## **Studies In Early Modern English:**

**Studies in Early Modern English** Dieter Kastovsky, 2011-12-07 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics Working Subjects in Early Modern English Drama Natasha Korda, 2016-02-11 Working Subjects in Early Modern English Drama investigates the ways in which work became a subject of inquiry on the early modern stage and the processes by which the drama began to forge new connections between labor and subjectivity in the period The essays assembled here address fascinating and hitherto unexplored questions raised by the subject of labor as it was taken up in the drama of the period How were laboring bodies and the goods they produced marketed and consumed represented onstage through speech action gesture costumes and properties How did plays participate in shaping the identities that situated laboring subjects within the social hierarchy In what ways did the drama engage with contemporary discourses social political economic religious etc that defined the cultural meanings of work How did players and playwrights define their own status with respect to the shifting boundaries between high status low status legitimate illegitimate profitable unprofitable skilled unskilled formal informal male female free bound paid unpaid forms of work Merchants usurers clothworkers cooks confectioners shopkeepers shoemakers sheepshearers shipbuilders sailors perfumers players magicians servants and slaves are among the many workers examined in this collection Offering compelling new readings of both canonical and lesser known plays in a broad range of genres including history plays comedies tragedies tragicomedies travel plays and civic pageants this collection considers how early modern drama actively participated in a burgeoning proto capitalist economy by staging England's newly diverse workforce and exploring the subject of work itself Early Modern Communi(cati)ons Kinga Földváy, Erzsébet Stróbl, 2013-02-14 As suggested by the title Early Modern Communi(cati)ons the volume demonstrates that the connections and common points of reference within early modern studies bind Elizabethan and Jacobean cultural studies and Shakespearean investigations together in an unexpected number of ways and this diversity of ties has been used as the main theme around which the thirteen essays have been organised While the first group of essays deals with early modern culture presenting the socio historical context necessary for any in depth literary investigation as exemplified through analyses of outstanding literary achievements from the period the second part of the volume focuses on the oeuvre of the most famous representative of the age William Shakespeare with individual chapters creating a tangible continuum moving from the cultural and literary context that informs his works to their interpretation in present day performances and their theoretical backgrounds In the same way as the volume comprises writings on a diverse but still coherent range of topics the authorial team is equally representative of

diversity and continuity at the same time The authors include several senior scholars working in the Hungarian academic community representing all significant research centres in the field from all over the country A number of essays have been contributed by promising young talents as well *Early Modern English* Alexander Bergs, Laurel Brinton, 2017-10-23 This volume provides a comprehensive account of Early Modern English organized by linguistic level The volume not only presents detailed outlines of the traditional language levels it also explores key questions and debates such as do periphrasis the Great Vowel Shift pronouns and relativization literary language including the language of Shakespeare and sociolinguistics including contact and standardization **Early Modern English Marginalia** Katherine O.

Acheson, 2019-01-15 Marginalia in early modern and medieval texts printed handwritten drawn scratched colored and pasted in offer a crazy quilt composed of fragments of how people as individuals and in groups interacted with books and manuscripts over often lengthy periods of time The chapters in this volume build on earlier scholarship that established marginalia as intellectual method Grafton and Jardine as records of reading motivated by cultural social theological and personal inclinations Hackel and Orgel and as practices inspired by material affordances particular to the book and the pen Fleming and Sherman They further the study of the practices of marginalia as a mode a set of ways in which material opportunities and practices overlap with intellectual social and personal motivations to make meaning in the world They introduce us to a set of idiosyncratic examples erotic images doodled in a medical manuscript cut and pasted additions to printed volumes a marriage depicted through shared book ownership for example and reveal to us in case studies the unique value of marginalia as evidence of phenomena as diverse as religious change scientific discovery and the history of the literary canon They also raise broad historical cultural and theoretical questions about the relationship between animal parts and human society the construction of authorship the ways in which exchange of words and objects align the strange marvelous metamorphic thing we call the book and the equally multiplicitous eccentric and inscrutable known as the reader

**Ecological Approaches to Early Modern English Texts** Jennifer Munroe, Edward J. Geisweidt, 2016-03-09 Ecocriticism has steadily gained footing within the larger arena of early modern scholarship and with the publication of well over a dozen monographs essay collections and special journal issues literary studies looks increasingly green yet the field lacks a straightforward easy to use guide to do with reading and teaching early modern texts ecocritically Accessible yet comprehensive the cutting edge collection *Ecological Approaches to Early Modern English Texts* fills this gap Organized around the notion of contact zones or points of intersection that have often been constructed asymmetrically especially with regard to the human nonhuman dichotomy the volume reassesses current trends in ecocriticism and the Renaissance introduces analyses of neglected texts and authors brings ecocriticism into conversation with cognate fields and approaches e g queer theory feminism post coloniality food studies and offers a significant section on pedagogy ecocriticism and early modern literature Engaging points of tension and central interest in the field the collection is largely situated in the and or

that resides between presentism historicism materiality literary somatic semiotic nature culture and most importantly human nonhuman Ecological Approaches to Early Modern English Texts balances coverage and methodology its primary goal is to provide useful yet nuanced discussions of ecological approaches to reading and teaching a range of representative early modern texts As a whole the volume includes a diverse selection of chapters that engage the complex issues that arise when reading and teaching early modern texts from a green perspective

**Water and Cognition in Early Modern English Literature** Nicholas Helms, Steve Mentz, 2025-10-01 Water and cognition seem unrelated things the one a physical environment and the other an intellectual process The essays in this book show how bringing these two modes together revitalizes our understanding of both Water and especially oceanic spaces have been central to recent trends in the environmental humanities and premodern ecocriticism Cognition including ideas about the extended mind and distributed cognition has also been important in early modern literary and cultural studies over the past few decades This book aims to think water and cognition as distinct critical modes and also to combine them in what we term watery thinking Water and Cognition brings together cognitive science and ecocriticism to ask how the environment influences how humans think and how they think about thinking The collection explores how water as element as environment and as part of our bodies affects the way early modern and contemporary discourses understand cognition

**Ecocriticism and Early Modern English Literature** Todd A. Borlik, 2011-05-11 In this timely new study Borlik reveals the surprisingly rich potential for the emergent green criticism to yield fresh insights into early modern English literature Deftly avoiding the anachronistic casting of sixteenth and seventeenth century authors as modern environmentalists he argues that environmental issues such as nature s personhood deforestation energy use air quality climate change and animal sentience are formative concerns in many early modern texts The readings infuse a new urgency in familiar works by Shakespeare Sidney Spenser Marlowe Raleigh Jonson Donne and Milton At the same time the book

forecasts how ecocriticism will bolster the reputation of less canonical authors like Drayton Wroth Bruno Gascoigne and Cavendish Its chapters trace provocative affinities between topics such as Pythagorean ecology and the Gaia hypothesis Ovidian tropes and green phenomenology the disenchantment of Nature and the Little Ice Age and early modern pastoral poetry and modern environmental ethics It also examines the ecological onus of Renaissance poetics while showcasing how the Elizabethans sense of a sophisticated interplay between nature and art can provide a precedent for ecocriticism s current understanding of the relationship between nature and culture as mutually constructive Situating plays and poems alongside an eclectic array of secondary sources including herbals forestry laws husbandry manuals almanacs and philosophical treatises on politics and ethics Borlik demonstrates that Elizabethan and Jacobean authors were very much aware of and concerned about the impact of human beings on their natural surroundings
