Concepts of War, 1650-1900 Paul Schuurman, 2023-02-17 Why do people wage war How can wars be won How has warfare been an engine of change for human civilization for better and for worse In this book Paul Schuurman shows how some of the best Western minds between 1650 and 1900 tried to answer these questions in an epoch when European developments became a matter of global concern In eight wide ranging chapters he discusses the key concepts that philosophers and generals of this era developed to grasp and influence the dramatic phenomenon of war Their concepts remain fresh and relevant down to the present day

The Semiotic Sphere Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to bloom only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the adventure of the search itself

Paradoxes of Religious Toleration in Early Modern Political Thought

John Christian Laursen, Maria Jose Villaverde, 2012-06-21 In today's developed world much of what people believe about religious toleration has evolved from crucial innovations in toleration theory developed in the seventeenth and eighteenth centuries. Thinkers from that period have been rightly celebrated for creating influential liberating concepts and ideas that have enabled many of us to live in peace. However, their work was certainly not perfect. In this enlightening volume John Christian Laursen and Maria Jose Villaverde have gathered contributors to focus on the paradoxes, blindspots, unexpected flaws or ambiguities in early modern toleration theories and practices. Each chapter explores the complexities, complications and inconsistencies that came up in the seventeenth and eighteenth centuries as people grappled with the idea of toleration. In understanding the weaknesses, contradictions and ambivalences in other theories, they hope to provoke thought about the defects in ways of thinking about toleration in order to help in overcoming similar problems in contemporary toleration theories.

The Words of Winston Churchill Jonathan Locke Hart, 2022-09-30 The Words of Winston Churchill, a study that ranges over the course of a rich, controversial and remarkable career, is about the power and art of his language as a writer and speaker. Churchill used words as the greatest of poets and orators do and did so in Parliament and for the people of Britain and the empire in war and peace, facing the changes in the world and resisting Hitler and the Nazis. Drawing on the traditions of poetics, rhetoric and textual commentary, the study concentrates on Churchill's writing and is sensitive to texts and contexts and to the archive. A central matter is Churchill speaking in Parliament and the reception of his speeches there for over six decades, although his work as a writer and a speaker outside the House of Commons is also important. Churchill speaks to the House, the people, Britain, the Empire, the Commonwealth and the world and in crisis defends freedom and democracy.

Sensibility in the Early Modern Era Anik Waldow, 2018-02-02 Sensibility in the Early Modern Era investigates how the early modern characterisation of sensibility as a natural property of the body could give way to complex considerations about the importance of affect in morality. What underlies this understanding of sensibility is the attempt to fuse Lockean sensationism with Scottish sentimentalism. Being able to have experiences of objects in the world is here seen as being grounded in the same principle that also enables us to feel moral sentiments. Moral and epistemic ways of relating to the world thus blend into one another as both can be traced to the same capacity that enables us to affectively respond to stimuli that impinge on our perceptual apparatus. This collection focuses on these connections by offering reflections on the role of sensibility in the early modern attempt to think of the human being as a special kind of sensitive machine and affectively responsive animal. Humans as they are understood in this context relate to themselves by sensing themselves and perpetually refining their intellectual and moral capacities in response to the way the world affects them. Responding to the world here refers to the manner in which both natural and man-made influences impact on our ability to conceptualise the animate and inanimate world and our place within that world. This book was originally published as a special issue of the Intellectual History Review.

The Invention of Free Press Edoardo Tortarolo, 2016-03-09 Tracking the relationship between

the theory of press control and the realities of practicing daily press censorship prior to publication this volume on the suppression of dissent in early modern Europe tackles a topic with many elusive and under researched characteristics Pre publication censorship was common in absolutist regimes in Catholic and Protestant countries alike but how effective it was in practice remains open to debate The Netherlands and England where critical content segued into outright lampoonery were unusual for hard wired press freedoms that arose respectively from a highly competitive publishing industry and highly decentralized political institutions These nations remained extraordinary exceptions to a rule that for example in France did not end until the revolution of 1789 Here the author s European perspective provides a survey of the varying censorship regulations in European nations as well as the shifting meanings of freedom of the press The analysis opens up fascinating insights afforded by careful reading of primary archival sources into the reactions of censors confronted with manuscripts by authors seeking permission to publish Tortarolo sets the opinions on censorship of well known writers including Voltaire and Montesquieu alongside the commentary of anonymous censors allowing us to revisit some common views of eighteenth century history How far did these writers their reasoning stiffened by Enlightenment values promote dissident views of absolutist monarchies in Europe and what insights did governments gain from censors reports into the social tensions brewing under their rule These questions will excite dedicated researchers graduate students and discerning lay readers alike

A History of Western Public Law Bruno Aguilera-Barchet,2014-12-31 The book outlines the historical development of Public Law and the state from ancient times to the modern day offering an account of relevant events in parallel with a general historical background establishing and explaining the relationships between political religious and economic events

The Enlightenment Dan Edelstein,2010-12-15 In this concise bold and innovative book Dan Edelstein offers us an original account of the Enlightenment It convincingly argues that the Enlightenment is above all a narrative about social and cultural changes and that its origins can be found in the Quarrel of the Ancients and the Moderns Therefore by reconsidering the importance of the French esprit philosophique in the European Enlightenment this book will be of considerable importance for every scholar and student interested in this period

Speculative Freemasonry and the Enlightenment R. William Weisberger,2017-09-20 Freemasonry began with stonemasons in the Middle Ages experiencing the decline of cathedral building Some guilds invited honorary memberships to boost their numbers These usually highly educated new members practiced symbolic or speculative Freemasonry The new Masonic lodges and learned societies offered their growing numbers of Protestant Catholic and Jewish members an understanding of deism Newtonian science and representative government and of literature and the fine arts This work describes how Masons on both sides of the Atlantic were mostly either enlighteners political reformers or moderate revolutionaries They offered minimal support to radical revolutionary ideas and leaders

A Bibliography of Hume's Writings and Early Responses James Fieser,2021-04-20 This work is a supplement to the 10 volume series *Early Responses to Hume* which is an edited and annotated collection of eighteenth and nineteenth

century critical reactions to Scottish philosopher David Hume 1711 1776 Both a philosopher and historian he was infamous in his day for his skeptical views on human nature knowledge metaphysics and religion A Critical Bibliography of French Literature V4 18th C , *The Business of Enlightenment* Robert DARNTON, Robert Darnton, 2009-06-30 A major achievement of American scholarship and in the first rank of those which have been transforming our view of French history during the last twenty years New York Review of Books A great book about an even greater book is a rare event in publishing Robert Darnton's history of the Encyclopédie is such an occasion The author explores some fascinating territory in the French genre of *histoire du livre* and at the same time he tracks the diffusion of Enlightenment ideas He is concerned with the form of the thought of the great philosophes as it materialized into books and with the way books were made and distributed in the business of publishing This is cultural history on a broad scale a history of the process of civilization In tracing the publishing story of Diderot's Encyclopédie Darnton uses new sources the papers of eighteenth century publishers that allow him to respond firmly to a set of problems long vexing historians He shows how the material basis of literature and the technology of its production affected the substance and diffusion of ideas He fully explores the workings of the literary market place including the roles of publishers book dealers traveling salesmen and other intermediaries in cultural communication How publishing functioned as a business and how it fit into the political as well as the economic systems of prerevolutionary Europe are set forth The making of books touched on this vast range of activities because books were products of artisanal labor objects of economic exchange vehicles of ideas and elements in political and religious conflict The ways ideas traveled in early modern Europe the level of penetration of Enlightenment ideas in the society of the Old Regime and the connections between the Enlightenment and the French Revolution are brilliantly treated by Darnton In doing so he unearths a double paradox It was the upper orders in society rather than the industrial bourgeoisie or the lower classes that first shook off archaic beliefs and took up Enlightenment ideas And the state which initially had suppressed those ideas ultimately came to favor them Yet at this high point in the diffusion and legitimation of the Enlightenment the French Revolution erupted destroying the social and political order in which the Enlightenment had flourished Never again will the contours of the Enlightenment be drawn without reference to this work Darnton has written an indispensable book for historians of modern Europe *Revolutionary Love in Eighteenth- and Early Nineteenth-Century France* Allan H. Pasco, 2016-12-05 In this innovative study the author carves out a new field a sociology of literature in which he offers insightful commentary about the nexus of literature and society Calling on history sociology and psychology as well as literature as points of reference Allan Pasco examines the conceptual shift in the ideal of love in eighteenth century France Pasco explores the radical though gradual changes that occurred during the Enlightenment with respect to how the emotion of love was viewed Earlier love had been subordinate to the demands of family king and deity passion was dangerous and to be avoided But over time individual happiness became the greatest good and passion the measure of love Authors as diverse as Marivaux Marmontel

Rousseau Bachelard d'Arnaud Pigault Lebrun and Madame de Staël make it clear that the ideal of rapturous love did not live up to its billing it did not last and it brought destructive fantasies an epidemic of disease the scourge of divorce and considerable anguish Still as Pasco points out passion became and remained the ideal and the Romantics were left to plumb its nature **The Publishers' Trade List Annual**, 1976 [The Literature of Satire](#) Charles A. Knight, 2004-02-12 The Literature of Satire is an accessible but sophisticated and wide ranging study of satire from the classics to the present in plays novels and the press as well as in verse In it Charles Knight analyses the rhetorical problems created by satire s complex relations to its community and examines how it exploits the genres it borrows He argues that satire derives from an awareness of the differences between appearance ideas and discourse Knight provides illuminating readings of such satirists familiar and unfamiliar as Horace Lucian Jonson Molière Swift Pope Byron Flaubert Ostrovsky Kundera and Rushdie This broad ranging examination sheds light on the nature and functions of satire as a mode of writing as well as on theoretical approaches to it It will be of interest to scholars interested in literary theory as well as those specifically interested in satire

Samson Raphael Hirsch's Religious Universalism and the German-Jewish Quest for Emancipation Moshe Y. Miller, 2024-02-20 In Samson Raphael Hirsch's Religious Universalism and the German Jewish Quest for Emancipation Moshe Miller argues that nineteenth century German Jews of all persuasions actively sought acceptance within German society and aspired to achieve full emancipation from the many legal strictures on their status as citizens and residents But where non Orthodox Jews sought a large measure of cultural assimilation Orthodox Jews were content with more delimited acculturation However they were no less enthusiastic about achieving emancipation and acceptance in German society There was one issue though which was seen by non Jewish critics of emancipation as a barrier to granting civic rights to Jews namely the alleged tribalism of the Jewish ethic and the supposedly Orthodox notion of Jews as the Chosen People These charges could not go unanswered and in the writings of Rabbi Samson Raphael Hirsch 1808 1888 a leading thinker of the Orthodox camp they did not Hirsch stressed the universalism of the Jewish ethic and the humanistic concern for the welfare of all mankind which he believed was one of the core teachings of Judaism His colleagues in the German Orthodox rabbinate largely concurred with Hirsch's assessment This account places Hirsch's views in their historical context and provides a detailed account of his attitude toward non Jews and the Christianity practiced by the vast majority of nineteenth century Europeans

Orientalism, Masquerade and Mozart's Turkish Music Matthew Head, 2018-12-13 Matthew Head explores the cultural meanings of Mozart's Turkish music in the composer's 18th century context in subsequent discourses of Mozart's significance for Western culture and in today's not entirely post colonial world Unpacking the ideological content of Mozart's numerous representations of Turkey and Turkish music Head locates the composer's exoticisms in shifting power relations between the Austrian and Ottoman Empires and in an emerging orientalist project At the same time Head complicates a presentist post colonial critique by exploring commercial stimuli to Mozart's turquerie and by embedding the composer's

orientalism in practices of self disguise epitomised by masquerade and carnival In this context Mozart s Turkish music offered fleeting liberation from official and proscribed identities of the bourgeois Enlightenment
