geographical areas and with different approaches to the broad discipline defined as Cognitive Science is detailed in the first section of this book which outlines a brief history of psychology in each country in the region and provides an overview of the spirit that characterizes the Alps Adria working community The Alps Adria Rector Conference believes that harmonious coexistence and efficient collaboration of the peoples and communities of the different regions constitute the characteristics and specificities of the present cultural landscape of the Alps Adria region in Europe It is in this spirit that this book has been edited underscoring the concept of unity in diversity that has characterized the Alps Adriatic community Furthermore such unity is now a necessary attribute for science where interdisciplinarity is both highly encouraged and increasingly accepted The second and third sections of the book are devoted to situating this interdisciplinarity in the framework of cognitive science As such this book will serve as a basis for fruitful exchange not only inside the community but also beyond both geographical and theoretical borders

**Humanistic Wellbeing** Joar Vittersø, 2025-02-12 This open access book seeks to change the way we think about happiness and the good life It starts ambitiously by exploring how the biological question What is life can be integrated with the philosophical question What is good It ends with a radical idea for how scientific reasoning can include a value based theory of the good life Anchored in basic knowledge about human nature the new humanistic theory of wellbeing suggests that a life is good to the extent that it allows us to perform our humanness well The theory further defines a well performed humanness as the fulfilment of three universal human needs the need for stability the need for change and the need to and for care To reach this standpoint the author critically examines major concepts in the wellbeing literature such as values happiness life satisfaction affect hedonia eudaimonia and the good life Based on these reviews the author argues that a science of wellbeing cannot be strictly descriptive and value free A life should not be considered good only because it feels good or is thought of as good for the person living it A good life must also be committed to a universal morality Therefore the humanistic theory of wellbeing suggests that it is good to like one's life but even better to like it for the right reasons
