General Catalogue of Printed Books British Museum. Department of Printed Books, 1969      *Myth in the Modern Novel* Liisa Steinby, 2023-03-20 Myth in the Modern Novel Imagining the Absolute posits a twofold thesis First although Modernity is regarded as an era dominated by science and rational thought it has in fact not relinquished the hold of myth a more primitive form of thought which is difficult to reconcile with modern rationality Second some of the most important statements as to the reconcilability of myth and Modernity are found in the work of certain prominent novelists This book offers a close examination of the work of eleven writers from the late eighteenth century to the beginning of the twenty first representing German French American Czech and Swedish literature The analyses of individual novels reveal a variety of intriguing views of myth in Modernity and offer an insight into the modernizing transformations myth has undergone when applied in the modern novel The study shows the presence of the subconscious the mythic layer in modern western culture and how this has been dealt with in novelistic literature      Pictures and Popery Clare Haynes, 2017-05-15 The part religion played in questions of national identity in early modern England is a familiar historical theme yet little work has been done on how this worked culturally Nowhere is this more visible than in the seeming contradiction of a militantly Protestant nation such as England that had a high regard for Catholic art It is this dichotomy the tensions between art and anti Catholicism that forms the central investigation of this book During the late seventeenth and eighteenth century religious art was closely identified with idolatry and the use of images was one of the most obvious markers of the boundary between Protestantism and Catholicism This manifested itself in an unease about the status of the religious image in English society which was articulated in religious tracts anti Catholic propaganda polemical debate court cases and numerous other places In light of these attacks upon idolatry the fact that a great deal of Catholic art was so highly regarded and sought after seems puzzling By discussing English attitudes towards the works of Italian painters including Raphael Michelangelo and Domenichino and the ways in which native artists sought appropriately Protestant ways of emulating them this volume offers a fascinating perspective on the dichotomy that existed between English appreciation and disapproval of Catholic culture By taking this cultural and artistic approach and applying it to the broader historical themes a new and invigorating way of understanding religion and national identity is offered      **The Early Origins of the Social Sciences** Lynn McDonald, 1996 This study traces the methodological foundations research techniques and basic concepts of the social sciences from their earliest origins to the beginning of 20th century It discusses the French Enlightenment British moral philosophy and includes figures from the 19th century such as Marx      Gothic Fiction and the Invention of Terrorism Joseph Crawford, 2013-09-12 Choice Outstanding Academic Title 2014 This book examines the connections between the growth of terror fiction the genre now known as Gothic in the late eighteenth century and the simultaneous appearance of the conceptual origins of terrorism as a category of political action In the 1790s Crawford argues four inter connected bodies of writing arose in Britain the historical

mythology of the French Revolution the political rhetoric of terrorism the genre of political conspiracy theory and the literary genre of Gothic fiction known at the time as terrorist novel writing All four bodies of writing drew heavily upon one another in order to articulate their shared sense of the radical and monstrous otherness of the extremes of human evil a sense which was quite new to the eighteenth century but has remained central to the ways in which we have thought and written about evil and violence ever since

**The Enterprise of Enlightenment** Terry Pratt, David McCallam, 2004 Published on the occasion of his retirement in honour of his outstanding contribution to French Enlightenment studies this volume explores those areas of research in which David Williams has excelled and continues to excel literary criticism particularly Voltaire the history of ideas women and Enlightenment colonial practices and revolutionary politics It brings together a collection of essays from some of the most prestigious international names in the field and tackles subjects which expose in all their splendid diversity the enterprise both innovation and undertaking of the Si cle des Lumi res

**Bodybuilding** Martin Myrone, 2005-01-01 Combining visual analysis social history and masculinity studies Bodybuilding effects a vivid image of this critical period in Britain's cultural history and establishes an ambitious new framework for the study of late eighteenth century art and gender

**BOOK JACKET Irony and the Discourse of Modernity** Ernst Behler, 2014-07-01 Behler discusses the current state of thought on modernity and postmodernity detailing the intellectual problems to be faced and examining the positions of such central figures in the debate as Lyotard Habermas Rorty and Derrida He finds that beyond the limits of communication further discussion must be carried out through irony The historical rise of the concept of modernity is examined through discussions of the querelle des anciens et des modernes as a break with classical tradition and on the theoretical writings of de Stael the English romantics and the great German romantics Schlegel Hegel and Nietzsche The growth of the concept of irony from a formal rhetorical term to a mode of indirectness that comes to characterize thought and discourse generally is then examined from Plato and Socrates to Nietzsche who avoided the term irony but used it in his central concept of the mask

**Measure of the Earth** Larrie D. Ferreiro, 2011-05-31 Describes the early 18th century expedition of scientists sent by France and Spain to colonial Peru to measure the degree of equatorial latitude which could resolve the debate between whether the earth was spherical or flattened at the poles

*Voltaire's Jews and Modern Jewish Identity* Harvey Mitchell, 2012-08-21 Harvey Mitchell's book argues that a reassessment of Voltaire's treatment of traditional Judaism will sharpen discussion of the origins of and responses to the Enlightenment His study shows how Voltaire's nearly total antipathy to Judaism is best understood by stressing his self regard as the author of an enlightened and rational universal history which found Judaism's memory of its past incoherent and in addition failed to meet the criteria of objective history a project in which he failed Calling on an array of Jewish and non Jewish figures to reveal how modern interpretations of Judaism may be traced to the core ideas of the Enlightenment this book concludes that Voltaire

paradoxically helped to foster the ambiguities and uncertainties of Judaism's future

**The Rococo Interior** Katie Scott, 1995-01-01 Defines and depicts the arts and architecture of the rococo period in France and examines its relation to society

**Human Nature, Cultural Diversity, and the French Enlightenment** Henry Vyverberg, 1989-08-17 In this work Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought the idea of human nature Human nature was commonly seen as a broadly universal unchanging entity though perhaps modifiable by geographical social and historical factors Enlightenment empiricism suggested a degree of cultural diversity that has often been underestimated in studies of the age Evidence here is drawn from Diderot's celebrated Encyclopedia and from a vast range of writing by such Enlightenment notables as Voltaire Rousseau and d'Holbach Vyverberg explains not only the age's undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity He shows that although the Enlightenment's historical sense was often blinkered by its notions of a uniform human nature there were also cracks in this concept that developed during the Enlightenment itself

Seduced by Logic Robyn Arianrhod, 2012-10-01 Newton's explanation of the natural law of universal gravity shattered the way mankind perceived the universe and hence it was not immediately embraced After all how can anyone warm to a force that cannot be seen or touched But for two women separated by time and space but joined in their passion for Newtonian physics the intellectual power of that force drove them to great achievements Brilliant determined and almost entirely self-taught they dedicated their lives to explaining and disseminating Newton's discoveries Robyn Arianrhod's Seduced by Logic tells the story of Emilie du Chatelet and Mary Somerville who despite living a century apart were connected by their love for mathematics and their places at the heart of the most advanced scientific society of their age When Newton published his revolutionary theory of gravity in his monumental Principia of 1687 most of his Continental peers rejected it for its reliance on physical observation and mathematical insight instead of religious or metaphysical hypotheses But the brilliant French aristocrat and intellectual Emilie du Chatelet and some of her early eighteenth-century Enlightenment colleagues including her lover Voltaire realized the Principia had changed everything marking the beginning of theoretical science as a predictive quantitative and secular discipline Emilie devoted herself to furthering Newton's ideas in France and her translation of the Principia is still the accepted French version of this groundbreaking work Almost a century later in Scotland Mary Somerville taught herself mathematics and rose from genteel poverty to become a world authority on Newtonian physics She was felled by the famous French Newtonian Pierre Simon Laplace whose six-volume Celestial Mechanics was considered the greatest intellectual achievement since the Principia Laplace's work was the basis of Mary's first book Mechanism of the Heavens it is a bittersweet irony that this book written by a woman denied entry to university because of her gender remained an advanced university astronomy text for the next century Combining biography history and popular science Seduced by Logic not only reveals the fascinating story of two incredibly talented women but also brings to life a period of dramatic political

and scientific change With lucidity and skill Arianrhod explains the science behind the story and explores through the lives of her protagonists the intimate links between the unfolding Newtonian revolution and the development of intellectual and political liberty

**General Catalogue of Printed Books** British Museum. Department of Printed Books,1971 *The Reader's Guide to the Encyclopaedia Britannica* Encyclopaedia Britannica, inc,1913 Tacky the penguin does not fit in with his sleek and graceful companions but his odd behavior comes in handy when hunters come with maps and traps *Women Writing Opera* Jacqueline Letzter,Robert Adelson,2001-08-12 At the same time it demonstrates how the Revolution fostered many dreams and ambitions for women that would be doomed to disappointment in the repressive post Revolutionary era

Captain Singleton Daniel Defoe,2019-07-09 Following the success of Robinson Crusoe Daniel Defoe wrote a new fiction the story of an English pirate whose success eclipsed every buccaneer the Atlantic world had seen Featuring a haunted unreliable narrator a daring trek across the continent of Africa and mercantile adventures in the China Seas Captain Singleton is a tale of loneliness brotherhood and the lust for profit Appendices to this Broadview Edition include materials on pirate fiction travel writing and earlier pirate tales that may have provided models for Captain Singleton *The Quest for the True Figure of the Earth* Michael Rand Hoare,2017-09-08 In the 1730s two expeditions set out from Paris on extraordinary journeys the first was destined for the equatorial region of Peru the second headed north towards the Arctic Circle Although the eighteenth century witnessed numerous such adventures these expeditions were different Rather than seeking new lands to conquer or mineral wealth to exploit their primary objectives were scientific to determine the Earth's precise shape by measuring the variation of a degree of latitude at points separated as nearly as possible by a whole quadrant of the globe between Equator and North Pole Although such information had consequences for navigation and cartography the motivation was not simply utilitarian Rather it was one theme among many in an intellectual revolution in which advances in mathematics paralleled philosophical strife and reputations of the living and the dead stood to be elevated or destroyed In particular the two expeditions hoped to prove the correctness of Isaac Newton's prediction that the Earth is not a perfect sphere but flattened at the poles In this study the Figure of the Earth controversy is for the first time comprehensively explored in all its several dimensions It shows how a largely neglected episode of European science that produced no spectacular process or artefact beyond a relatively minor improvement in maps nevertheless represents an almost unique combination of theoretical prediction and empirical method It also details the suffering of the two teams of scientists in very different extremes of climate whose sacrifices for the sake of knowledge rather than colonial gain caught the imagination of the literary world of the time Pierre Simon Laplace, 1749-1827 Roger Hahn,2005 Often called the Newton of France Pierre Simon Laplace has been called the greatest scientist of the late 18th and early 19th centuries In this compact biography Hahn illuminates the man in his historical setting This book reflects a lifetime of thinking and research on a singularly important figure in the annals of Enlightenment science
