Maya Palaces and Elite Residences Jessica Joyce Christie, 2010-01-01 Maya palaces have intrigued students of this ancient Mesoamerican culture since the early twentieth century when scholars first applied the term palace to multi room gallery like buildings set on low platforms in the centers of Maya cities Who lived in these palaces What types of ceremonial and residential activities took place there How do the physical forms and spatial arrangement of the buildings embody Maya concepts of social organization and cosmology This book brings together state of the art data and analysis regarding the occupants ritual and residential uses and social and cosmological meanings of Maya palaces and elite residences A multidisciplinary team of senior researchers reports on sites in Belize Blue Creek Western Honduras Copan the Peten Tikal Dos Pilas Aguateca and the Yucatan Uxmal Chichen Itza Dzibilchaltun Yaxuna Archaeologist contributors discuss the form of palace buildings and associated artifacts their location within the city and how some palaces related to landscape features Their approach is complemented by art historical analyses of architectural sculpture epigraphy and ethnography Jessica Joyce Christie concludes the volume by identifying patterns and commonalties that apply not only to the cited examples but also to Maya architecture in general

Engaging Ancient Maya Sculpture at Piedras Negras, Guatemala Megan E. O'Neil, 2014-02-25 Now shrouded in Guatemalan jungle the ancient Maya city of Piedras Negras flourished between the sixth and ninth centuries when its rulers erected monumental limestone sculptures carved with hieroglyphic texts and images of themselves and family members advisers and captives In Engaging Ancient Maya Sculpture at Piedras Negras Guatemala Megan E O Neil offers new ways to understand these stelae altars and panels by exploring how ancient Maya people interacted with them These monuments considered sacred were one of the community's important forms of cultural and religious expression Stelae may have held the essence of rulers they commemorated and the objects remained loci for reverence of those rulers after they died Using a variety of evidence O Neil examines how the forms compositions and contexts of the sculptures invited people to engage with them and the figures they embodied looks at these monuments not as inert bearers of images but as palpable presences that existed in real space at specific historical moments Her analysis brings to the fore the material and affective force of these powerful objects that were seen touched and manipulated in the past O Neil investigates the monuments not only at the moment of their creation but also in later years and shows how they changed over time She argues that the relationships among sculptures of different generations were performed in processions through which ancient Maya people integrated historical dialogues and ancestral commemoration

into the landscape With the help of more than 160 illustrations O Neil reveals these sculptures continuing life histories which in the past century have included their fragmentation and transformation into commodities sold on the international art market Shedding light on modern day transposition and display of these ancient monuments O Neil s study contributes to ongoing discussions of cultural patrimony

Maya Imagery, Architecture, and Activity Kaylee R. Spencer, Maline D. Werness-Rude, 2015-05-01 Maya Imagery Architecture and Activity privileges art historical perspectives in addressing the ways the ancient Maya organized manipulated created interacted with and conceived of the world around them The Maya provide a particularly strong example of the ways in which the built and imaged environment are intentionally oriented relative to political religious economic and other spatial constructs In examining space the contributors of this volume demonstrate the core interrelationships inherent in a wide variety of places and spaces both concrete and abstract They explore the links between spatial order and cosmic order and the possibility that such connections have sociopolitical consequences This book will prove useful not just to Mayanists but to art historians in other fields and scholars from a variety of disciplines including anthropology archaeology geography and landscape architecture

Ritual and Power in Stone Julia Guernsey, 2010-01-01 The ancient Mesoamerican city of Izapa in Chiapas Mexico is renowned for its extensive collection of elaborate stone stelae and altars which were carved during the Late Preclassic period 300 BC AD 250 Many of these monuments depict kings garbed in the costume and persona of a bird a well known avian deity who had great significance for the Maya and other cultures in adjacent regions This Izapan style of carving and kingly representation appears at numerous sites across the Pacific slope and piedmont of Mexico and Guatemala making it possible to trace political and economic corridors of communication during the Late Preclassic period In this book Julia Guernsey offers a masterful art historical analysis of the Izapan style monuments and their integral role in developing and communicating the institution of divine kingship She looks specifically at how rulers expressed political authority by erecting monuments that recorded their performance of rituals in which they communicated with the supernatural realm in the persona of the avian deity She also considers how rulers used the monuments to structure their built environment and create spaces for ritual and politically charged performances Setting her discussion in a broader context Guernsey also considers how the Izapan style monuments helped to motivate and structure some of the dramatic pan regional developments of the Late Preclassic period including the forging of a codified language of divine kingship This pioneering investigation which links monumental art to the matrices of political economic and supernatural exchange offers an important new understanding of a region time period and group of monuments that played a key role in the history of Mesoamerica and continue to intrigue scholars within the field of Mesoamerican studies

Maya Gods of War Karen Bassie-Sweet, 2021-06-01 Numerous archaeological projects have found substantial evidence of the

military nature of Maya society and warfare is a frequent theme of Maya art. *Maya Gods of War* investigates the Classic period Maya gods who were associated with weapons of war and the flint and obsidian from which those weapons were made. Author Karen Bassie Sweet traces the semantic markers used to distinguish flint from other types of stone, surveys various types of Chaahk thunderbolt deities and their relationship to flint weapons, and explores the connection between lightning and the ruling elite. Additional chapters review these fire and solar deities and their roles in Maya warfare and examine the nature and manifestations of the Central Mexican thunderbolt god Tlaloc, his incorporation into the Maya pantheon, and his identification with meteors and obsidian weapons. Finally, Bassie Sweet addresses the characteristics of the deity God L, his role as an obsidian merchant god, and his close association with the ancient land route between the highland Guatemalan obsidian sources and the lowlands. Through analysis of the nature of the Teotihuacan deities and exploration of the ways in which these gods were introduced into the Maya region and incorporated into the Maya worldview, *Maya Gods of War* offers new insights into the relationship between warfare and religious beliefs in Mesoamerica. This significant work will be of interest to scholars of Maya religion and iconography.
