Steele,2012-02-17 The discovery of a gradual acceleration in the moon s mean motion by Edmond Halley in the last decade of the seventeenth century led to a revival of interest in reports of astronomical observations from antiquity These observations provided the only means to study the moon s secular acceleration as this newly discovered acceleration became known This book contains the first detailed study of the use of ancient and medieval astronomical observations in order to investigate the moon s secular acceleration from its discovery by Halley to the establishment of the magnitude of the acceleration by Richard Dunthorne Tobias Mayer and J r me Lalande in the 1740s and 1750s Making extensive use of previously unstudied manuscripts this work shows how different astronomers used the same small body of preserved ancient observations in different ways in their work on the secular acceleration In addition this work looks at the wider context of the study of the moon s secular acceleration including its use in debates of biblical chronology whether the heavens were made up of ther and the use of astronomy in determining geographical longitude It also discusses wider issues of the perceptions and knowledge of ancient and medieval astronomy in the early modern period This book will be of interest to historians of astronomy astronomers and historians of the ancient world **Clio Medica. Imagined Sovereignties Kevin Olson,2016-04-15 Imagined Sovereignties provokes new ways of imagining popular politics by critically examining the idea of the power of the people

Sensibility in the Early Modern Era Anik Waldow,2018-02-02 Sensibility in the Early Modern Era investigates how the early modern characterisation of sensibility as a natural property of the body could give way to complex considerations about the importance of affect in morality What underlies this understanding of sensibility is the attempt to fuse Lockean sensationism with Scottish sentimentalism being able to have experiences of objects in the world is here seen as being grounded in the same principle that also enables us to feel moral sentiments Moral and epistemic ways of relating to the world thus blend into one another as both can be traced to the same capacity that enables us to affectively respond to stimuli that impinge on our perceptual apparatus This collection focuses on these connections by offering reflections on the role of sensibility in the early modern attempt to think of the human being as a special kind of sensitive machine and affectively responsive animal Humans as they are understood in this context relate to themselves by sensing themselves and perpetually refining their intellectual and moral capacities in response to the way the world affects them Responding to the world here refers to the manner in which both natural and man made influences impact on our ability to conceptualise the animate and inanimate world and our place within that world This book was originally published as a special issue of the Intellectual History Review

Reason, Faith, and the Struggle for Western Civilization Samuel Gregg,2019-06-25 Gregg s book is the closet thing I ve encountered in a long time to a one volume user s manual for operating Western Civilization The Stream Reason Faith and the Struggle for Western Civilization offers a concise intellectual history of the West through the prism of the relationship between faith and reason Free Beacon The genius of Western civilization is its unique synthesis of reason and faith But today that synthesis is under attack from the East by radical Islam faith without reason and from within the West itself by aggressive secularism reason without faith The stakes are incalculably high The naive and increasingly common assumption that reason and faith are incompatible is simply at odds with the facts of history The revelation in the Hebrew Scriptures of a reasonable Creator imbued Judaism and Christianity with a conviction that the world is intelligible leading to the flowering of reason and the invention of science in the West It was no accident that the Enlightenment took place in the culture formed by the Jewish and Christian faiths We can all see that faith without reason is benighted at best fanatical and violent at worst But too many forget that reason stripped of faith is subject to its own pathologies A supposedly autonomous reason easily sinks into fanaticism stifling dissent as bigoted and irrational and

devouring the humane civilization fostered by the integration of reason and faith The blood soaked history of the twentieth century attests to the totalitarian forces unleashed by corrupted reason But Samuel Gregg does more than lament the intellectual and spiritual ruin caused by the divorce of reason and faith He shows that each of these foundational principles corrects the other s excesses and enhances our comprehension of the truth in a continuous renewal of civilization By recovering this balance we can avoid a suicidal winner take all conflict between reason and faith and a future that will respect neither

The Sceptical Mode in Modern Philosophy R. A. Watson, J.E. Force, 2012-12-06 The Words of Winston Churchill Jonathan Locke Hart, 2022-09-30 The Words of Winston Churchill a study that ranges over the course of a rich controversial and remarkable career is about the power and art of his language as a writer and speaker Churchill used words as the greatest of poets and orators do and did so in Parliament and for the people Britain and the empire in war and peace facing the changes in the world and resisting Hitler and the Nazis Drawing on the traditions of poetics rhetoric and textual commentary the study concentrates on Churchill s writing and is sensitive to texts and contexts and to the archive A central matter is Churchill speaking in Parliament and the reception of his speeches there for over six decades although his work as a writer and a speaker outside the House of Commons is also important Churchill speaks to the House the people Britain the Empire the Commonwealth and the world and in crisis defends freedom and democracy

The Bad Taste of Others Jennifer Tsien, 2012-05-26 An act of bad taste was more than a faux pas to French philosophers of the Enlightenment To Montesquieu Voltaire Diderot and others bad taste in the arts could be a sign of the decline of a civilization These intellectuals faced with the potential chaos of an expanding literary market created seals of disapproval in order to shape the literary and cultural heritage of France in their image In The Bad Taste of Others Jennifer Tsien examines the power of ridicule and exclusion to shape the period s aesthetics Tsien reveals how the philosophes consecrated themselves as the protectors of true French culture modeled on the classical the rational and the orderly Their anxiety over the invasion of the Republic of Letters by hordes of hacks caused them to devise standards that justified the marginalization of worldly women barbarians and plebeians While critics avoided strict definitions of good taste they wielded the term bad taste against all popular works they wished to erase from the canon of French literature including Renaissance poetry biblical drama the burlesque theater of the previous century the essays of Montaigne and genres associated with the so called pr cieuses Tsien s study draws attention to long disregarded works of salon culture such as the nignes and offers a new perspective on the critical legacy of Voltaire The philosophes open disdain for the undiscerning reading public challenges the belief that the rise of aesthetics went hand in hand with Enlightenment ideas of equality and relativism

Rousseau, the Age of Enlightenment, and Their Legacies Robert Wokler, 2012 Robert Wokler was one of the world s leading experts on Rousseau and the Enlightenment but some of his best work was published in the form of widely scattered and difficult to find essays This book collects for the first time a representative selection of his most important essays on Rousseau and the

legacy of Enlightenment political thought These essays concern many of the great themes of the age including liberty equality and the origins of revolution But they also address a number of less prominent debates including those over cosmopolitanism the nature and social role of music and the origins of the human sciences in the Enlightenment controversy over the relationship between humans and the great apes These essays also explore Rousseau s relationships to Rameau Pufendorf Voltaire and Marx reflect on the work of important earlier scholars of the Enlightenment including Ernst Cassirer and Isaiah Berlin and examine the influence of the Enlightenment on the twentieth century One of the central themes of the book is a defense of the Enlightenment against the common charge that it bears responsibility for the Terror of the French Revolution the totalitarian regimes of the twentieth century and the Holocaust

The Evangelical Counter-Enlightenment William R. Everdell,2021-05-21 This contribution to the global history of ideas uses biographical profiles of 18th century contemporaries to find what Salafist and Sufi Islam Evangelical Protestant and Jansenist Catholic Christianity and Hasidic Judaism have in common Such figures include Muhammad Ibn Abd al Wahab Count Nikolaus Zinzendorf Jonathan Edwards John Wesley Jean Jacques Rousseau and Israel Ba al Shem Tov The book is a unique and comprehensive study of the conflicted relationship between the evangelical movements in all three Abrahamic religions and the ideas of the Enlightenment and Counter Enlightenment Centered on the 18th century the book reaches back to the third century for precedents and context and forward to the 21st for the legacy of these movements This text appeals to students and researchers in many fields including Philosophy and Religion their histories and World History while also appealing to the interested lay reader

Europe and the British Geographical Imagination, 1760-1830 Paul Stock,2019-10-03 Europe and the British Geographical Imagination 1760 1830 explores what literate British people understood by the word Europe in the late eighteenth and early nineteenth centuries Was Europe unified by shared religious heritage Where were the edges of Europe Was Europe primarily a commercial network or were there common political practices too Was Britain itself a European country While intellectual history is concerned predominantly with prominent thinkers Paul Stock traces the history of ideas in non elite contexts offering a detailed analysis of nearly 350 geographical reference works textbooks dictionaries and encyclopaedias which were widely read by literate Britons of all classes and can reveal the formative ideas about Europe circulating in Britain ideas about religion the natural environment race and other theories of human difference the state borders the identification of the centre and edges of Europe commerce and empire and ideas about the past progress and historical change By showing how these and other questions were discussed in eighteenth and nineteenth century British culture Europe and the British Geographical Imagination 1760 1830 provides a thorough and much needed historical analysis of Britain s enduringly complex intellectual relationship with Europe

Buffon Jacques Roger,1997 A biography of a premier French scientist of

the Enlightenment and the director of France's Royal Botanical Garden using Buffon's enormous literary production as the major source of insight into his and his age's beliefs about the natural world Includes bandw illustrations from his Natural History First published in 1989 as Buffon un philosophe au Jardin du Roi by Librairie Artheme Fayard Annotation copyrighted by Book News Inc Portland OR **Subject Index of Modern Books Acquired** British Library, 1927 **Subject Index of the Modern Books Acquired by the British Museum in the Years ...** , 1927 *Epistemology and Natural Philosophy in the 18th Century* Danilo Capecchi, 2020-08-25 This book documents the process of transformation from natural philosophy which was considered the most important of the sciences until the early modern era into modern disciplines such as mathematics physics natural history chemistry medicine and engineering It focuses on the 18th century which has often been considered uninteresting for the history of science representing the transition from the age of genius and the birth of modern science the 17th century to the age of prodigious development in the 19th century Yet the 18th century the century of Enlightenment as will be demonstrated here was in fact characterized by substantial ferment and novelty To make the text more accessible little emphasis has been placed on the precise genesis of the various concepts and methods developed in scientific enterprises except when doing so was necessary to make them clear For the sake of simplicity in several situations reference is made to the authors who are famous today such as Newton the Bernoullis Euler d'Alembert Lagrange Lambert Volta et al not necessarily because they were the most creative and original minds but mainly because their writings represent a synthesis of contemporary and past studies The above names should therefore be considered more labels of a period than references to real historical characters

Adopting the Track of Expression: An Emotional Symphony within **Studies Voltaire 18th Century Volume 184**

In some sort of eaten by screens and the ceaseless chatter of immediate transmission, the melodic beauty and emotional symphony produced by the written term often fade into the backdrop, eclipsed by the relentless noise and disturbances that permeate our lives. However, set within the pages of **Studies Voltaire 18th Century Volume 184** a wonderful fictional treasure full of organic feelings, lies an immersive symphony waiting to be embraced. Crafted by a wonderful composer of language, this interesting masterpiece conducts readers on an emotional journey, well unraveling the concealed melodies and profound affect resonating within each carefully constructed phrase. Within the depths of the moving analysis, we will examine the book is key harmonies, analyze their enthralling publishing model, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
