Topics include among others: category formation, comparison, ethnophilosophy, hermeneutics, methodology, myth, phenomenology, philosophy of science, scientific atheism, structuralism and theories of religion. From time to time the series publishes volumes that map the state of the art and the history of the discipline. **The Study of Religion and its Meaning** J.E. Barnhart, 2011-11-21 Since its founding by Jacques Waardenburg in 1971 *Religion and Reason* has been a leading forum for contributions on theories, theoretical issues and agendas related to the phenomenon and the study of religion. Topics include among others: category formation, comparison, ethnophilosophy, hermeneutics, methodology, myth, phenomenology, philosophy of science, scientific atheism, structuralism and theories of religion. From time to time the series publishes volumes that map the state of the art and the history of the discipline. *Introduction to the Study of Religion* Hillary P. Rodrigues, John S. Harding, 2008-08-20 Why do people study religion? How have they studied it in the past? How do we study religion today? Is the academic study of religion the same as religious education? These and many other questions are addressed in this engaging introduction to the discipline of religious studies, written by two experienced university teachers. The authors have crafted this book to familiarize novice students with key concepts and terminology in the study of religion. More advanced students will find a varied array of theoretical perspectives and methodological approaches to the field. Topics include: definitions of religion, perspectives in the study and teaching of religion, how religion began to be studied, traditional perspectives, philosophical and theological, how people experience religion, perspectives in the study of religious consciousness and perception, phenomenological and psychological, studying religion within communities, social and cultural perspectives, anthropological, sociological, political and economic, judging religion, critical perspectives, feminist approaches, the interaction of popular literature and religion, contextual perspectives, historical and comparative. The book encourages students to think critically about the theories and methods presented. Students will find arguments for the strengths and limitations of these approaches, understand connections among religious studies and other intellectual movements, and develop their own ideas of how they might want to go about the study of religion. Summary boxes, a timeline, a glossary, and other pedagogic aids help students grasp key concepts along with a companion website at [www.sator.com](http://www.sator.com).

*Classical Approaches to the Study of Religion* Jacques Waardenburg, 1999 Originally publ. Mouton 1973 *Religion and Reason* 3. **The Meaning of God in Human Experience** William Ernest Hocking, 2013-10 This is a new release of the original 1924 edition. **Religion in America** Julia Corbett Hemeyer, 2016-02-19 *Religion in America* 7th Edition provides a comprehensive yet concise introduction to the changing religious landscape of the United States. Extensively revised and updated to reflect current events and trends, this new edition continues to engage students in reflection about religious

diversity Julia Corbett Hemeyer presents the study of religion as a tool for developing appreciation of communities of faith other than one's own and for understanding the dynamics at work in religion in the United States today

**The World and Its Meaning** George Thomas White Patrick, 1924

Rudolf Otto and the Foundation of the History of Religions Yoshitsugu Sawai, 2022-02-10 This book provides an up to date treatment of Rudolf Otto and his work placing him in the context of comparative religion theology and the philosophy of religion Yoshitsugu Sawai shows how Otto has three faces the Lutheran Theologian the Philosopher of Religion and the Comparative Religionist The book also shows how of these Otto saw himself primarily as a Lutheran Theologian and provides an account of Otto's engagement with India and the centrality that Hindu theology had on his thinking In Otto's theory of religion his well known concepts including wholly other and numinous constitute a multiple structure of meaning For example his concept of the wholly other *das ganz Andere* no doubt has the meaning of God in his Christian theological studies At the same time however from the perspective of comparative religion or the phenomenology of religion this same term semantically implies the ultimate reality of other religious traditions Brahman and God Isvara in Hindu religious tradition as well as God in Christianity

*The Science of Religion: A Defence* Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies The Science of Religion A Defence offers a brilliant overview of Professor Wiebe's contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why reductionism in the academic study of religion when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by Anthony J Palma and an accompanying reply by Donald Wiebe The Science of Religion A Defence is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion

The Study of Religion in an Age of Global Dialogue Leonard J. Swidler, Paul Mojzes, 2000 Religion is the most fundamental comprehensive of all human activities it tries to make sense out of not simply one or another aspect of human life but of all aspects of human experience At the core of every civilization lies its religion which both reflects and shapes it Thus if we wish to understand human life in general and our specific culture and history we need to understand religion What is religion Religion is an explanation of the ultimate meaning of life and how to live accordingly based on a notion of the Transcendent Normally it contains the four C s Creed Code Cult Community structure CREED refers To The cognitive aspect of a religion it is everything that goes into the explanation of the ultimate meaning of life CODE OF BEHAVIOR or ethics includes all the rules and customs of action that somehow follow from one aspect or another of the Creed CULT means all the ritual activities that relate the follower to one aspect or another of the Transcendent either directly or indirectly prayer being an example of the former and certain formal behavior toward representatives of the Transcendent such as priests of the latter COMMUNITY STRUCTURE refers To The relationships among the followers this can vary widely from a very egalitarian relationship As among Quakers through a republican structure as Presbyterians have To a monarchical one As with some Hasidic Jews have with their Rebbe THE TRANSCENDENT As the roots of the word indicate means that which goes beyond the everyday The ordinary The surface experience of reality it can mean spirits gods a Personal God An Impersonal God Emptiness etc This volume looks at the ways we humans have developed to study religion However a new age in human consciousness is now dawning The Age of Global Dialogue a radically new consciousness which fundamentally shifts the ways we understand everything in life including religion This global dialogical way of understanding life does not lead to one global religion but it does lead toward a consciously acknowledged common set of ethical principles a Global Ethic The book looks at these two movements the Age of Global Dialogue and inchoative Global Ethic in order to help readers understand what is going on around them So they might

make informed intelligent decisions about the meaning of life and how to live it Author note Leonard Swidler is Professor of Religion at Temple University Paul Mojzesis Academic Dean and Professor of Religious Studies at Rosemount College

Guide to the Study of Religion Willi Braun, Russell T. McCutcheon, 2000 What is religion Can it be defined at all Or is it too easily defined in far too many ways so as to make a religion a drifting signifier or whatever one's pleasure is Does the study of religion require special perhaps religious tools of analysis and explanation What is the difference between a knowledge of religion derived from practicing it and a knowledge about religion derived from nonreligious modes of inquiry Sooner or later any serious student of religion must face these questions if religious practices are to be investigated in the light of the terms and aims of the social and human sciences in the modern university The Guide to the Study of Religion provides a map of the key concepts and thought structures for imagining and studying religion as a class of everyday social practices that lend themselves to no more or less difficult explanation than any other class of social phenomena **The Sociology of Religion** George Lundskow, 2008-06-10 Most Sociology of Religion texts are decidedly staid and uninteresting covering contemporary developments which are only contemporary only from a disciplinary perspective They are not contemporary if viewed from the perspective of the religion's practitioners in religious and non religious settings The textbooks that attempt to be interesting to undergraduate students often fall short because they either try to cover too much in an encyclopedic format or sacrifice a sociological perspective for a personal one Many use real life examples only superficially to illustrate concepts Lundskow's approach is the opposite students will learn the facts of religion in its great diversity all the most interesting and compelling beliefs and practices and then learn relevant concepts that can be used to explain empirical observations The book thus follows the logic of actual research investigate and then analyze rather than approaching concepts with no real bearing on how religion is experienced in society This approach using provocative examples and with an eye toward the historical and theoretical not to mention global experience of religion will make this book a success in the classroom The author envisions a substantive approach that examines religion as it actually exists in all its forms including belief ritual daily living identity institutions social movements social control and social change Within these broad categories the book will devote particular chapters to important historical moments and movements leaders and various individual religions that have shaped the contemporary form and effect of religion in the world today The Expository Times, 1907 **Classical Approaches to the Study of Religion: Introduction and anthology** Jean Jacques Waardenburg, 1973 **The Expository Times** James Hastings, Ann Wilson Hastings, Edward Hastings, 1907 **The Meaning of Life** John A. Mackay, 2014-03-06 Democratic principles have not taken root readily in Latin America in part because spiritual inwardness a necessary prerequisite of democracy that is inseparable from the Bible has been lacking During the twentieth century Protestant workers like John Mackay 1889 1983 brought the evangelical message to that continent through lectures and writings This collection of John Mackay's early essays presents a range of his contributions

and the ideas in the essays are grounded in his clear understanding of the nature and dignity of human beings in the light of God. The fruit of this teaching is self confidence, courage, steadfastness and other positive ethical attributes that accompany progress and success for individuals and peoples. The essays touch on religious, educational, literary, political and philosophical themes in the service of Christian truth. They embody key ideas and strategic judgments related to the presentation of the Evangel, the most basic and first work of the church. The message balances spiritual and social aspects of Christianity to meet the needs of the people and it accompanied progressive social and political changes in the region. The historical experience of Protestantism in Latin America is well worth recalling today by readers in North America and elsewhere.
