The Book of Chilam Balam of Chumayel Ralph Loveland Roys, **Settlement Archaeology at Quirigua, Guatemala** Wendy Ashmore, 2013-01-09 This monograph reports the results of the Quirigua Project Site Periphery Program five seasons 1975-1979 of archaeological survey and excavation in the 96 km² immediately adjoining the classic Maya site of Quirigua. Ashmore identifies and helps us understand where and how the people of Quirigua lived. She presents detailed material evidence in two data catalogues for the floodplain settlement adjoining Quirigua and for sites in the wider periphery. The work situates Quirigua settlement firmly in a regional context benefiting from the extraordinary abundance of information amassed in southeastern Mesoamerica since 1979. It sheds new light on the political, economic, and social dynamics of the region, including the sometimes fractious interactions between Quirigua, its overlords at Copan, and people elsewhere in the Lower Motagua Valley and beyond. Handbook of Middle American Indians, Volume 6 Manning Nash, 1967-01-01 Social Anthropology is the sixth volume in the Handbook of Middle American Indians published in cooperation with the Middle American Research Institute of Tulane University under the general editorship of Robert Wauchope. 1909-1979. The volume editor is Manning Nash. 1924-2001. Professor of Anthropology at the Center for Study of Economic Development and Cultural Change, University of Chicago. This volume provides a synthetic and comparative summary of native ethnography and ethnology of Mexico and Central America, written by authorities in a number of broad fields: the native population and its identification; agricultural systems and food patterns; economies; crafts; fine arts; kinship and family; compadrazgo; local and territorial units; political and religious organizations; levels of communal relations; annual and fiesta cycles; sickness; folklore; religion; mythology; psychological orientations; ethnic relationships; and topics of especial modern significance such as acculturation, nationalization, directed change, urbanization, and industrialization. The articles rely on the accumulated ethnography of the region but, instead of being essentially historical in treatment, they aim toward generalizations about the uniformities and varieties of culture, society, and personality found in Middle America. The collection is an invaluable reference work on Middle America and a provocative guide to scholars engaged in furthering understanding of humans and society. The Handbook of Middle American Indians was assembled and edited at the Middle American Research Institute of Tulane University with the assistance of grants from the National Science Foundation and under the sponsorship of the National Research Council Committee on Latin American Anthropology.

Man Across the Sea Carroll L. Riley, J. Charles Kelley, Campbell W. Pennington, Robert L. Rands, 2014-10-14 Whether humans crossed the seas between the Old World and the New in the times before Columbus is a tantalizing question that has long excited scholarly interest and tempted imaginations the world over From the myths of Atlantis and Mu to the more credible perhaps but hardly less romantic tales of Viking ships and Buddhist missionaries people have speculated upon what is after all not simply a question of contact but of the nature and growth of civilization itself To the specialist it is an important question indeed If people in the Western Hemisphere and in the Eastern Hemisphere developed their cultures more or less independently from the end of the last Ice Age until the voyages of Columbus the remarkable similarities between New World and Old World cultures reveal something important about the evolution of culture If on the other hand there were widespread or sustained contacts between the hemispheres in pre Columbian times these contacts represent events of vast significance to the prehistory and history of humanity Originally delivered at a symposium held in May 1968 during the national meeting of the Society for American Archaeology the papers presented here by scholars eminent in the field offer differing points of view and considerable evidence on the pros and cons of pre Columbian contact between the Old World and the New Various kinds of data archaeological botanical geographical and historical are brought to bear on the problem with provocative and original results Introductory and concluding remarks by the editors pull together and evaluate the evidence and suggest ground rules for future studies of this sort *Man across the Sea* provides no final answers as to whether people from Asia Africa or Europe visited the American Indian before Columbus It does however present new evidence suggested lines of approach and a fresh attempt to delineate the problems involved and to establish acceptable canons of evidence for the future
