

A Guide for Writing Research Papers based on Styles Recommended by The American Psychological Association

The purpose of this document is to provide a common core of elements of APA style that all members of an academic department can adopt as minimal standards for any assignment that specifies APA style. This Web document is itself *not* a model of APA style. For an example of a complete article formatted according to APA style, go to <http://www.vanguard.edu/uploadedfiles/faculty/ddegetman/prayer.pdf>. For an example of an undergraduate research proposal, go to <http://www.vanguard.edu/uploadedfiles/faculty/ddegetman/psychproposal.pdf>. To download a Microsoft Word template of an APA-style paper, go to <http://www.vanguard.edu/emplibary/files/psychapa.doc>.

I. General Document Guidelines

- A. **Margins:** One inch on all sides (top, bottom, left, right)
- B. **Font Size and Type:** 12-pt. font (Times Roman or Courier are acceptable typefaces)
- C. **Spacing:** Double-space throughout the paper, including the title page, abstract, body of the document, references, appendices, footnotes, tables, and figure captions.
- D. **Alignment:** Flush left (creating uneven right margin)
- E. **Paragraph Indentation:** 5-7 spaces
- F. **Page Number:** The page number appears one inch from the right edge of the paper on the first line of every page (except **Figures**), beginning with the title page.
- G. **Manuscript Page Header:** The first two or three words of the paper title appear five spaces to the left of the page number on every page (except **Figures**), beginning with the title page. Manuscript page headers are used to identify manuscript pages during the editorial process. Using most word processors, the manuscript page header and page number can be inserted into a header, which then automatically appears on all pages.
- H. **Active voice:** As a general rule, use the active voice rather than the passive voice. For example, use "We predicted that ..." rather than "It was predicted that ..."
- I. **Order of Pages:** Title Page, Abstract, Body, References, Appendixes, Footnotes, Tables, Figure Captions, Figures

II. Title Page

- A. **Page Number:** The Title Page is page 1.
- B. **Key Elements:** Paper title, author(s), author affiliation(s), and running head.
- C. **Paper Title:** Uppercase and lowercase letters, centered on the page.
- D. **Author(s):** Uppercase and lowercase letters, centered on the line following the title.
- E. **Institutional affiliation:** Uppercase and lowercase letters, centered on the line following the author(s).
- F. **Running head:** The running head is typed flush left (all uppercase) following the words "Running head:" on the line below the manuscript page header. It should not exceed 50 characters, including punctuation and spacing. The running head is a short title that appears at the top of pages of published articles.
- G. **Example of APA-formatted Title Page:**
<http://www.vanguard.edu/psychology/titlepage.pdf>

III. Abstract: The abstract is a one-paragraph, self-contained summary of the most important elements of the paper.

- A. **Page Number:** The abstract begins on a new page (page 2).
- B. **Heading:** Abstract (centered on the first line below the manuscript page header)
- C. **Format:** The abstract (in block format) begins on the line following the Abstract heading. The abstract should not exceed 120 words. All numbers in the abstract (except those beginning a sentence) should be typed as digits rather than words.
- D. **Example of APA-formatted Abstract:**
<http://www.vanguard.edu/psychology/abstract.pdf>

IV. Body

- A. **Page Number:** The body of the paper begins on a new page (page 3). Subsections of the body of the paper do *not* begin on new pages.

Perfect for high school and college students juggling multiple assignments, *The Everything Guide to Writing Research Papers* shows you how to take control of your assignments before they take control of you.

Writing Scientific Research Articles Margaret Cargill, Patrick O'Connor, 2021-06-08 Writing Scientific Research Articles: The new edition of the popular guide for novice and professional scientists alike, providing effective strategies and step-by-step advice for writing scientific papers for publication. For scientists writing a research article for submission to an international peer-reviewed journal, knowing how to write can be as important as knowing what to write. *Writing Scientific Research Articles: Strategy and Steps* provides systematic guidance on writing effective scientific papers with the greatest chance for publication. Using clear language, this highly practical guide shows scientists how to apply their analysis and synthesis skills to produce a compelling research article and increase their competence in written communication of science. The third edition is fully revised to reflect changes in the review process and science journal publication. Incorporating current developments in technology and pedagogical practice, brand new sections cover mapping and planning manuscripts, choosing results, systematic reviews, structured abstracts, and more. Updated material on referee criteria offers valuable insights on what journal editors and referees want to publish and why. Offering a hands-on approach to developing the academic writing skills of scientists in all disciplines and from all language backgrounds, *Writing Scientific Research Articles* provides a genre-based pedagogy and clear processes for writing each section of a manuscript. Across the full range of research article formats and funding applications, it presents tested strategies for responding to referee comments and developing discipline-specific language skills for manuscript writing and polishing. Pairs each learning step with updated practical exercises to develop writing and data presentation skills based on expert analysis of well-written papers, including provided example articles. Includes chapters on the difference between review papers and research papers and on skill development using journal clubs and writing groups. Features a wealth of new information on topics including Open Access publishing, online reviews, and predatory conferences and journals. Designed for

use by individuals as a self study guide or by groups working with an instructor Writing Scientific Research Articles Strategy and Steps is a must have guide for early career researchers with limited writing experience scientists for whom English is an additional language upper level undergraduates and graduate students writing for publication and STEM and English language professionals involved in teaching manuscript writing and publication skills and mentoring students and colleagues
