A Critical Bibliography of French Literature V4 18th C Supplement Richard A. Brooks, **The Unfinished Enlightenment** Joanna Stalnaker, 2011-05-02 In *The Unfinished Enlightenment* Joanna Stalnaker offers a fresh look at the French Enlightenment by focusing on the era's vast collective attempt to compile an ongoing and provisional description of the world Through a series of readings of natural histories encyclopedias scientific poetry and urban topographies the book uncovers the deep epistemological and literary tensions that made description a central preoccupation for authors such as Buffon Bernardin de Saint Pierre Diderot Delille and Mercier Stalnaker argues that Enlightenment description was the site of competing truth claims that would eventually resolve themselves in the modern polarity between literature and science By the mid nineteenth century the now habitual association between description and the novel was already firmly anchored in French culture but just a century earlier in the diverse network of articles on description in Diderot and d'Alembert's *Encyclopédie* and in the works derived from it there was not a single mention of the novel Instead we find articles on description in natural history geometry belles lettres and poetry Stalnaker builds on the premise that the tendency to view description as the inevitable and subservient partner of narration rather than as a universal tool for making sense of knowledge in all fields has obscured the central place of description in Enlightenment discourse As a result we have neglected some of the most original and experimental works of the eighteenth century

The Problem of the Earth's Shape from Newton to Clairaut John L. Greenberg, 1995-07-28 This book investigates through the problem of the earth's shape part of the development of post Newtonian mechanics by the Parisian scientific community during the first half of the eighteenth century In the Principia Newton first raised the question of the earth's shape John Greenberg shows how continental scholars outside France influenced efforts in Paris to solve the problem and he also demonstrates that Parisian scholars including Bouguer and Fontaine did work that Alexis Claude Clairaut used in developing his mature theory of the earth's shape The evolution of Parisian mechanics proved not to be the replacement of a Cartesian paradigm by a Newtonian one a replacement that might be expected from Thomas Kuhn's formulations about scientific revolutions but a complex process instead involving many areas of research and contributions of different kinds from the entire scientific world Greenberg both explores the myriad of technical problems that underlie the historical development of part of post Newtonian mechanics which have only been rarely analyzed by Western scholars and embeds his technical discussion in a framework that involves social and institutional history politics and biography Instead of focusing exclusively on the historiographical problem Greenberg shows as well that international scientific communication was as much a vital part of the scientific progress of individual nations during the first half of the eighteenth century as it is today

Adelaide and Theodore Gillian Dow, 2016-06-16 Some of the theories Genlis adopts in the education of the eponymous children have their roots in Rousseau's *Emile*. Rousseau's Economic Philosophy Bertil Fridén, 2012-12-06 An increasing body of literature concerns the economics of those highly appreciated qualities of life that are not easily provided by market exchange. Today these problems are visible as never before for example environmental problems. But already at the dawn of industrial society the problem had been observed by Rousseau. His statements on the economy claim to take these problems into account with due importance. In this way his economic philosophy concerns a different domain of the economy from for example Adam Smith's work. Rousseau's philosophy attempts to consider phenomena later labeled information asymmetries and information costs bargaining collective good problems. Some of Rousseau's most puzzling social proposals on theater women music etc can be explained by his well argued conviction that an optimal economy demands a high social morale a communicative morale. He proposes an economic philosophy for the most important properties of richness such as experiencing the unique and being free although dependent on others empowerment. It is for the adult capable of true deliberation not for the trifle of the innocent child. He develops a concept of richness that is close to the Aristotelian capability concept later explored by Amartya Sen. Rousseau's economic philosophy has not been treated in a monograph before. The book should be rewarding to those interested in social theory the history of social and economic thought problems at the margins of market exchange e.g. cultural economics environmental economics students of Rousseau and the thought of the 18th century welfare economic theory in the direction of Arrow or Sen and Pongyi's and others theses about the transition from self-sufficiency to market.
