A Study of History Arnold J. Toynbee, 1947-12-31 Acknowledged as one of the greatest achievements of modern scholarship Arnold Toynbee's *A Study of History* consists of a ten volume analysis of the rise and fall of human civilizations Contained in two volumes D C Somervell's abridgement of this magnificent enterprise preserves the method atmosphere texture and in many instances the very words of the original **A Study of History: Abridgment of volumes VII-X** Arnold Toynbee, 1947 **A Study of History: Abridgement of volumes VII-X** Arnold Toynbee, 1987 *The Laws of History* Graeme Snooks, 2002-09-26 In this unorthodox and trail blazing work Graeme Snooks argues that it is possible to construct a scientific theory of human history but only if we adopt a radically materialist theory of human nature **A Study of History: Abridgement of volumes VII-X** Arnold Toynbee, 1987 Arnold Toynbee's ten volume analysis of the rise and fall of civilizations is acknowledged as one of the great achievements of modern scholarship D C Somervell's extraordinary two volume abridgement has captured the method atmosphere texture and in many instances the very words of the original This volume contains the second half of Toynbee's masterpiece **A Study of History. By Arnold J. Toynbee ... Abridgement of Volumes I-VI (VII-X.) by D.C. Somervell** Royal Institute of International Affairs, David Churchill Somervell, Arnold Toynbee, 1946 **The Sea** Peter N. Miller, 2013-04-24 The Sea brings together a group of noted contributors to evaluate the different ways in which seas have served as subjects in historiography and asks how this has changed and will change the way history is written The essays in this volume provide exemplary demonstrations of how a sea based history writing that focuses on connectivity networks and individuals describes the horizons and the potential of thalassography the study of the world made by individuals embedded in networks of motion As Peter N Miller contends in his introduction writing about the sea today is a way of partaking in the wider historiographical shift toward microhistory exchange relations networks and above all materiality both literally and figuratively The Sea focuses not on questions of discipline and professionalization as much as on the practice of scholarship the writing and therefore the planning and organizing of histories of the sea *Anthropologists and the Rediscovery of America, 1886-1965* John S. Gilkeson, 2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold's the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective [American Ecclesiastical Review](#)
