

## Chapter 19: Proclus

In Graham Oppy and Nick Trakakis (eds), *The History of Western Philosophy of Religion* volume 1, (Acumen / OUP: 2009), 2009, pp. 263–76

The question of Proclus' contribution to the history of Western philosophy of religion is complicated by the fact that Proclus would not himself have distinguished philosophy of religion as a distinct sub-branch of philosophy. When we moderns think about this subject, we think about it as the philosophical study of religious phenomena – and in particular the assessment of the truth claims made explicitly or implicitly by various religions. In this way, philosophy and religion have different goals. The goal of philosophy is truth, and the specific goal of philosophy of religion is an assessment of the truth of various propositions about God or the afterlife. The goal of religion, if we may speak this way, is not merely truth, but salvation and a godly life.

It seems unlikely that Proclus would have recognised either of these divisions – that between philosophy of religion and the broader area of metaphysics or that between philosophy and religion itself.

The first point is one that should by now be familiar. Gerson (1990) makes the point that *theologia* in ancient Greek philosophy generally is best thought of as part and parcel of the attempt to give an account of the first principles (*archai*) of things. Hence metaphysics or 'first philosophy' in Aristotle coincides with theology (*Metaphys.* 1026a24–33). As we shall see, Proclus' theology takes in the systematic study of all intelligible beings – roughly, those things that make up the realm of Intellect or *nous* for Plotinus – in addition to the utterly transcendent One or Good.

With respect to the second point, the aim of philosophy is one with the goal of living – to become like God in as much as this is possible. The neoplatonists take *Theaetetus* 176ab and *Timaeus* 90bd to indicate that this is the *telos* or objective of living. The life of philosophy is one way in which we accomplish this assimilation to the divine. But the life in which one practises religious mystery rites also plays a role – perhaps an even greater role – in facilitating the soul's return to the divine. These two pathways to the divine, however, find their unification in the exegesis of the texts of Plato. This is because, as Proclus sees matters, Plato's philosophy provides the purest distillation of the wisdom that is common to all earlier philosophical texts, as
