Studies In Communications News Knowl:

Studying Politics Across Media Leticia Bode, Emily K. Vraga, 2020-06-29 This book highlights the diverse methods needed to study a complex media environment and the nuance and richness of the understanding gained by doing so by offering examples of political communication research considering multiple platforms simultaneously Political communication research that considers multiple media platforms is difficult and expensive to perform and therefore relatively rare Yet studying media platforms in isolation ignores the realities of the varied and complicated contemporary media experience where most individuals consume information from multiple media outlets Media platforms from traditional outlets such as newspapers and television to newer online platforms such as social media have proliferated in recent years This makes the media environment itself more complex as classic understandings of how the media function give way to a growing recognition of the hybrid media system where divisions between content and producers are opaque and where information is gleaned from increasingly diverse and numerous sources Studying political communication across platforms allows better understanding of which types of experiences and effects are universal and which are specific to particular platforms This book was originally published as a special issue of Political Communication Public Communication and Behavior George Comstock, 2013-09-24 Public Communication and Behavior Volume 2 is devoted to the study of communicatory behavior that has a public or social character More concretely it encompasses research and theory designated as within a range of disciplines and fields advertising child development education journalism political science sociology and wherever else such scholarly activity occurs including of course social psychology The book opens with a chapter on television exposure as a potential cause of aggression This is followed by separate chapters on barriers to information flow and the manner in which news audiences make use of TV news various television forms and their impact on children and the characterization and formalization of some elements of the evolving paradigm of communications research The final chapter discusses the research findings concerning the public impact of the 1983 television movie about the aftermath of nuclear war The Day After

De-Westernizing Communication Research Georgette Wang, 2010-12-14 The rise of postmodern theories and pluralist thinking has paved the way for multicultural approaches to communication studies and now is the time for decentralization de Westernization and differentiation This trend is reflected in the increasing number of communication journals with a national or regional focus Alongside this proliferation of research output from outside of the mainstream West there is a growing discontent with communication theories being Westerncentric Compared with earlier works that questioned the need to distinguish between the Western and the non Western and to build Asian communication theories there seems to be greater assertiveness and determination in searching for and developing theoretical frameworks and paradigms that take consideration of and therefore are more relevant to the cultural context in which research is accomplished This path breaking book moves beyond critiquing Westerncentrism in media and communication studies by examining where Eurocentrism has come from how is it reflected in the study of media and communication what the barriers and solutions to de centralizing the production of theories are and what is called for in order to establish Asian communication theories

Television and Common Knowledge Jostein Gripstrud, 2002-01-22

Television and Common Knowledge considers how television is and can be a vehicle for well informed citizenship in a fragmented modern society. Grouped into thematic sections, contributors first examine how common knowledge is assumed and produced across the huge social, cultural and geographical gulfs that characterise modern society and investigate the role of television as the primary medium for the production and dissemination of knowledge. Later contributions concentrate on specific TV genres such as news, documentary, political discussions and popular science programmes, considering the changing ways in which they attempt to inform audiences and how they are actually made meaningful by viewers.

Genre Knowledge in Disciplinary Communication Carol Berkenkotter, Thomas N. Huckin, 2016-05-06

Although genre studies abound in literary criticism, researchers and scholars interested in the social contexts of literacy have recently become interested in the dynamic rhetorical dimensions of speech genres. Within this burgeoning scholarly community, the authors are among the first researchers working within social science traditions to study genre from the perspective of the implicit knowledge of language users. Thus, this is the first sociocognitive study of genre using case study, naturalistic research methods combined with the techniques of rhetorical and discourse analysis. The term genre knowledge refers to an individual's repertoire of situationally appropriate responses to recurrent situations, from immediate encounters to distanced communication through the medium of print and more recently the electronic media. One way to study the textual character of disciplinary knowledge is to examine both the situated actions of writers and the communicative systems in which disciplinary actors participate. These two perspectives are presented in this book. The authors' studies of disciplinary communication examine operations of systems as diverse as peer review in scientific publications and language in a first grade science classroom. The methods used include case study and ethnographic techniques, rhetorical and discourse analysis of changing features within large corpora and in the texts of individual writers. Through the use of these techniques, the authors engaged in both micro level and macro level analyses and developed a perspective which reflects both foci. From this perspective, they propose that what micro level studies of actors' situated actions frequently depict as individual processes can also be interpreted from the macro level as communicative acts within a discursive network or system. The research methods and the theoretical framework presented are designed to raise provocative questions for scholars, researchers and teachers in a number of fields: linguists who teach and conduct research in ESP and LSP and are interested in methods for studying professional communication; scholars in the fields of communication rhetoric and sociology of science with an interest in the textual dynamics of scientific and scholarly communities; educational researchers interested in cognition in context and composition; scholars interested in writing in the

disciplines The Routledge Handbook of Language and Professional Communication Vijay Bhatia, Stephen Bremner, 2014-02-24 The Routledge Handbook of Language and Professional Communication provides a broad coverage of the key areas where language and professional communication intersect and gives a comprehensive account of the field The four main sections of the Handbook cover Approaches to Professional Communication Practice Acquisition of Professional Competence Views from the Professions This invaluable reference book incorporates not only an historical view of the field but also looks to possible future developments Contributions from international scholars and practitioners focusing on specific issues explore the major approaches to professional communication and bring into focus recent research This is the first handbook of language and professional communication to account for both pedagogic and practitioner perspectives and as such is an essential reference for postgraduate students and those researching and working in the areas of applied linguistics and professional communication
