Social Studies in Schools David Warren Saxe, 1991-01-01 This supplemental text is an historical account of the beginning years of the social studies Using the 1916 Social Studies report as a base the book outlines the issues contexts and individuals that were influential in the genesis of the seminal social studies prototype program The author explains that many of our present interests such as critical thinking decision making inquiry reflective thinking foundational studies and cultural literacy can be found within the texts of the 1916 social studies program Saxe also shows that the roots of the social studies program are found in the social sciences and not the traditional history curriculum Included are chronological time lines that serve to illustrate the growth of the social studies as well as an extensive bibliography of the primary foundational works of the social studies including the 1916 report These materials greatly enhance the value of Saxe's work for social studies educators and students

SCHOLIOLOGY Józef Kuźma, 2018-11-05 The monograph's most important assets are that it consistently treats scholiology as the study of school it bases the study of school on culture and national traditions as well as contemporary world trends important for its development it emphasises the educational value of scholiology it treats its participants democratically as active agents and partners and it does not follow blindly the fashionable movements in education and disciplines devoted to it It is also a timely and socially cognitively and methodologically important utilitarian work characterised by an innovative approach scientific objectivism and credibility competent use of the conducted analyses transparent recommendations and showing the means limitations and determinants of applying the proposed solutions efficiently The monograph has all the qualities of a good book The Author has included important trends in the world and Polish study of school and its present day developments He has expertly shown the essence and origin of the basic concepts of scholiology and their functions in keeping with the understanding according to contemporary disciplines concerned with education He has aptly yet briefly defined the process of scientific cognition in the study of school on the basis of disciplines concerned with education both humanistic and social ones The Author's concern about the organic growth of scholiology and his readiness to help other educators is clearly conspicuous on the pages of the book The Study of School is a noteworthy monograph full of concrete facts and although some of its parts are not easy at all it is never monotonous or tiring to read It is not narrow minded but full of diversity and open It is a book which cannot be overlooked in the education improvement and in service training of teachers prof zw dr hab Kazimierz Denek Foreword The school system has been under constant criticism from theorists of education for over thirty years Some of the Polish scholars who have conducted critical reviews of school and the education system are Bogdan Suchodolski 1959 Jan Szczepański 2000 Wincenty Oko 1999b Czesław Kupisiewicz 1985a passim Czesław Banach 1997

Zbigniew Kwieciński 1990 2000 Alicja Kargulowa 1991 passim Józef Koźielecki 1995 passim Aleksander Nalaskowski 1995 passim Bogusław Liwerski 1998 and more recently Tadeusz Pilch 1999 passim Kazimierz Denek 2000 passim and Maria Dudzikowa 2001 passim Out of the listed Polish theorists of education Kupisiewicz Denek Pilch Janowski 2002 Kwiatkowska 2005 and Liwerski 2006 in particular carried out not only an in depth critical analysis of how contemporary school functions but also attempted to identify optimal in their opinion ways and means of overcoming the crisis Contemporary school has also been criticised both objectively and subjectively by foreign theorists of school education such as Ivan Illich Philip H Coombs Hubertus von Schoenebeck Merlyn J Behr Erich E Geissler Hartmut von Hentig Torsten Husen Eliška Walterová David Greger and others As Behr stated 1982 cited by Kupisiewicz 1985b p 27 if we wanted to take this dissatisfaction seriously schools would have to close down

Criticism of school main trends

- 1 Traditional school isolated from reality and contemporary life does not keep up with the requirements of the times in the post industrial or postmodern era especially in the times of globalisation with regard to science the development of technology and information technology social progress environmental studies culture and morality
- 2 Contemporary school as a dedicated educational institution has taken on too many functions and tasks connected with general and vocational education upbringing and socialisation cultural education and recently even integrated teaching and providing diagnosis and therapy to children with social adjustment problems as well as developing creativity even though it lacks the proper conditions and suitably qualified and motivated staff to perform all these functions

John Dewey wrote in *The School and Society* first published in 1899 Upon the ethical side the tragic weakness of the present school is that it endeavors to prepare future members of the social order in a medium in which the conditions of the social spirit are eminently wanting Dewey 1907 Dewey went on to state in the same work The obvious fact is that our social life has undergone a thorough and radical change If our education is to have any meaning for life it must pass through an equally complete transformation This transformation is not something to appear suddenly to be executed in a day by conscious purpose Dewey 1907 p 26 Without generalising we can find many analogies with the present times The school at that time was facing similar challenges as it is facing now Aleksander Nalaskowski 1995 p 79 wrote in *Niepokojsko Concern About School* This means that schools should frantically search for a solution to the dilemma how to educate quickly and sensibly without teaching superficiality and shallowness of thinking He continued In schools we encounter literally everything that can be encountered in the contemporary world It is a peculiar agora of history and contemporary times In order to successfully complete the tasks charged to schools of various grades and levels it is no longer sufficient to supplement and change curricula to improve teaching methods to prolong the period of education to buy ever newer computers and audio visual equipment or to improve school architecture and interior design There is an increasingly large discrepancy between schooling and education which is necessary in adult life This is true of general as well as vocational education which is mediocre because it is poor can only be a school of new quality one open to change promoting children's

development but considerably more expensive It should be an institution which will offer better conditions which will set higher requirements but at the same time will be friendly to children Among contemporary Polish theoreticians of pedagogy Stanisław Palka consistently holds the position that research on the borderline of pedagogy and other disciplines can give a strong impulse to the growth of pedagogy and can be inspiring for auxiliary sciences as well a collective work edited by Stanisław Palka *Pogranicza pedagogiki i nauk pomocniczych Borderline of Pedagogy and Auxiliary Sciences* UJ Krak w 2004

As for school as a social institution serving a specific purpose the following sciences and disciplines play an important role philosophy history ethics and aesthetics sociology psychology theoretical and practical pedagogy didactics social pedagogy and resocialisation the media and the Internet management and economics of education law architecture and school ergonomics along with many other disciplines such as inventics the science of invention The influence of tradition and culture as well as moral philosophy i e ethics on school life is also obvious At present culture and its various forms are becoming increasingly important School culture is a complex phenomenon It is based on three dimensions mass collective group and individual and on three levels transcendental metaphysical values rational norms customs social standards and subrational the teacher's personal preferences and feelings The role of culture ethics or aesthetics is already sufficiently understood and popularised in numerous scholarly theses monographs and essays Therefore I have not devoted a separate chapter to these problems in my monograph on the study of school even though they are of fundamental importance in the broadly defined study of education Due to scholiology's connections to almost all areas of life and their entanglement in many contexts a solid analysis of the functioning of the contemporary school system requires subscribing to the model of open pedagogy which Zbyszko Melosik calls pedagogy without borders Melosik 2001 p 31 It is in opposition to confined pedagogy whose proponents set borders of what belongs to the field of pedagogy and what does not Open pedagogy due to its interdisciplinary nature encourages us to pursue if such are our research interests and needs issues which belong to philosophy psychology sociology and cultural studies Every researcher of the problem of contemporary education repeatedly listens to this encouragement since it is a problem requiring a broad interdisciplinary approach Melosik 2001 passim This is even truer for scholiology In the study of school due to its institutional and systematic character we are dealing with a different way of searching for those connections and a somewhat different role of these areas of knowledge for school and the education system This allows for a new vision of school to be created and offers an opportunity to cast a new look at school's present and future functions New areas and common research fields and topics come into view In a longer term this may lead to a new thinking about school and to increasing the effectiveness of its work which would take into account the effect produced by the integrated approach possible synergic effect This goal is very distant and perhaps too ambitious During the final stages of preparing the English version of Scholiology for publication in June 2018 the European Parliament passed a resolution on modernisation of education in the EU The draft of the resolution prepared by MEP Krystyna ybacka

presents a comprehensive approach to the problem of education looking at the process of schooling from pre primary to higher education including mechanisms of lifelong learning and creating optimum conditions for individualised teaching The part devoted to teachers is an important element of the resolution The document emphasises the need to improve the status of teachers their working conditions and career prospects and pay As the rapporteur correctly notes The traditional place of learning i e the school is now complemented by the many other sources of information available Modern technologies have liberated education created opportunities for multidimensional educational activities and established an EDUCATIONAL SPACE A major challenge is to ensure that schools are the most interesting place in this space Europe s demographic and social challenges the requirements of the labour market new technologies personal preferences and educational needs are determining the directions of changes in education It is important that education systems take these factors into account in order not only to offer high quality knowledge but also to ensure appropriate competences including the key competence of the 21st century the ability to successfully learn throughout one s life Draft report on modernisation of education in the EU 2018 The resolution seems to contain key recommendations for modern education which are discussed in depth in the Study of School or Scholology to which I have devoted many years of my research work
