This book was inspired by God It brings God s activities on behalf of Earth s citizens from the shadows of history into illumination God s mastery over the universe is brought to life from the Big Bang to modern times A plausible theory is put forth regarding how God has employed His tools only recently discovered but little understood by scientists dark matter and dark energy to create and sustain the universe as we know it God s book this book is a compliment to His Bible from which it differs in that for today s intelligent humans it explains how God advanced creation and evolution After summarizing key portions of the Bible this book focuses sequentially upon God s activities in Roman times the Dark Ages Medieval times Renaissance times Colonial times and the rise of the United States through the big wars up to modern times God led us through every period or we would not have reached these times as we are today God used the West to advance the entire planet as all Earth was afforded the opportunity to know Jesus Christ God s unseen struggles are summarized in the final chapter but there are much more in depth presentations of God s tools dark matter and dark energy containing preliminary information on how to develop necessary communications to initiate their use by mankind to save Earth God sees we are in imminent danger of flooding coastal areas worldwide because of the greenhouse gasses resulting from long over use of fossil fuels and subsequent melting of glaciers and icecaps The author posits that by leading us through the millennia to our current level of understanding and through this very book God has prepared us to partner with Him to save our civilization from devastation
