Stuff Of Sleep And Dreams Experiments In Literary Psychology:

Stuff of Sleep and Dreams Leon Edel, 1982 *Literature, Psychoanalysis and the New Sciences of Mind* Leonard Jackson, 2014-09-11 At a time when psychoanalysis is attacked by biologists psychologists and literary critics alike this book offers a radical defence *Literature Psychoanalysis and the New Sciences of Mind* gives a clear introduction to the theories of Freud and Jung the strange linguistic rewriting of Freud by Jacques Lacan It explores the extraordinary variety of ways in which these writings have been applied to literature and literary theory But for the first time they are put in the context of recent biological theories of mind and sexuality *In Collaboration with British Literary Biography* Jane McVeigh, 2017-10-13 This book is about one person's reading and what has been learnt about how the lives of other people particularly authors have been written in British literary biographies over the last fifty years It is less interested in what happened in the lives of the people described in these biographies and more concerned with how these stories have been told It aims to have a conversation with British biographers particularly Michael Holroyd Richard Holmes Hermione Lee and Claire Tomalin to make their voices heard to set them talking It understands biography as an ongoing collaboration not only between biographers and their subjects but between biographers and their readers This is also a study of haunting in which we haunt the lives of others to help us come to a better understanding of our own Metaphors of Mind in Fiction and Psychology Michael S. Kearns, 2021-10-21 Curiosity about the human mind what it is and how it functions began long before modern psychology But because the mind and its processes are so elusive they could be described only by means of metaphor Michael Kearns in this prize winning study examines the development of metaphors of the mind in psychological writings from Hobbes through William James and in fiction from Defoe through Henry James Throughout the eighteenth century and even into the early nineteenth metaphors of the mind as a relatively simple entity either mechanical or biological dominated both those engaged in psychological theorizing and novelists ranging from Richardson and Smollett through Dickens and the Brontes In the nineteenth century such psychologists as Herbert Spencer and Alexander Bain conceived of the mind as a complex organism quite different from that embodied in earlier thinking but their figurative language did not keep pace The result was a tension between theoretical expression and actual discussion of mental phenomena **The Boilerplate Rhino** David Quammen, 2012-10-23 From one of the most fascinating and thought provoking writers of natural history *The Seattle Times* a collection of enduring essays that form a bestiary of wondrous creatures and a gallery of the human faces that peer at them *The Boilerplate Rhino* brings together twenty six of David Quammen's most thoughtful and engaging essays from his column for *Outside* magazine gifting readers with an irrepressible assortment of ideas to explore conundrums to contemplate and wondrous creatures to behold In lucid penetrating and often quirkily idiosyncratic prose David Quammen takes his readers with him as he explores the world His travels lead him to rattlesnake handlers in Texas a lizard specialist in Baja the dinosaur museum in Jordan Montana and halfway across Indonesia in search of the perfect Durian fruit He ponders the

history of nutmeg in the southern Moluccas meditates on bioluminescent beetles while soaking in the waters of the Amazon and delivers *The Dope on Eggs* from a chicken ranch near his hometown in Montana Quammen's travels are always jumping off points to explore the rich and sometimes horrifying tension between humankind and the natural world in all its complexity and ambivalence *The result* is another irrepressible assortment of ideas to explore conundrums to contemplate and wondrous creatures to behold **Mapping American Culture** Wayne Franklin, Michael C. Steiner, 1992 **Provocations** Cathryn McConaghy, 2006 Textbook **Edith Wharton** Alfred Bendixen, Annette Zilversmit, 2016-08-05 First published in 1992 this volume of essays celebrates the revival of Edith Wharton's critical reputation It offers a variety of approaches to the work of Wharton and examines largely neglected texts It differs from many other collections of Wharton criticism in its insistence that the entire body of Wharton's work deserves attention This book will be of interest in those studying nineteenth century and American literature Walden's Shore Robert M. Thorson, 2014-01-06 *Walden's Shore* explores Thoreau's understanding of the living rock on which life's complexity depends not as metaphor but as physical science Robert Thorson's subject is Thoreau the rock and mineral collector interpreter of landscapes and field scientist whose compass and measuring stick were as important to him as his plant press Nature Writing Don Scheese, 2013-10-28 In this comprehensive study of the genre Don Scheese traces its evolution from the pastoralism evident in the natural history observations of Aristotle and the poetry of Virgil to current American writers He documents the emergence of the modern form of nature writing as a reaction to industrialization Scheese's personal observations of natural settings sharpen the reader's understanding of the dynamics between author and locale His study is further informed by ample use of illustrations and close readings core writers such as Thoreau John Muir and Mary Austin showing how each writer's work exemplifies the pastoral tradition and celebrate a spirit of place in the United States **The Writer's Book of Hope** Ralph Keyes, 2003-10-01 In 1889 the editor of the *San Francisco Examiner* having accepted an article from Rudyard Kipling informed the author that he should not bother to submit any more This isn't a kindergarten for amateur writers the editor wrote I'm sorry Mr Kipling but you just don't know how to use the English language A century later John Grisham was turned down by sixteen agents before he found representation and it was only after Hollywood showed an interest in *The Firm* that publishers began to take him seriously The anxiety of rejection is an inevitable part of any writer's development In this book Ralph Keyes turns his attention from the difficulty of putting pen to paper the subject of his acclaimed *The Courage to Write* to the frustration of getting the product to the public Inspiration isn't nearly as important to the successful writer he argues as tenacity and he offers concrete ways to manage the struggle to publish Drawing on his long experience as a writer and teacher of writing Keyes provides new insight into the mind set of publishers the value of an agent and the importance of encouragement and hope to the act of authorial creation **Air-bird in the Water** Mildred Davis Harding, 1996 In this book author Mildred Davis Harding rescues from undeserved neglect Pearl Craigie the American born English author John Oliver Hobbes 1867

Barnstone, Michael Tomasek Manson, Carol J. Singley, 1997 This collection of essays traces Calvinism's presence in twentieth century literature and demonstrates its impact as psychological construct cultural institution and socio political model **A Psychoanalytic Exploration of Dante's The Divine Comedy** David Dean Brockman, 2017-06-26 David Dean Brockman connects spirituality with psychoanalysis throughout this book as he looks at Dante's early writings his life story and his polysemous classical poem *The Divine Comedy* Dante wanted to create a document that would educate the common man about his journey from brokenness to growth and a solid integration of body self and soul This book draws the resemblance between Dante's poem and the journey that patients experience in psychoanalytic therapy It will be the first total treatment of Dante's work in general and *The Divine Comedy* in particular using the psychoanalytic method This fascinating study of Dante's *The Divine Comedy* will be of interest to psychoanalysts psychotherapists and psychiatrists as well as those still in training Academics and students of psychology spirituality religion and literature may also be interested in Brockman's in depth study of Dante's work **The Muse in the Machine** David Gelernter, 2010-06-15 A leading mind in the world of artificial intelligence answers the provocative question Can we introduce emotion into the computer Can we introduce emotion into the computer David Gelernter one of the leading lights in artificial intelligence today begins *The Muse in the*

Machine with this provocative question In providing an answer he not only points to a future revolution in computers but radically changes our views of the human mind itself Bringing together insights from computer science cognitive psychology philosophy of mind and literary theory David Gelernter presents what is sure to be a much debated view of how humans have thought how we think today and how computers will learn to think in the future *The Tides of Mind: Uncovering the Spectrum of Consciousness* David Gelernter, 2016-02-22 A rock star New York Times of the computing world provides a radical new work on the meaning of human consciousness The holy grail of psychologists and scientists for nearly a century has been to understand and replicate both human thought and the human mind In fact it s what attracted the now legendary computer scientist and AI authority David Gelernter to the discipline in the first place As a student and young researcher in the 1980s Gelernter hoped to build a program with a dial marked focus At maximum focus the program would think rationally formally reasonably As the dial was turned down and focus diminished its mind would start to wander and as you dialed even lower this artificial mind would start to free associate eventually ignoring the user completely as it cruised off into the mental adventures we know as sleep While the program was a only a partial success it laid the foundation for *The Tides of Mind* a groundbreaking new exploration of the human psyche that shows us how the very purpose of the mind changes throughout the day Indeed as Gelernter explains when we are at our most alert when reasoning and creating new memories is our main mental business the mind is a computer like machine that keeps emotion on a short leash and attention on our surroundings As we gradually tire however and descend the mental spectrum reasoning comes unglued Memory ranges more freely the mind wanders and daydreams grow more insistent Self awareness fades reflection blinks out and at last we are completely immersed in our own minds With far reaching implications Gelernter s landmark *Spectrum of Consciousness* finally helps decode some of the most mysterious wonders of the human mind such as the numinous light of early childhood why dreams are so often predictive and why sadism and masochism underpin some of our greatest artistic achievements It s a theory that also challenges the very notion of the mind as a machine and not through empirical studies or hard science but by listening to our great poets and novelists who have proven themselves as humanity s most trusted guides to the subjective mind and inner self In the great introspective tradition of Wilhelm Wundt and Ren Descartes David Gelernter promises to not only revolutionize our understanding of what it means to be human but also to help answer many of our most fundamental questions about the origins of creativity thought and consciousness
