The High Terrace:

U.S. Geological Survey Bulletin, 1983 **The Wide Lens in Archaeology** Allan Gilbert, Justin Lev-Tov, Paula Wapnish, 2017-06-01 This book honors the memory of Brian Hesse a scholar of Near Eastern archaeology a writer of alliterative and punned publication titles and an accomplished amateur photographer Hesse specialized in zooarchaeology but he influenced a wider range of excavators and ancient historians with his broad interpretive reach He spent much of his career analyzing faunal materials from different countries in the Middle East including Iran Yemen and Israel and his publications covered themes particular to animal bone studies such as domestication ancient market economics as well as broader themes such as determining ethnicity in archaeology The essays in this volume reflect the breadth of his interests Most chapters share an Old World geographic setting focusing either on Europe or the Middle East The topics are diverse with the majority discussing animal bones as was Hesse s specialization but some take a nonfaunal perspective related to the problems with which Hesse grappled The volume is also broad in temporal scope ranging from Neolithic Iran to early Medieval England and it addresses theoretical matters as well as methodological innovations including taphonomy and the history of computers in zooarchaeology Several of the essays are direct revisits to inspirations from or extensions of Hesse s own research All the contributions reflect his intense interest in social questions about antiquity the theme of social archaeology informed much of Brian Hesse s thinking and it is why his work made such an impact on those working outside his own disciplinary research **Bulletin**, 1909 **The Effect of Oxygen in Coal** David White, 1909 *The Pleistocene Geology of the Leadville Quadrangle, Colorado* Stephen Reid Capps, 1907 Bulletin of the United States Geological Survey Geological Survey (U.S.), 1909 Geological Survey Bulletin Geological Survey (U.S.), 1961 *Professional Paper* Geological Survey (U.S.), 1927 *Geological Survey Professional Paper* Geological Survey (U.S.), 1965 **Age and Origin of Fluvial Terraces in the Central Coast Range, Western Oregon** Stephen F. investigates caches of Clovis tools many of which have only recently come to light These caches are time capsules that allow archaeologists to examine Clovis tools at earlier stages of manufacture than the broken and discarded artifacts typically recovered from other sites The studies comprising this volume treat methodological and theoretical issues including the recognition of Clovis caches Clovis lithic technology mobility and land use **The Journal of the Manchester Geographical Society** ,1925 **Soil Survey of Colfax County, Nebraska** ,1933
