*The Forest in Medieval German Literature* Albrecht Classen, 2015-06-03 By pursuing an ecocritical reading *The Forest in Medieval German Literature* examines passages in medieval German texts where protagonists operated in the forest and found themselves either in conflictual situations or in refuge By probing the way the individual authors dealt with the forest illustrating how their characters fared in this sylvan space the role of the forest proved to be of supreme importance in understanding the fundamental relationship between humans and nature The medieval forest almost always introduced an epistemological challenge how to cope in life or how to find one's way in this natural maze By approaching these narratives through modern ecocritical issues that are paired with premodern perspectives we gain a solid and far reaching understanding of how medieval concepts can aid in a better understanding of human society and nature in its historical context This book revisits some of the best and lesser known examples of medieval German literature and the critical approach used here will allow us to recognize the importance of medieval literature for a profound reassessment of our modern existence with respect to our own forests

*Women, Activism and Social Change* Maja Mikula, 2006-01-16

Throughout history women have participated in and sometimes initiated rebellions to defend the welfare of their family community class race or ethnic group This volume presents original research on women's activism in Asia Europe Australia and Latin America It explores how women have advanced social change and their influence on and response to existing transformations in society Using an interdisciplinary approach the authors examine women's activities and conditions in diverse social and political contexts from revolutionary societies to status quo societies to societies in decline With its primary focus on agency and social change this book deconstructs patriarchal discourses and unearths aspects of female agency in an array of cultural historical and geopolitical contexts Chapters on movements in China Japan Australia Croatia Russia and a range of other countries both contribute to our understanding of change in those societies and seek to locate women at the center of politically aware movements Although not exclusively a book about feminist activism this essential collection is motivated by the feminist desire to restore to history a range of women's experiences This book introduces new ways of thinking across boundaries identities and complexities in a still essentially patriarchal world It will be of great interest to students and researchers in the fields of gender studies activism and comparative politics

**History of German Literature** Helen Watanabe-O'Kelly, 2000-06-12 This is the first book to describe German literary history up to the unification of Germany in 1990 It takes a fresh look at the main authors and movements and also asks what Germans in a given period were actually reading and writing what they would have seen at the local theatre or found in the

local lending library it includes for example discussions of literature in Latin as well as in German eighteenth century letters and popular novels Nazi literature and radio plays and modern Swiss and Austrian literature A new prominence is given to writing by women Contributors all leading scholars in their field have re examined standard judgements in writing a history for our own times The book is designed for the general reader as well as the advanced student titles and quotations are translated and there is a comprehensive bibliography *Bulletin* University of Minnesota,1925 **The Reception of Classical German Literature in England, 1760-1860, Volume 9** John Boening,2020-02-11 The extensive scope of this collection means that this documentary record of the reception of German literature in England is a valuable scholarly resource One of the most important features of British literary and intellectual history over the past 250 years is the influence of German literature From the second half of the 18th Century through the first decades of the 19th German books and ideas attracted then gained the attention of a nation Despite the acknowledged importance of the influence on writers such as Coleridge and Carlyle the subject though often alluded to was rarely studied This collection provides a guidebook through the masses of periodical and allows the English side of the Anglo German literary relationship to be explored in detail In order to make the collection useful to scholars with a wide range of interest it has been divided into three parts Part 1 is a chronological presentation of commentary on German literature in general It also contains collective reviews of multiple German authors notices of important anthologies and reactions to influential works about Germany and its culture Part 2 collects reviews of 18th Century individual German authors and Part 3 is devoted to the English reception of Goethe and Schiller Parts 2 3 contain cross references to the collective reviews of Part 1 Containing over 200 British serials and articles and reviews from all the major English literary periodicals the collection also includes a broad sampling of opinion from the more general magazines including some popular religious publications *Catalogue of the University of Michigan* University of Michigan,1935 Announcements for the following year included in some vols *German Literature in a New Century* Katharina Gerstenberger,Patricia Herminhouse,2008 While the first decade after the fall of the Berlin wall was marked by the challenges of unification and the often difficult process of reconciling East and West German experiences many Germans expected that the new century would achieve normalization The essays in this volume take a closer look at Germany's new normalcy and argue for a more nuanced picture that considers the ruptures as well as the continuities Germany's new generation of writers is more diverse than ever before and their texts often not only speak of a Germany that is multicultural but also take a more playful attitude toward notions of identity Written with an eye toward similar and dissimilar developments and traditions on both sides of the Atlantic this volume balances overviews of significant trends in present day cultural life with illustrative analyses of individual writers and texts **Research in Education** ,1971

**German Literature as a Transnational Field of Production, 1848-1919** Lynne Tatlock,Kurt Beals,2023 A collection of new essays bringing into view the push and pull of the national and the international in the German language cultural field

of the period The cultural formations of the so called Age of Nationalism 1848 1919 have shaped German language literary studies to the present day for better or worse Literary histories German self representations the view from abroad all of these perspectives offer images of a culture ever more concerned with formulating a coherent nationally focused idea of its origins history and cultural community But even in this historical moment the German speaking territories were not culturally self contained international forces always played a significant role in the constitution of the so called German literary and cultural field This volume rethinks the historical period with fourteen case studies that bring into view the push and pull of the national and international in Germany Austria and Switzerland undertaking a reframing of literary cultural history that recognizes the interrelatedness of literatures and cultures across political and linguistic boundaries Viewing even overtly national literary and cultural projects as belonging to an international system these case studies examine the interrelations organization and positioning of the agents forces enterprises and processes that constituted the German language literary cultural field locating these ostensibly national developments within an inter or even anti national context *List of Books*

Monika Fludernik, Marie-Laure Ryan, 2019-12-16 The study of narrative the object of the rapidly growing discipline of narratology has been traditionally concerned with the fictional narratives of literature such as novels or short stories But narrative is a transdisciplinary and transmedial concept whose manifestations encompass both the fictional and the factual In this volume which provides a companion piece to Tobias Klauk and Tilmann Kppe s *Fiktionalit t Ein interdisziplin res Handbuch* the use of narrative to convey true and reliable information is systematically explored across media cultures and disciplines as well as in its narratological stylistic philosophical and rhetorical dimensions At a time when the notion of truth has come under attack it is imperative to reaffirm the commitment to facts of certain types of narrative and to examine critically the foundations of this commitment But because it takes a background for a figure to emerge clearly this book will also explore nonfactual types of narratives thereby providing insights into the nature of narrative fiction that could not be reached from the narrowly literary perspective of early narratology

**The Peoples of Pennsylvania** David E. Washburn, 1981 **Beethoven in German Politics, 1870-1989** David B. Dennis, 1996-01-01 This absorbing book

chronicles the exploitation of Beethoven s life and work by German political parties from the founding of the modern nation in 1870 to the peaceful East German Revolution of 1989 David Dennis taps a wealth of new archival resources to examine for the first time how propagandists of every persuasion have transformed Beethoven and his art into powerful and varied national symbols In fascinating detail Dennis introduces many Beethovens each fashioned as part of a process that transformed the composer into the most protean and widely abused cultural political symbol in modern German history David
