World wide maritime trade has been the essential driver of wealth creation economic progress and global human contact  
Trade and exchange of ideas have been at the heart of economic social political cultural and religious life and maritime  
international law These claims are borne out by the history of maritime trade beginning in the Indian Ocean and connecting  
to Southeast Asia Japan the Americas East Africa the Middle East especially the Persian Gulf the Mediterranean and Europe  
This development predates the end of the Ice Age with worldwide flooding and stimulated the establishment of land based  
civilizations in the above regions with particular effect on the Greek and Roman empires and even China s Celestial empire  
The Indian subcontinent was the original major player in maritime trade linking oceans and regions Global maritime trade  
declined with the fall of Mediterranean empires and the dark age in Europe but revived with Indian Ocean and Asian  
maritime networks Shipping and trade studies are hugely practical but can be technical legalistic and even dull for non  
specialists But this history is a broadly based and exciting account of human interaction at multiple levels for general readers  
specialists and practitioners It is based on huge reading and rare sources and with an attractive writing style and full of  
fascinating sidelights illuminating the historical narrative and from an author with lifelong experience in international

The History of Migration in Europe Francesca Fauri, 2014-10-03 The History of Migration in Europe belies several myths by arguing for example that immobility has not been the normal condition of people before the modern era Migration far from being an income maximizing choice taken by lone individuals is often a household strategy and local wages benefit from migration This book shows how successes arise when governments liberalize and accompany the international movements of people with appropriate legislation while failures take place when the legislation enacted is insufficient belated or ill shaped Part I of this book addresses mainly methodological issues Past and present migration is basically defined as a cross cultural movement cultural boundaries need prolonged residence and active integrationist policies to allow cross fertilization of cultures among migrants and non migrants Part II collects chapters that examine the role of public bodies with reference to migratory movements depicting a series of successes and failures in the migration policies through examples drawn from the European Union or single countries Part III deals with challenges immigrants face once they have settled in their new countries Do immigrants seek integration in their host culture Through which channels is such integration achieved and what roles are played by citizenship and political participation What is the identity of migrants and their children born in the host countries This text's originality stems from the fact that it explains the complex nature of migratory movements by incorporating a variety of perspectives and using a multi disciplinary approach including economic political and sociological contributions
