, 1912      The House of Sciences Ekmeleddin Ihsanoglu, 2019-06-19 Following a string of military defeats at the end of the eighteenth century Ottoman leaders realized that their classical traditions and institutions could not compete with Russia and the European states technological and economic superiority One of a series of nineteenth century reform initiatives was the creation of a European style university called dar l f nun From the Arabic words dar meaning house and f nun meaning sciences the dar l f nun would incorporate the western sciences into deeply entrenched academic traditions and institutions in an effort to bridge the gap with Europe The completely new institution distinct from the existing pre modern medreses was modeled after the French educational system and created an infrastructure for national universities in Turkey and some of the Arab speaking provinces It also influenced the establishment of universities in Iran and Afghanistan Ekmeleddin Ihsanoglu's study sheds new light on an important and pioneering experiment in East West relations tracking the

multifaceted transformation at work in Istanbul during the transition from classical to modern modes of scientific education. Out of this intellectual ferment a new Ottoman Turkish scientific language developed the terminology of which served as a convenient vehicle for expressing and teaching modern science throughout the Empire. **The House of Wisdom** Jonathan Lyons, 2011-02-05. For centuries following the fall of Rome western Europe was a benighted backwater a world of subsistence farming minimal literacy and violent conflict. Meanwhile Arab culture was thriving dazzling those Europeans fortunate enough to catch even a glimpse of the scientific advances coming from Baghdad Antioch or the cities of Persia Central Asia and Muslim Spain. There philosophers mathematicians and astronomers were steadily advancing the frontiers of knowledge and revitalizing the works of Plato and Aristotle. In the royal library of Baghdad known as the House of Wisdom an army of scholars worked at the behest of the Abbasid caliphs. At a time when the best book collections in Europe held several dozen volumes the House of Wisdom boasted as many as four hundred thousand. Even while their countrymen waged bloody Crusades against Muslims a handful of intrepid Christian scholars thirsty for knowledge traveled to Arab lands and returned with priceless jewels of science medicine and philosophy that laid the foundation for the Renaissance. In this brilliant evocative book Lyons shows just how much Western culture owes to the glories of medieval Arab civilization and reveals the untold story of how Europe drank from the well of Muslim learning. **Great Britain and the East**, 1929 **Jackie**
