Study Guide

What is Accounting and Financial Accounting?

"Accounting" is the recording of business transactions, the preparation of reports summarizing these transactions, and the analyzing of financial information.

The term "financial accounting" refers specifically to the records and related reports that are available to people outside of the company.

The accounting system is based on the concept of "double-entry bookkeeping". This term means that there are always at least two entries for each transaction of a business. This concept is crucial to keeping the accounting equation in balance. It is based on the concept that, for every transaction, there are at least two accounts impacted by that transaction and therefore must be adjusted to correctly state the company's books.
