on the land resource and examines how important these are in terms of the maintenance of the capability of the resource base itself

Home Is the Hunter Hans M. Carlson, 2009-05-01

The James Bay Cree lived in relative isolation until 1970 when Northern Quebec was swept up in the political and cultural changes of the Quiet Revolution The ensuing years have brought immense change for the Cree who now live with the consequences of Quebec's massive development of hydroelectricity timber and mineral resources in the North

Home Is the Hunter presents the historical environmental and cultural context from which this recent story grows Hans Carlson shows how the Cree view their lands as their home their garden and their memory of themselves as a people By investigating the Cree's relationship with the land and their three hundred years of contact with outsiders the author illuminates the process of cultural negotiation at the foundation of ongoing political and environmental debates This book is more than a story of dam building and industrial logging in northern Quebec It offers a way of thinking about indigenous peoples' struggles for rights and environmental justice in Canada and elsewhere

Landscapes and Landforms of Western Canada Olav Slaymaker, 2016-12-01

This is the only book to focus on the geomorphological landscapes of Canada West It outlines the little appreciated diversity of Canada's landscapes and the nature of the geomorphological landscape which deserves wider publicity Three of the most important geomorphological facts related to Canada are that 90% of its total area emerged from ice sheet cover relatively recently from a geological perspective permafrost underlies 50% of its landmass and the country enjoys the benefits of having three oceans as its borders the Arctic Pacific and Atlantic oceans Canada West is a land of extreme contrasts from the rugged Cordillera to the wide open spaces of the Prairies from the humid west coast forests to the semi desert in the interior of British Columbia and from the vast Mackenzie river system of the north to small steep cascading streams on Vancouver Island The thickest Canadian permafrost is found in the Yukon and extensive areas of the Cordillera are underlain by sporadic permafrost side by side with the never glaciated plateaus of the Yukon One of the curiosities of Canada West is the presence of volcanic landforms extruded through the ice cover of the late Pleistocene and Holocene epochs which have also left a strong imprint on the

landscape The Mackenzie and Fraser deltas provide the contrast of large river deltas debouching respectively into the Arctic and Pacific oceans *The Routledge Research Companion to Border Studies* Professor Doris Wastl-Walter, 2012-11-28 This comprehensive volume brings together a multidisciplinary team of leading scholars to provide an authoritative state of the art review of all aspects of borders and border research It is global in scope and embraces the more traditional strands of the field including geopolitics migration and territorial identities and also recently emerging topics such as the role of borders in a seemingly borderless world creating neighbourhoods and border enforcement in the post 9 11 era *Post-glacial Vegetation of Canada* J. C. Ritchie, 2004-04 This book brings together all the available information about the complex history of vegetational and environmental change in Canada since the last Ice Age Professor Ritchie discusses the roles of climactic change wildfires diseases and biological factors in controlling the emerging patterns of new plant growth **A**
