Art and the Historical Film Gillian McIver, 2022-11-17 Art and the Historical Film provides an important examination of fine art's impact on filmmaking grappling with the question of authenticity From Eugene Delacroix's interpretation of the 1830 French revolution to Uli Edel's version of the Baader Meinhof Gang artistic representations of historical subjects are appealing and pervasive Movies often adapt imagery from art history including paintings of historical events Films and art shape the past for us and continue to affect our interpretation of history While historical films are often argued over for their adherence to the facts their real problem is realism how can the past be convincingly depicted Realism in the historical film genre is often nourished and given credibility by its use of painterly references This book examines how art historical images affect historical films by going beyond period detail and surface design to look at how profound ideas about history are communicated through pictures Art and the Historical Film Between Realism and the Sublime is based on case studies that explore the links between art and cinema including American independent Western Meek's Cutoff Kelly Reichardt 2010 British heritage film Belle Amma Asante 2013 and Dutch national epic Admiral Roel Rein 2014 The chapters create immersive worlds that communicate distinct ideas about the past through cinematography production design and direction as the films adapt reference and transpose paintings by artists such as Rubens Albert Bierstadt and Jacques Louis David

world's oldest civilizations and is regarded as one of the cradles of civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty (206 BC–220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras, control stretched as far as Xinjiang and Tibet. As at present, traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.

Edward Gibbon's monumental work, *The History of the Decline and Fall of the Roman Empire*, spans six volumes, meticulously chronicling the complexities of Rome's gradual disintegration from the height of its power to the multifaceted factors contributing to its decline. Written in a lucid and elegant prose style characteristic of the 18th century, Gibbon employs a rich narrative interwoven with philosophical insight, rigorous analysis, and a keen awareness of historical context. His exploration delves into the interplay of political, military, and cultural shifts, presenting a comprehensive perspective not only on Rome but also on the broader themes of governance and civilization. An Age of Iron and Rust: Cassius

Dio and the History of His Time Andrew G. Scott, 2023-03-27 Cassius Dio described his own age as one of iron and rust. This study, which is the first of its kind in English, examines the decline and decay that Cassius Dio diagnosed in this period (180-229 CE) through an analysis of the author's historiographic method and narrative construction. It shows that the final books were a crucial part of Dio's work and it explains how Dio approached a period that he considered unworthy of history in view of his larger historiographic project.
