Divine Dharma Save-Seed Satyajit Patidar,2021-05-14 I am on a mission to explain to the world the real fact that the human brain is NOT his mind rather his seed s DNA is his mind more specifically the blue strand of the DNA spiral Human brain is merely an evolved form of rRNA of the zygote which processes the mRNA and tRNA wirelessly Like the CPU of the computer brain is a non codon processing organ which processes the genetic codes of the seed s DNA mind through a wireless nerve system called Sushumna Ada Pingla To know the wireless processing of the seed genetics in the brain read this book Unless seeds are saved brain cannot produce any significant outcome If the seeds are saved then all the thoughts of the seed s mind come true naturally Understand follow and share Save Seed awareness to make the world a heaven The Secret of the Storyteller EM Richter,2013-07-12 The Secret of the Storyteller follows the magical journey of Selena Silver a naive young flight attendant as she finds herself embroiled in a Jerusalem uprising Seeking refuge from the riots she hides in the home of Sophia a mystical oracle who reveals to her ancient secrets that have been hidden for millennia and equally hidden political agendas This long lost knowledge has the power to shift the paradigm of humanity into a new era of peace possibility and hope Brimming with esoteric wisdom and told with an enigmatic voice The Secret of the Storyteller is a profoundly moving narrative adventure Bulletin of the Atomic Scientists ,1958-02 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world The Atom in Seventeenth-century Poetry Cassandra Gorman,2021 An investigation into the remarkable poetics of the atom in English literary texts from the mid to late seventeenth century The early modern atom understood as an indivisible particle of matter captured the poetic imagination in ways that extended far beyond the reception of Lucretius and Epicurean atomism Contrarily to fears of atomisation and materialist threat many poets and philosophers of the period sought positive spiritual motivation in the concept of material indivisibility This book traces the metaphysical import of these poetic atoms teasing out an affinity between poetic and atomic forms in seventeenth century texts In the writings of Henry More Thomas Traherne Margaret Cavendish Hester Pulter and Lucy Hutchinson both atoms and poems were instrumental in acts of creating ordering and reconstructing knowledge Their poems emerge as exquisitely self conscious atomic forms producing intimate reflections on the creative power and indivisibility of self soul and God The book begins with a survey of the imaginative possibilities surrounding the early modern atom before considering the indivisible centres of the Cambridge Platonist Henry More s cosmic Spenserian poetics The focus then turns to the lyrical bond formed between atom and soul in the writings of Thomas Traherne and from there to the experimental sequences of Margaret Cavendish and Hester Pulter whose poetic spaces create new worlds and imagine alternative lives The book concludes with a study of Lucy Hutchinson s creation poem Order and Disorder which anticipates the regeneration of fallen being in atomic and alchemical terms **Types of**
