

FOUNDATION OF EDUCATION

1. What are the major theories and principles in the foundation of education and why are these important in the study of education.

THEORIES AND PRINCIPLE IN THE FOUNDATION OF EDUCATION

Theories in education didn't begin in earnest until the early 20th century, but curiosity about how humans learn dates back to the ancient Greek philosophers Socrates, Plato and Aristotle. They explored whether knowledge and truth could be found within oneself (rationalism) or through external observation (empiricism).

By the 19th century, psychologists began to answer this question with scientific studies. The goal was to understand objectively how people learn and then develop teaching approaches accordingly.

In the 20th century, the debate among educational theorists centered on behaviorist theory versus cognitive psychology. Or, in other words, do people learn by responding to external stimuli or by using their brains to construct knowledge from external data?

Today, much research, study, and debate have given rise to the following five learning theories:

| THEORY | EXPLANATION | APPLICATION |
|----------------|--|---|
| Behaviorism | As Simply Psychology puts it: "Behaviorism is only concerned with <u>observable stimulus-response behaviors</u> , as they can be studied in a systematic and observable manner." | Learning is based on a system of routines that "drill" information into a student's memory bank, as well as positive feedback from teachers and an educational institution itself. If students do an excellent job, they receive positive reinforcement and are signaled out for recognition. |
| Cognitivism | Learning relies on both external factors (like information or data) and the internal thought process. | Developed in the 1950s, this theory moves away from behaviorism to focus on the mind's role in learning. According to the <u>International Bureau of Education</u> : "In cognitive psychology, learning is understood as the acquisition of knowledge: the learner is an information-processor who absorbs information, undertakes cognitive operations on it and stocks it in memory." |
| Constructivism | The learner builds upon his or her previous experience and understanding to "construct" a new understanding. | "The passive view of teaching views the learner as 'an empty vessel' to be filled with knowledge," explains Simply Psychology. "whereas <u>constructivism states that learners construct meaning</u> only through |

Study Of Education Volume 1 Early Modern:

The School of Montaigne in Early Modern Europe Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne's *Essais* and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne's own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the *Essais* to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book's significance in literary and intellectual history Montaigne's is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the *Essais* were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual's judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors Montaigne enfranchised the unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of his era The study draws on new ways of approaching literary history through the history of the book and of reading The *Essais* are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct concept of the social context of a text The concept is derived from anthropologist Alfred Gell's notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people *Resources in Education*, 1997

BRINTON 1 TLBD HSK 34 1 E BOOK **Education, Politics and Religion** James Arthur,Liam Gearon,Alan

Sears,2010-06-28 In recent years a number of popular books have savaged religion arguing it is a dangerous delusion that poisons human societies and relationships This is but the most recent manifestation of a secularising agenda that has been sweeping contemporary democratic societies since the Enlightenment This book pushes back against that agenda examining its key assumptions and arguing that the exclusion of religious people and ideas from education and the public square is both undemocratic and unwise For the most part the book draws arguments and examples from Christianity the religious tradition of the authors but it recognises that many religions share the concerns and possibilities examined The book examines

contemporary expressions of the secularising agenda in Western democracies with particular focus on how that is played out in education It demonstrates how republican theory understood within a faith perspective provides a shared understanding and substantive basis for education within a Western democracy It explores the historical connections and disconnections between religion and civic life in the West from ancient to contemporary times and examines religiously based civic action and pedagogical approaches contending both have the potential to contribute greatly to democracy It will be of value to any who are interested in exploring how democracies can include the voices of all their citizens the religious and the secular

Migration Studies and Colonialism Lucy Mayblin, Joe Turner, 2020-12-03 The history of migration is deeply entangled with colonialism To this day colonial logics continue to shape the dynamics of migration as well as the responses of states to those arriving at their borders And yet migration studies has been surprisingly slow to engage with colonial histories in making sense of migratory phenomena today This book starts from the premise that colonial histories should be central to migration studies and explores what it would mean to really take that seriously To engage with this task Lucy Mayblin and Joe Turner argue that scholars need not forge new theories but must learn from and be inspired by the wealth of literature that already exists across the world Providing a range of inspiring and challenging perspectives on migration the authors aim is to demonstrate what paying attention to colonialism through using the tools offered by postcolonial decolonial and related scholarship can offer those studying international migration today Offering a vital intervention in the field this important book asks scholars and students of migration to explore the histories and continuities of colonialism in order to better understand the present

The Communion of the Book David Williams, 2022-11-15 The modern world was not created by the civilization of Renaissance Italy the advent of the printing press or the marriage restrictions imposed by the medieval church Rather it was widespread reading that brought about most of the cognitive psychological and social changes that we recognize as peculiarly modern David Williams combines book and communications history with readings of major works by Petrarch Bruni Valla Reuchlin Erasmus Foxe and Milton to argue that expanding literacy in the Renaissance was the impetus for modern civilization turning a culture of arid logic and religious ceremonialism into a world of individual readers who discovered a new form of communion in the act of reading It was not the theologians Luther and Calvin who first taught readers to become what they read but the biblical philologist Erasmus who encountered the divine presence on every page of the gospels From this sacramental form of reading came other modes of humanist reading particularly in law history and classics leading to the birth of the nation state As literacy rates rose readers of all backgrounds gained and embodied the distinctly modern values of liberty free speech toleration individualism self determination and democratic institutions Communion and community were linked performed in novel ways through revolutionary forms of reading In this conclusion to a quartet of books on media change Williams makes a compelling case for readers and acts of reading as the true drivers of social political and cultural modernity and for digital media as its looming nemesis
