Studies Voltaire 18th Century Volume 361:

Measure of the Earth Larrie D. Ferreiro, 2011-05-31 Describes the early 18th century expedition of scientists sent by France and Spain to colonial Peru to measure the degree of equatorial latitude which could resolve the debate between whether the earth was spherical or flattened at the poles *The Eighteenth Century*, 1974 **A Critical History of French Children's Literature** Penelope E. Brown, 2008-03-25 These books are the first full length comprehensive study written in English of French children's literature. They provide both an overview of developments from the seventeenth century to the present day and detailed discussion of texts that are representative, innovative or influential best sellers in their own time and beyond. French children's literature is little known in the English speaking world and apart from a small number of writers and texts has been relatively neglected in scholarly studies despite the prominence of the study of children's literature as a discipline. This project is groundbreaking in its coverage of a wide range of genres tracing the evolution of children's books in France from early courtesy books, fables and fairy tales to eighteenth century moral tales and educational drama, nineteenth century novels of domestic realism and adventure stories and contemporary detective fiction and fantasy novels. The discussion traces the relationship between children's literature and social change, revealing the extent to which children's books were informed by pedagogical, moral, religious and political agenda and explores the implications of the dual imperatives of instruction and amusement which have underpinned writing for young readers throughout the centuries.

Imagining Shakespeare's Original Audience, 1660-2000 Bettina Boecker, 2016-04-29 Comparatively little is known about Shakespeare's first audiences. This study argues that the Elizabethan audience is an essential part of Shakespeare as a site of cultural meaning and that the way criticism thinks of early modern theatre-goers is directly related to the way it thinks of and uses the Bard himself. *Studies in Burke and His Time*, 1976 **Thomas Paine** Gregory Claeys, 2020-09-23 This book investigates Thomas Paine's social and political thought in both its British and American moments. It examines the ways in which Paine's ideas were understood. The book restores him to the position his contemporaries accorded him: that of an important writer on politics and society. **The Emergence of Civil Society in the Eighteenth Century** Marvin B. Becker, 1994 Although there were differences in the ways their societies were transformed, eighteenth century England and Scotland provide the clearest expression of the newly emerged civil society. *Ideology and Social Science* B. W. Head, 2012-12-06 This book attempts to present a detailed and critical account of the thought of Antoine Louis Claude Destutt de Tracy, 1754-1836. Major importance has been placed on the analysis of his published writings. Biographical details have been provided only to the extent necessary to elucidate the circumstances of the composition and publication of his writings, in particular the intellectual and political currents in France during the Revolutionary and Napoleonic periods. The book has three main themes. The first is Tracy's philosophy of ideology, which was concerned to clarify concepts and provide guarantees of reliable knowledge. The second is Tracy's attempt to elaborate a science of social organisation, la science

sociale whose objective was to recommend institutions and policies which could maximise social happiness The third theme is Tracy s development of liberal and utilitarian approaches to the fields of politics economics and education This study began life as a doctoral dissertation at the London School of Economics and Political Science I am grateful for the guidance of my supervisor Professor Ken Minogue and for helpful comments from Professor Maurice Cranston Professor Jack Lively and Dr John Hooper Nature and Culture Lester G. Crocker,2019-12-01 Originally published in 1963 Perhaps the most generative ethical question of eighteenth century France was how to live a virtuous and happy life at the same time During the Age of Enlightenment Christianity fell out of vogue as the dominant and authoritative moral code In place of Christianity s emphasis on sin and redemption in light of a supposed afterlife present happiness became recognized as an appropriate end goal among French Enlightenment thinkers French intellectuals struggled to find equilibrium between nature a person s individual goals and needs and culture the political economic and social organization of humans for a collective good Enlightenment discourse generated a unique cultural moment in which thinkers addressed the problems of humans moral coexistence through the dichotomy of nature and culture Lester Crocker addresses these questions in an overview of ethical thought in eighteenth century France Thomas Paine:Soc & Pol Thought Gregory Claeys,2002-09-11 First published in 1989 Routledge is an imprint of Taylor Francis an informa company A Critical Bibliography of French Literature V4 18th C , **The Status of Women in Classical Economic Thought** Robert William Dimand,Chris Nyland,2003-01-01 This book explores how the classical economists explained the status of women in society As the essays show the focus of the classical school was not nearly as limited to the activities of men as conventional wisdom has supposed Chris Nyland from Monash University **Annual review of law and ethics** ,2000 *Before Blackwood's* Alex Benchimol,2015-10-06 This collection of essays is the result of a major conference focusing specifically on the role of Scotland s print culture in shaping the literature and politics of the long eighteenth century In contrast to previous studies this work treats Blackwood s Magazine as the culmination of a long tradition rather than a starting point **A Critical Bibliography of French Literature V4 18th C Supplement** Richard A. Brooks, Life and Religion at Louisbourg, 1713-1758 A. J. B. Johnston,1996 The July 1995 proceedings feature 64 papers presented by cereal chemists geneticists physiologists and researchers working with pre harvest germination sprouting damage and dormancy in order to help growers succeed in harvesting their crops before rain or fog induces pre harvest sprouting and lowers the commercial value of their crops The 1995 program develops more molecular approaches to sprouting problems than in previous years and highlights international developments in gene location plant processes at a molecular level and new technologies to develop more efficient diagnostic and screening tests Lacks an index Distributed by ISBS Annotation copyrighted by Book News Inc Portland OR *Disguised and Overt Spinozism Around 1700* Wiep Van Bunge,W. European Republic of Letters around 1700 A Classical Republican in Eighteenth-Century France Johnson Kent Wright, 1997-06-01 This is an intellectual biography of Gabriel Bonnot de Mably 1709-85 who emerges as a central figure in the history of republican thought in the era of the Enlightenment and the French Revolution This book has two related aims The first is to fill an important gap in historical scholarship Although Mably whose career as a historian and political theorist stretched from 1740 to the eve of the French Revolution clearly played a major role in the intellectual history of his era there has been no study of his life and thought in English for nearly seventy years At the same time the book seeks to advance a novel interpretation of Mably's thought He has most often been portrayed in two sharply contrasted ways either as one of a handful of utopian communists and a precursor of nineteenth century socialism or as a deeply conservative enemy of the Enlightenment This study sets forth a different reading of Mably's thought one that shows him to be a classical republican in the sense this term has acquired in recent years for students of early modern political thought Mably was the author of the most comprehensive and influential body of republican thought produced in eighteenth century France a claim with implications that go beyond the merely biographical These are explored in a final chapter which draws some conclusions about the character of classical republicanism in France and about the French contribution to the republican tradition in Europe

Scripture and Theology Tomas Bokedal, Ludger Jansen, Michael Borowski, 2023-08-21 The academic disciplines of Biblical Studies and Systematic Theology were long closely linked to one another However in the modern period they became gradually separated which led to increasing subject specialization but also to a lamentable lacuna within the various branches of Divinity As the lack of dialogue between Biblical Studies and the various theological disciplines increased a minority group of scholars in the past few decades reacted and sought to re-establish the time honoured bonds between the disciplines The present volume is part of this intellectual response with contributions from scholars of various professional and denominational backgrounds Together the book's 25 chapters seek to reinvigorate the crucial cross disciplinary dialogue involving biblical narrative historical systematic theological and philosophic theological perspectives The book opens the horizon to contemporary research and fills a lamentable research gap with a number of fresh contributions from scholars in the respective sub disciplines

Representing Humanity in the Age of Enlightenment Alexander Cook, 2015-10-06 The Enlightenment era saw European thinkers increasingly concerned with what it meant to be human This collection of essays traces the concept of humanity through revolutionary politics feminist biography portraiture explorer narratives libertine and Orientalist fiction the philosophy of conversation and musicology
