Lexicography, Terminology, and Translation Lynne Bowker, 2006-09-28 This volume in honour of Ingrid Meyer is a tribute to her work in the interrelated fields of lexicography terminology and translation One key thing shared by these fields is that they all deal with text Accordingly the essays in this collection are united by the fact that they too are all text based in some way In the majority of essays electronic corpora serve as the textual basis for investigations Chapters focusing on electronic corpora include a description of a tool that can be used to help build specialized corpora in a semi automatic fashion corpus based investigations of terminological knowledge patterns terminological implantation lexicographic information and translation solutions comparisons of corpora to conventional resources such as dictionaries and analyses of corpus processing tools such as translation memory systems In several essays notably those dealing with historical or literary documents the texts in question are specific manuscripts that have been studied with a view to learning more about lexicographic and translation practice The volume is rounded out with a chapter on audiovisual translation that takes a non conventional view of text where text includes film Published in English

Manual of Specialised Lexicography Henning Bergenholtz, Sven Tarp, 1995-07-14 From 1990 1994 the Danish Research Council for the Humanities granted a research project entitled translation of LSP texts which was initially split up into five part projects one of which has been concerned with LSP lexicography The Manual of Specialised Lexicography is one of the results of the research undertaken by this project The primary purpose of the Manual is to contribute towards an improved basis for practical specialised lexicography which has so far had but a small share in the explosive development that has taken place in general language lexicography since the early 1970s One implication of this is that only to a limited extent has it been possible to build upon existing findings The Manual thus has the twofold aim of offering guidance and direction to authors of specialised dictionaries as well as contributing towards the further development of lexicographical theories

Semantics and Lexicography Herbert Ernst Wiegand, 2011-05-02 This volume is a compilation of nine articles translated from German. They deal with those lexicographic texts or text excerpts which have been formulated in order to convey the meaning of a lexical unit to a potential dictionary user who is not familiar with that meaning. The articles not only critically analyze lexicographic practice in particular the so-called lexicographic definitions and the items giving the synonyms in correlation with the examples in the light of different semantic approaches. They also present ways towards a common understanding in the context of lexicographically imparting knowledge of meaning, i.e. on the basis of an actional semantics approach which takes into account results obtained from analyses of everyday dialogs about word meanings. Moreover, they discuss how meaning-conveying texts can serve their purposes in dictionary look-up situations and they lay out all those aspects which are particularly to be taken into consideration in the formulation of lexicographic texts aimed at conveying meaning in dictionaries belonging to different types.

Research on Dictionary Use in the Context of Foreign Language Learning Yukio Tono, 2012-05-10 The purpose of this book is to conceptualise the research on dictionary use within a more general overview of language learning. It brings together some of the findings of studies on dictionary users and uses and shows how research into dictionary use can contribute to the improvement of dictionary design and the clarification of issues in language learning. The book also provides reports on a series of empirical studies on dictionary use in decoding activities, reading comprehension and L2/L1 translation which will shed some light on the nature of the issues discussed throughout the book. The book falls into two parts. Part I: Research on Dictionary Use. State of the Art is as its title suggests a

summary of previous studies to tease out relevant issues in each area of inquiry Part 2 Empirical Studies reports on a series of studies the author has conducted in the past 15 years The first three studies Chapter 5 6 and 7 investigate dictionary use in the broader context of language learning The next four studies Chapter 8 9 10 and 11 report on a series of controlled experiments on the relationship between the macro and microstructure of the dictionary and reference skills Finally the last two chapters Chapter 12 and 13 report the use of learner language data for a better lexicographical output A Changing World of Words Javier E. Díaz Vera, 2002 From the contents Maurizio GOTTI The origin of 17th century canting terms Anne MCDERMOTT Early dictionaries of English and historical corpora in search of hard words Paivi KOIVISTO ALANKO Prototypes in semantic change a diachronic perspective on abstract nouns Manuela ROMANO POZO A morphodynamic interpretation of synonymy and polysemy in Old English **Studies in Lexicography as a Science and as an Art**, 1974

The History of Lexicography Reinhard Hartmann, 1986-01-01 Most dictionaries have forerunners and all have imitators an understanding of the historical foundations of dictionary making is therefore one of the preconditions of further progress in academic lexicography The papers in this volume which were presented at the 1986 Exeter Seminar survey most of the lexicographical traditions in the world some tracing them right back to their beginnings The programme was divided into eight sessions with the following concentrations of topics 1 three classical traditions 2 the early history of European lexicography 3 the beginnings of English lexicography 4 further aspects of English lexicography 5 the background of diverse national developments 6 specific features of national developments 7 pioneers of three genres 8 recent trends in the English dictionary Specialised Dictionaries for Learners Pedro Antonio Fuertes Olivera, 2010 This book defends two main ideas there is a need and a market for better specialised dictionaries for learners we need a sound theoretical framework for coping with known and unknown challenges for example the Internet in the realm of pedagogica *Life and Mortality in Ugaritic* Matthew McAfee, 2019-06-07 While topics such as death funerary cult and the netherworld have received considerable scholarly attention in the context of the Ugaritic textual corpus the related concept of life has been relatively neglected Life and Mortality in Ugaritic takes as its premise that one cannot grasp the significance of mwt to die without first having wrestled with the concept of yy to live In this book Matthew McAfee takes a lexical approach to the study of life and death in the Ugaritic textual corpus He identifies and analyzes the Ugaritic terms most commonly used to talk about life and mortality in order to construct a more representative framework of the ancient perspective on these topics and he concludes by synthesizing the results of this lexical study into a broader literary discussion that considers among other things the implications for our understanding of the first millennium Katumuwa stele from Zincirli McAfee's study complements previous scholarly work in this area which has tended to rely on conceptual and theoretical treatment of mortality and advances the discussion by providing a more focused lexical analysis of the Ugaritic terms in question It will be of interest to Semitic scholars and those who study Ugaritic in particular in addition to students of the culture of the ancient Levant
