## **Studies In Stemmatology:**

Studies in Stemmatology Pieter van Reenen, Margot van Mulken, 1996-04-01 This volume contains ten papers selected from among those presented at the annual Free University Stemmatalogical Colloquia 1990-93. Current issues in automated stemmatology, paleography and codicology are addressed from contemporary theoretical perspectives. All papers focus on new directions in textuology and manuscript affiliation and especially on the use of computer science in this field. The theoretical implications of computer assisted stemma construction are explored. In combination with achievements in codicology and paleography these investigations allow for dealing with the major problems in textuology: extreme complex and entangled manuscript traditions. Following an introductory chapter, part 1 presents six theoretical contributions on stemmatology and part 2 deals with auxiliary fields in textuology such as codicology and paleography. In part 3 applications of the previously developed fields are presented.

**Studies in Stemmatology II** Pieter Th. van Reenen, A. A. den Hollander, Margot van Mulken, 2004-01-01 Stemmatology is the discipline that attempts to reconstruct the transmission of a text on the basis of relations between the various surviving manuscripts. The object of this volume is the evaluation of the most recent methods and techniques in the field of stemmatology as well as the development of new ones. The book is largely interdisciplinary in character; it contains contributions from scholars from classical, historical, biblical, medieval and modern language studies as well as from mathematical and computer scientists and biologists. The contributions in the book have been divided into two sections. The first section deals with various stemmatological methods and techniques. The second section focuses more specifically on the various problems concerning textual variation. An earlier volume on *Studies in Stemmatology* was published in 1996 and opened the most actual state of the art in stemmatology to a broad audience. That first volume was very well received by stemmatologists and also gave an impulse to new research as several articles in the current volume clearly illustrate. Both volumes are of interest to scholars in historical linguistics, literary studies, Bible studies, classical studies, medieval studies and history.

*Studies in Stemmatology* Pieter Th. van Reenen, Margot van Mulken, 2004

Studies in the Kāśikāvṛtti Pascale Haag, Vincenzo Vergiani, 2011 The volume is the first outcome of an international project aiming to create a complete critical edition of the *Kasikavṛtti* 7th c CE of Jayaditya and Vamana, the oldest surviving complete commentary on the *Astadhyayi* of Panini ca 4th c BCE. The first phase, culminating in this critical edition of the *Kasika*'s initial section devoted to the *Pratyaharasutras* (the rules for abbreviations), was jointly coordinated by the editors together with Professor Saroja Bhate, a Paninian scholar of global renown. This edition is accompanied by a description of the manuscripts collated, an annotated English translation by the editors and a series of editorial contributions dealing with the history of the *Kasikavṛtti*'s editions and its current textual sources. Summaries of the methodology and results of the project's first phase are also included. In the second part of the study, various authors discuss an array of theoretical, historical and methodological topics ranging from the historical importance of the *Kasika* and its relation with the seminal *Mahabhasya* of

Patanjali to a comparison with the corresponding section in the Candravrtti the evidence of Bhartrhari s influence on the Kasika and the copyists invocations and the incipit attested in the Kasikavrtti manuscripts     Studies in the Kasikavrtti. Martin,2010     Digital Humanities in Biblical, Early Jewish and Early Christian Studies Claire Clivaz,Andrew Gregory,David Hamidović,2013-11-28 Ancient texts once written by hand on parchment and papyrus are now increasingly discoverable online in newly digitized editions and their readers now work online as well as in traditional libraries So what does this mean for how scholars may now engage with these texts and for how the disciplines of biblical Jewish and Christian studies might develop These are the questions that contributors to this volume address Subjects discussed include textual criticism palaeography philology the nature of ancient monotheism and how new tools and resources such as blogs wikis databases and digital publications may transform the ways in which

contemporary scholars engage with historical sources Contributors attest to the emergence of a conscious recognition of something new in the way that we may now study ancient writings and the possibilities that this new awareness raises

**The Practice of Philology in the**

**Nineteenth-Century Netherlands** Ton Kalmthout, Huib Zuidervaat, 2025-10-01 The Netherlands have a long and important

tradition in scholarly philology For instance in the early days of Leiden University philology or the critical examination of classical texts was regarded as a cutting edge science This field of scholarship had far reaching implications on disciplines such as theology chronology astronomy history law and other demarcated bodies of knowledge identified as a separate science Regardless of the exact field of inquiry philologists as protectors and teachers of the written heritage always played a pivotal role in the formation of the cultural repertoire of the educated public As men of learning and high esteem philologists also exerted influence outside the cultural sphere especially in politics and religion The ever changing composition of the philological frame of reference made no difference in this respect But in the nineteenth century the practice of philology was passing a crucial phase of change In both its object of study and in its methods several fundamental modifications occurred Texts in the vernacular and national philologies attracted more and more attention of the public and neo philology succeeded in taking over the central position traditionally occupied by classical philology Subfields such as linguistics edition technique and history grew into new more or less independent sub disciplines whereas scientific methods such as stemmatology and comparative approaches were introduced in the humanities This redesigned the landscape of philology radically New boundaries became apparent and existing ones were questioned or drawn sharper At the time philology underwent an accelerated process of differentiation and professionalization Philology demarcated its own more or less independent sphere with a specific authority The establishment of a branch of national philology can be regarded as an example of discipline formation in the humanities This fascinating process of change and the search for new boundaries in Dutch philology is highlighted in this book *The Practice of Philology in the Netherlands in the Nineteenth Century* the first book on this topic in the English language **A Critical Edition of Ibn al-Haytham's On the Shape of the Eclipse** Dominique

Raynaud, 2016-11-16 This book provides the first critical edition of Ibn al Haytham's *On the Shape of the Eclipse* with English translation and commentary which records the first scientific analysis of the camera obscura *On the Shape of the Eclipse* includes pioneering research on the conditions of formation of the image in a time deemed to be committed to aniconism It also provides an early attempt to merge the two branches of Ancient optics the theory of light and theory of vision What perhaps most strongly characterizes this treatise is the close interaction of a geometric analysis of light and experimental reasoning Ibn al Haytham conducted his experiments in a systematic way by varying all that could be changed the shape and size of the aperture the focal length of the camera obscura the distance and shape of the celestial bodies This way he achieved a thorough understanding This work represents a decisive step in both the history of optics and the application of the experimental method that was just as efficient in medieval Islam as today *Directory of Published Proceedings*, 2000

*John's Gospel* Christian Askeland, 2012-10-30 This monograph explores the history of the Coptic tradition of John's gospel considering when these ancient Egyptian witnesses are profitable for determining the earliest readings of their Greek source text The standard critical edition of the Greek New Testament cites the Coptic versions no fewer than 1 000 times in John's

gospel For these citations that edition references six dialectally distinct Coptic translations the Achmimic Bohairic Lycopolitan Subachmimic Middle Egyptian Fayumic Proto Bohairic and Sahidic versions In addition to examining these this project considers newly published texts from the Fayumic and Middle Egyptian traditions Apart from a pivotal article on Coptic and New Testament textual criticism by Gerd Mink in 1972 Coptological research has progressed with only limited contact with Greek textual criticism The discovery of various apocryphal Christian texts in Coptic translations has further diverted attention from Greek textual criticism This project contributes to this subject area by applying recent advances in Coptology and exploring the various facets of the Coptic translations In particular the monograph investigates 1 translation technique 2 Greek Coptic linguistic differences 3 the reliability of the Coptic manuscript tradition 4 the relationships between the Coptic versions and 5 relevant contributions from the scholarly community John's gospel is extant in more Coptic dialectal versions than any other biblical text As a result the gospel offers unique insight into the nature of the ancient Egyptian Christian communities

*P.Beatty III (P47): The Codex, Its Scribe, and Its Text* Peter Malik, 2017-05-01 Since ancient works were preserved by means of handwritten copies critical enquiry into their texts necessitates the study of such copies In P Beatty III P47 The Codex Its Scribe and Its Text Peter Malik focuses on the earliest extensive copy of the Book of Revelation Integrating matters of palaeography codicology and scribal practice with textual analysis Malik sheds new light on this largely neglected yet crucially important early Christian papyrus Notable contributions include a new proposed date for P47 identification of several previously unreported scribal corrections as well as the discovery of the manuscript's close affinity with the Sahidic version Significantly Malik's detailed data rich analyses are accompanied by a fresh transcription and for the first time high resolution colour photographs of the manuscript

**Changing the Goalpost of New Testament Textual Criticism** Abidan Paul Shah, 2020-10-02 Before the 1960s the goal of New Testament Textual Criticism was singular to retrieve the original text of the New Testament Since then the goalpost has incrementally shifted away from the original text to retrieving any text or many texts of the NT Some scholars have even concluded that the original text is hopelessly lost and cannot be retrieved with any confidence or accuracy Other scholars have gone a step further to claim that the idea of an original text itself is a misconception that needs to be abandoned If this new approach in NTTC is correct then the authority of Scripture is weakened or no longer valid It will be shown in this book that such is not the case Furthermore emphasis will be placed on the need to return to the traditional goalpost of NTTC i.e. to retrieve the original text Without a generally definitive text the door will be left wide open to recreate any desired text of the NT An unsettled original text will result in an unsettled biblical theology due to a lack of any authoritative and standard text Consequently it will lead to an unsettled Christian faith and practice
