Bibliography of Art and Architecture in the Islamic World (2 Vol. Set) Susan Sinclair,C. H. Bleaney,Pablo García Suárez,2012 Following the tradition and style of the acclaimed Index Islamicus the editors have created this new Bibliography of Art and Architecture in the Islamic World The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011 This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies **Encyclopaedic Visions** Richard Yeo,2001-03-29 The eighteenth century English dictionaries of arts and sciences claimed to contain all knowledge that a person of education should possess These early encyclopaedias responded to

the explosion of information by reducing knowledge to essentials stressing the need for a coherent account of the sciences and for some time excluding biography and history Richard Yeo places these scientific dictionaries in a rich cultural framework of debate that includes the arrangement of knowledge the Republic of Letters the Enlightenment public sphere copyright issues and the specialisation of science He discusses dilemmas involved in the quest for knowledge to be both organised and readily available examining assumptions about the organisation communication and control of knowledge in these works Elegantly illustrated and accessibly written *Encyclopaedic Visions* provides a major contribution to Enlightenment studies and the history of ideas in general *Enlightenment and Secularism* Christopher Nadon,2013-04-18

Enlightenment and Secularism is a collection of twenty eight essays that seek to understand the connection between the European Enlightenment and the emergence of secular societies as well as the character or nature of those societies The contributors are drawn from a variety of disciplines including History Sociology Political Science and Literature Most of the essays focus on a single text from the Enlightenment borrowing or secularizing the format of a sermon on a text and are designed to be of particular use to those teaching and studying the history of the Enlightenment within a liberal arts curriculum *Family Romance of the French Revolution* Lynn Hunt,2013-07-04 This latest work from an author known for

her contributions to the new cultural history is a daring multidisciplinary investigation of the imaginative foundations of modern politics Hunt uses the term Family Romance coined by Freud to describe the fantasy of being freed from one's family and belonging to one of higher social standing in a broader sense to describe the images of the familial order that structured the collective political unconscious In a wide ranging account that uses novels engravings paintings speeches newspaper editorials pornographic writing and revolutionary legislation about the family Hunt shows that the politics of the French Revolution were experienced through the network of the family romance **The Jesuit Suppression in Global Context**

Jeffrey D. Burson,Jonathan Wright,2015-10-29 This volume analyses the causes and consequences of the Jesuit Suppression one of the most dramatic events in eighteenth century history *The Eighteenth-century French Novel* Vivienne Mylne,1970

Early Modern Cultures of Translation Jane Tylus,Karen Newman,2015-08-31 The fourteen essays in *Early Modern Cultures of Translation* present a convincing case for understanding early modernity as a culture of translation *Scientific Institutions and Practice in France and Britain, c.1700-c.1870* Maurice Crosland,2023-05-31 This second collection of studies by Maurice Crosland has as a first theme the differences in the style and organisation of scientific activity in Britain and France in the 18th and early 19th centuries Science was more closely controlled in France notably by the Paris Academy of Sciences and the work of provincial amateurs much less prominent than in Britain The most dramatic change in any branch of science during this period was in chemistry largely through the work of Lavoisier and his colleagues the focus of several articles here and the dominance of this group caused considerable resentment outside France not least by Joseph Priestley The issue of authority in science emerges again within France under the rule of Napoleon in a study of the exceptional power

exercised by the great mathematician Laplace both in theoretical science and in academic politics This exploration of organisation and power is complemented by a comparative study of the practice of early physics and chemistry and their different reliance on laboratories This raises the question of whether chemistry provided a model for later experimental work in other sciences both through the construction of pioneering laboratories and in establishing early schools of research
