Ancient History from Below Cyril Courrier, Julio Cesar Magalhães de Oliveira, 2021-09-30 If ancient history is particularly susceptible to a top down approach due to the nature of our evidence and its traditional exploitation by modern scholars another ancient history from below is actually possible This volume examines the possibilities and challenges involved in writing it Despite undeniable advances in recent decades our slowness to reconstruct plausible visions of almost any aspect of society beyond the top most strata of wealth power or status as Nicholas Purcell has put it remains a persistent feature of the field Therefore this book concerns a historical field and social groups that are still today neglected by modern scholarship However writing ancient history from below means much more than taking into account the anonymous masses the subaltern classes and the non elites Our task is also in the felicitous expression coined by Walter Benjamin to brush history against the grain to rescue the viewpoint of the subordinated the traditions of the oppressed In other words we should understand the bulk of ancient populations in light of their own experience and their own reactions to that experience But how do we do such a history What sources can we use What methods and approaches can we employ What concepts are required to this endeavour The contributions mainly engage with questions of theory and methodology but they also constitute inspiring case studies in their own right ranging from classical Greece to the late antique world This book is aimed not only at readers working on classical Greece republican and imperial Rome and late antiquity but at anyone interested in bottom up history and social and population history in general Although the book is primarily intended for scholars it will also appeal to graduate and undergraduate students of history archaeology and classical studies
