... **Bibliography of Research Studies in Education, 1926/27--** United States. Office of Education. Library Division, 1929 **Nuclear Science Abstracts** , 1973 The Star and Celebrity Confessional Sean Redmond, 2013-10-18 In this book the different manifestations meanings and processes of the star and celebrity confessional will be explored The confessional is taken to be any moment in which a star celebrity or fan engages in revelatory acts that are considered to be authentic heart felt and honest These confessional encounters can take place in an interview through performance and presentation events online and in unscripted encounters A star may break down in tears or reveal a previously unknown truth about their private life However this authenticity is often found to have been manufactured or is timed to occur against a new release or product launch Alternatively the desire to confess may be seen to draw attention to the centrality of pseudo forms of emotion in contemporary culture and the obsessional behaviour it produces In this book authors consider acts of confession by celebrities such as Tom Cruise Michael Jackson Jade Goody Britney Spears Sarah Jessica Parker Tracey Emin and Russell Crowe **A Reference Guide for English Studies** Michael J. Marcuse, 2023-11-15 **The International Relations of Sub-Saharan Africa** Ian Taylor, 2010-04-01 This title examines Sub Saharan Africa s relations with states such as the US India China the EU and Britain as well as with non state actors The International Relations of Sub Saharan Africa is an in depth examination Africa s place in global politics The book provides a comprehensive and critical appraisal of the ways in which peace prosperity and democracy are being advanced or restricted by the activities of the great powers in Africa including non state actors as well as who benefits from these policies and who does not The book is a needed comparative study of the role of great powers and new actors such as China and India in Africa within the wider context of neo liberal hegemony It fills a gap in the literature and will be of interest to any student of the continent Its focus on external actors contributes to providing a fuller picture of Africa s place in the global political economy and how the continent interacts with the rest of the world This is an essential work for anyone researching issues in international relations comparative foreign policies and African politics **Econometric Business Cycle Research** Jan Jacobs, 2012-12-06 Econometric Business Cycle Research deals with econometric business cycle research EBCR a term introduced by the Nobel laureate Jan Tinbergen for his econometric method of testing economic business cycle theories EBCR combines economic theory and measurement in the study of business cycles i e ups and downs in overall economic activity We assess four methods of EBCR business cycle indicators simultaneous equations models vector autoregressive systems and real business indicators After a sketch of the history of the methods we investigate whether the methods meet the goals of EBCR the three traditional ones description forecasting and policy evaluation and the one Tinbergen introduced the implementation testing of business cycles The first three EBCR methods are illustrated for the Netherlands a typical example of a small open economy The main conclusion of the book is that simultaneous equation models are the best vehicle for EBCR if all its goals are to be attained simultaneously

This conclusion is based on a fairly detailed assessment of the methods and is not over turned in the empirical illustrations. The main conclusion does not imply the end of other EBCR methods. Not all goals have to be met with a single vehicle; other methods might serve the purpose equally well or even better. For example, if one is interested in business cycle forecasts, one might prefer a business cycle indicator or vector autoregressive system. A second conclusion is that many ideas/concepts that play an important role in current discussions about econometric methodology in general and EBCR in particular were put forward in the 1930s and 1940s. A third conclusion is that it is difficult if not impossible to compare the outcomes of RBC models to outcomes of the other three methods because RBC modellers are not interested in modelling business cycles on an observation per observation basis. A more general conclusion in this respect is that methods should adopt the same concept of business cycles to make them comparable.

Ultimate Realities Robert C. Neville, 2001-01-01 Explores ultimate realities in a range of world religions and discusses the issue and philosophical implications of comparison itself.

Literary Research and the American Modernist Era Robert N. Matuozzi, Elizabeth B. Lindsay, 2008-07-31 Characterized by its move away from Romanticism and toward mundane every day subjects as well as incorporating such ideas as metanarrative stream of consciousness and disjointed timelines, the American Modernist Era was at its heyday during the years 1914-1949. It produced such great authors as Ernest Hemingway, William Faulkner, and F. Scott Fitzgerald, and memorable works like *As I Lay Dying* and *The Great Gatsby*. *Literary Research and the American Modernist Era* offers the scholar and researcher a clear introduction to the best contemporary library resources and practices for researching American modernist writing. Graduate students, advanced undergraduates, researchers, and scholars specializing in American modernist writing will improve their information skills and fluency, whether in the real or the virtual library. Even those lacking access to some of the resources described here can profit from this overview of literary research because it will help them frame questions, indicate where to go for answers, and demonstrate useful connections between many of the secondary scholarly sources. This guide offers a coherent account of how contemporary research skills and resources can complement one another in helping the scholar effectively deal with typical challenges they encounter in their work.

Literary Research and the American Realism and Naturalism Period Linda L. Stein, Peter J. Lehu, 2008-12-12 The American Realism and Naturalism literary period lasted from roughly 1861 to 1914. It was characterized by its response to the political, economic, and technological changes that transformed the nation during the Civil War and postbellum years. Some of the most well-known authors in American history wrote during this time, including Mark Twain, Henry James, Edith Wharton, Charles W. Chesnutt, and Upton Sinclair. *Literary Research and the American Realism and Naturalism Period: Strategies and Sources* will help those interested in researching this era. Authors Linda L. Stein and Peter J. Lehu emphasize research methodology and outline the best practices for the research process, paying attention to the unique challenges inherent in conducting studies of national literature. Each chapter covers a different type of resource: general and literary reference books, library catalogs, print, and online.
