Benson,G. Barkhuizen,P. Bodycott,J. Brown,2013-08-15 Study abroad is now both an international industry and an experience that can have a deep impact on students attitudes and approaches to second language learning Narratives of Second Language Identity in Study Abroad brings together three important research areas by exploring the impact of study abroad on second language identities through narrative research It outlines a new model of second language identity that incorporates a range of language and personal competencies The three main dimensions of this model are explored in chapters that begin with students study abroad narratives followed by the authors in depth analysis

Further chapters use narratives to assess the impact of programme type and individual difference. Arguing that second language identity development is one of the more important outcomes of study abroad, the book concludes with recommendations on how study abroad programmes can best achieve this outcome. *Language Learners in Study Abroad Contexts* Margaret A. DuFon, Eton E. Churchill, 2006-01-18. Examining the overseas experience of language learners in diverse contexts through a variety of theoretical and methodological approaches, studies in this volume look at the acquisition of language use, socialization processes, learner motivation, identity, and learning strategies. In this way, the volume offers a privileged window into learner experiences abroad while addressing current concerns central to second language acquisition.

Academic Year Abroad 2002, 2002. **International Service Learning** Robert G. Bringle, Julie A. Hatcher, Steven G. Jones, 2003-07-03. International Service Learning (ISL) borrows from the domains of service learning, study abroad, and international education to create a new pedagogy that adds new and unique value from this combination. It is a high impact pedagogy with the potential to improve students' academic attainment, contribute to their personal growth, and develop global civic outcomes. The international service experience provides opportunities for additional learning goals, activities, and relationships that are not available in a domestic service learning course or in a traditional study abroad course. The service experience develops reflection while shedding light on and providing an added dimension to the curricular component of the study abroad course. The international education component further broadens students' perspectives by providing opportunities to compare and contrast North American and international perspectives on course content. This book focuses on conducting research on ISL, which includes developing and evaluating hypotheses about ISL outcomes and measuring its impact on students, faculty, and communities. The book argues that rigorous research is essential to improving the quality of ISL's implementation and delivery and providing the evidence that will lead to wider support and adoption by the academy, funders, and partners. It is intended for both practitioners and scholars, providing guidance and commentary on good practice. The volume provides a pioneering analysis of and understanding of why and under what conditions ISL is an effective pedagogy. Individual chapters discuss conceptual frameworks, research design issues, and measurement strategies related to student learning outcomes, the importance of ISL course and program design, the need for faculty development activities to familiarize faculty with the component pedagogical strategies, the need for resources and collaboration across campus units to develop institutional capacity for ISL, and the role that community constituencies should assume as co-creators of the curriculum, co-educators in the delivery of the curriculum, and co-investigators in the evaluation of and study of ISL. The contributors demonstrate sensitivity to ethical implications of ISL, to issues of power and privilege, to the integrity of partnerships, to reflection, reciprocity, and community benefits. Social and Cultural Aspects of Language Learning in Study Abroad Celeste Kinginger, 2013-07-31. The papers in this volume offer a sampling of contemporary efforts to update the portrayal of study abroad in the applied linguistics literature through attention to its social and cultural aspects. The volume

illustrates diversification of theory and method refinement of approaches to social interactive language use and expansion in the range of populations and languages under scrutiny Part I offers a topical orientation outlining the rationale for the project Part II presents six qualitative case studies adopting sociocultural activity theoretical poststructuralist or discourse analytic methodologies The four chapters in Part III illustrate a variety of approaches and foci in research on the pragmatic capabilities of study abroad participants in relation to second language identities The volume will be of interest to a broad audience of applied linguistics researchers language educators and professionals engaged in the design oversight and assessment of study abroad programs

Reimagining Internationalization and International Initiatives at Historically Black Colleges and Universities Krishna Bista, Anthony L. Pinder, 2022-06-11 This book explores the internationalization policy programs and initiatives at Historically Black Colleges and Universities HBCUs in the United States This book addresses the value and impact of internationalization for all students at HBCUs and beyond Internationalization can be

leveraged as a tool for social justice and diversity thus moving students who are often placed at the periphery of society to the center. It also highlights the tensions between internationalization and institutional policies and priorities while still serving who have been historically marginalized.

From Study Abroad to Education Abroad Senta Goertler, Theresa Schenker, 2021-02-28 Comprehensive and evidence based this book presents the best practices for designing and sustaining study abroad programs to maximize the outcomes and benefits of education abroad for all students. Distilling the history, research and variations of study abroad programs, Goertler and Schenker provide a clear-eyed analysis of the lessons learned and the common obstacles associated with education abroad. Organized in three parts: the state of education abroad in the US; research on education abroad outcomes and best practices; Goertler and Schenker demonstrate the benefits of long-term study abroad for the development of advanced language skills and intercultural competence and the need for diversity in participation. Chapters offer theory-based, practice-proven recommendations to invigorate, innovate and implement successful study abroad programs that are sustainable and ethically engage with the local community. The authors discuss design features to maximize language proficiency and intercultural competence. Grounded in up-to-date research and theory, the book responds to the challenges associated with long-term education abroad programs and provides recommendations on reinvigorating long-term programs and diversifying participation in education abroad. *From Study Abroad to Education Abroad* is vital reading for academics, researchers and students in the fields of language education and education policy as well as practitioners such as language program coordinators and education abroad administrators.

Chinese Industrial Espionage William C. Hannas, James Mulvenon, Anna B. Puglisi, 2013-06-14 This new book is the first full account inside or outside government of China's efforts to acquire foreign technology. Based on primary sources and meticulously researched, the book lays bare China's efforts to prosper technologically through others' achievements. For decades, China has operated an elaborate system to spot foreign technologies, acquire them by all conceivable means and convert them into weapons and competitive goods without compensating the owners. The director of the US National Security Agency recently called it the greatest transfer of wealth in history. Written by two of America's leading government analysts and an expert on Chinese cyber networks, this book describes these transfer processes comprehensively and in detail, providing the breadth and depth missing in other works. Drawing upon previously unexploited Chinese language sources, the authors begin by placing the new research within historical context before examining the People's Republic of China's policy support for economic espionage, clandestine technology transfers, theft through cyberspace and its impact on the future of the US. This book will be of much interest to students of Chinese politics, Asian security studies, US defence, US foreign policy and IR in general.

Dominant Beliefs and Alternative Voices Joan Elias Gore, 2017-09-25 This book examines why study abroad is a marginal activity in American higher education and evaluates the role gender has played in the development and maintenance of this marginality.

The State of Global Education Brad Maguth, Jeremy Hilburn, 2015-04-10 A battle is being waged in classrooms and

capitals around the world over the goals and objectives of the future of global education While there is growing research in the area of global education much remains to be uncovered challenged and learned through sound empirical research and conceptual explorations What type of global citizens will schools promote What types of policies programs and instructional practices best promote effective global citizenship Will global education curricula advance an unwavering loyalty to neoliberal ideologies and interests over the strengthening of human rights and the environmental health of our planet This volume presents a series of research studies and innovative instructional practices centered on advancing global learning opportunities and literacies The authors in this volume initiate a much needed conversation on ways students in multiple contexts can and should learn with the world and its people Part I addresses global education in theory with a particular focus on development intercultural competence and global citizenship Part II addresses educational programs and practices that foster global learning and action to help build a better future for all citizens of our planet including experiential education university initiatives and conceptual approaches to teaching and learning This scholarship spans four continents in a multitude of educational contexts primary secondary and tertiary each with a focus on a different dimension of the possibilities and pitfalls in teaching about and with the world and its people Education in Rwanda ,2004 Ten years after the 1994 genocide in which an estimated 10 percent of the country s population perished Rwanda s devastated education system is now back on its feet Classrooms have been repaired and new ones built teachers who fled the mayhem have been reintegrated into the teaching force arrears in teacher pay have been cleared up a Genocide Fund has been created specifically to assist orphans and in higher education the system has been diversified and new arrangements for student finance have been introduced This success notwithstanding the task of transforming the rapid recovery into sustained progress over time has only just begun A priority will be to ensure that all Rwandan children can complete a full course of primary schooling of reasonable quality and that expansion at the post primary levels occurs at a pace commensurate with the labor market s capacity to absorb highly educated job seekers Achieving this will present tough tradeoffs in financing and service delivery including combining increased funding for primary education with greater reliance on private financing at other levels sharper targeting of public subsidies for education and tighter management of classroom processes to improve student flow and student learning throughout the system Education in Rwanda explores the challenges of sustaining educational progress in a fiscally viable fashion as the country makes the transition from post conflict recovery to long term development
