Study Of Education A Collection Of Inaugural Lectures:

Study of Education Pb Peter Gordon, 2018-10-24 First published in 1980 This collection of inaugural lectures shows clearly the many changes which have influenced the university study of education during the period 1965 to 1978 1 Perhaps the most important has been the expansion in university student numbers which by 1963 was more than double the pre war figure

The Study of Education: The last decade Peter Gordon, 1980 First published in 1980 Routledge is an imprint of Taylor Francis an informa company ~*Theæ study of education* Peter Gordon, **The Study of Education** Peter Gordon, 1980 The inaugural lectures published in this volume reflect the many changes which have taken place in the study of education between the late 1970s and the mid 1980s Changes in society are reflected in the lectures on special needs education and multicultural education and the contributions of educational administration and comparative education as a field of study

Study of Education Pb: A Collection of Inaugural Lectures (Volume 1 and 2). Peter Gordon, 2020

In History and in Education Richard Aldrich, 2014-07-16 This tribute from historian and educationists to the work and influence of Peter Gordon Emeritus Professor at the Institute of Education in London is grouped round the central theme of the educational history of the 19th and 20th centuries **The History of Education** Peter Gordon, R. Szreter, 2012-10-12 This volume deals with the great changes which have taken place in the practice of the history of education in present years It brings together a number of important articles on the subject which are not easily available to the ordinary reader

Education, Religion and Society Dennis Bates, Gloria Durka, Friedrich Schweitzer, 2006 This volume brings together international scholars to honour the contributions of Professor John Hull to the field of religious education and practical theology exploring and discussing the debates and issues of a variety of important themes **Space, Place and Scale in the Study of Education** Lorraine Symaco, Colin Brock, 2017-10-02 The term space is inherently geographical Educational provision and activity takes place within spaces ranging from a room at home or in a school to a campus to an administrative area which could be a state within a country a whole country or a group of countries Such spaces are known as geographical surfaces Within these spaces the process of learning and teaching takes place at particular points that are often nodes in a network which may be formal such as a group of schools or universities or non formal such as in cyberspace Understanding what goes on depends on the scale at which it is observed ranging from individuals to global outreach Altogether this constitutes the geography of educational reality This comprehensive volume includes a theoretical background plus a sample of situations including school level policy and administration inequitable access education hubs and small states It offers an introduction to a relatively neglected member of the family of education foundation disciplines the geography of education This book was originally published as a special issue of Comparative Education Knowledge and the Study of Education Geoff Whitty, John Furlong, 2017-05-08 In the English speaking world university Schools of Education are usually heavily involved in the professional preparation of teachers Yet in England and the USA in particular the role of universities in

teacher education has increasingly seemed under threat as alternative providers of training have come on the scene often with the overt encouragement of governments This book which is based on a project that explored how the study of Education is configured in different countries makes visible the different knowledge traditions that inform university teaching and research in Education around the world The extent to which these are related to the training of teachers is shown to vary historically and comparatively The book consists of a substantial introduction by the editors which identifies 12 major knowledge traditions in the study of education and classifies these as Academic Knowledge Traditions such as Sciences de l'education Practical Knowledge Traditions like that practised in Normal Colleges and Integrated Knowledge Traditions including the currently fashionable concept of Research informed Clinical Practice This introduction is followed by contributions on the nature of Education as a field of study in six countries Australia China France Germany Latvia and the USA authored by established experts from each of those jurisdictions There are also chapters that provide useful conceptual frameworks for understanding the dimensions on which the various traditions in the study of Education differ as well as those that compare the nature of Education along specific dimensions in different countries The book concludes with a discussion in the light of these contributions of future prospects for the field of Education The book will appeal to students teachers and researchers in Education and is intended to encourage less parochial thinking about the nature of Education as a field of international study

The Life and Work of Teachers Christopher Day, Alicia Fernandez, Trond E. Hauge, Jorunn Muller, 2005-06-23 Contributors from around the world tackle the factors that have the greatest impact on creating quality learning opportunities for students namely policy school leadership and teaching teachers lives Drawing on a range of critical conceptual and empirical perspectives the contributions illustrate the extent to which experience can be similar around the world The book sheds much needed light on the effects of mandated change upon school leaders and teachers both nationally and internationally It also demonstrates how teachers have coped or flourished both because and in spite of the changing circumstances they work under

A Guide to Educational Research Peter Gordon, 2014-01-14 This account of development in educational research is intended as a guide to possible research areas both fundamental and policy related for students in colleges and higher education institutions and should also be of interest to those engaged in curriculum planning and administration

A Social History of Educational Studies and Research Gary

McCulloch, Steven Cowan, 2017-07-20 *A Social History of Educational Studies and Research* examines the development of the study of education in the UK in its broader educational social and political context since its early beginnings in the first part of the twentieth century. By providing a historical analysis of the contested growth of the field, this book examines the significant contribution that has been made by institutions of higher education, journals, text books, conferences, centres and academic societies. It discusses the problems and opportunities of the field and its prospects for survival and adaptation to current changes in the decades ahead. The work draws on documentary sources, social network analysis and interviews with leading figures from across the field. This book highlights international influences on the development of educational studies and research in the UK, its role in the growing internationalisation of the field as a whole and also comparisons and contrasts with the nature of the field elsewhere. It relates the development to the wider social, political and economic changes affecting higher education in general and educational studies and research in particular. It addresses the historical development of disciplines in higher education institutions and the nature, extent and limitations of interdisciplinarity. *A Social History of Educational Studies and Research* discusses the problems and opportunities facing the study of education today and its prospects of adapting to changes in the decades ahead. It is a distinctive and original analysis of educational studies and research that provides the first comprehensive study of its type. **Resources in Education**, 1997 **Essays on**

Language in Societal Transformation Tunde Opeibi, Josef Schmied, Tope Omoniyi, Kofo Adediji, 2015-01-30 This paper generally lends support to the arguments advanced by Awonusi (1989, 1990, 2004) and others in favour of an endonormative as opposed to an exonormative standard for English pronunciation in Nigeria. They include the fact that the existing exonormative standard, British Received Pronunciation (RP), has undergone and is still undergoing changes in its homeland and is not homogeneous. The heightened social mobility of today's world perhaps works against the demarcation and homogenization of language varieties and this is all the more true of the varieties or lects that have been proposed for Nigerian English when these are related more or less explicitly to educational attainment. Major attention is given in the paper to a schema of basilect, mesolect and acrolect presented by Ugorji (2010) with a focus on his account of vowels and his presentation of a mechanism derived from optimality theory for evaluating vowels in contention. The basilect and the mesolect are found to be so close to each other that they might be combined. There would then be just two varieties. In contrast, the acrolect is close to British RP, albeit with many variants due to the conflict of two standardising forces, i.e. British RP and the basilect/mesolect. The vowel system of an officially adopted endonormative standard Nigerian RP would mainly be the same as that of British RP, but the optimality mechanism could be employed to give preference to some of the Nigerian variants for inclusion in it.
