Origin of the History of Israel Jan-Wim Wesselius,2002-07-01 This book demonstrates that Primary History the historical work contained in the first nine books of the Hebrew Bible Genesis 2 Kings was written as one unitary work in deliberate emulation of the Greek language Histories of Herodotus of Halicarnassus completed c 440 BCE the diversity of its books and sections is largely a literary device The work was most likely written in the period 440 420 BCE in the period of reform usually associated with the name of Nehemiah Though this thesis does not directly affect questions of historicity

understanding the literary nature of primary history promises to open new vistas for research into the history of Israel the Hebrew Bible in general and the history of the Hebrew language **The History of Capitalism in Mexico** Enrique

Semo,2014-07-03 What lies at the center of the Mexican colonial experience Should Mexican colonial society be construed as a theoretical monolith capitalist from its inception or was it essentially feudal as traditional historiography viewed it In this pathfinding study Enrique Semo offers a fresh vision that the conflicting social formations of capitalism feudalism and tributary despotism provided the basic dynamic of Mexico s social and economic development Responding to questions raised by contemporary Mexican society Semo sees the origin of both backwardness and development not in climate race or a heterogeneous set of unrelated traits but rather in the historical interaction of each social formation In his analysis Mexico s history is conceived as a succession of socioeconomic formations each growing within the womb of its predecessor Semo sees

the task of economic history to analyze each of these formations and to construct models that will help us understand the laws of its evolution His premise is that economic history contributes to our understanding of the present not by formulating universal laws but by studying the laws of development and progression of concrete economic systems The History of Capitalism in Mexico opens with the Conquest and concludes with the onset of the profound socioeconomic transformation of the last fifty years of the colony a period clearly representing the precapitalist phase of Mexican development In the course of his discussion Semo addresses the role of dependency an important theoretical innovation and introduces the concept of tributary despotism relating it to the problems of Indian society and economy He also provides a novel examination of the changing role of the church throughout Mexican colonial history The result is a comprehensive picture which offers a provocative alternative to the increasingly detailed and monographic approach that currently dominates the writing of history Originally published as *Historia del capitalismo en M xico* in 1973 this classic work is now available for the first time in English It will be of interest to specialists in Mexican colonial history as well as to general readers Reader's Guide to the History of Science Arne Hessenbruch,2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

The History of Cartography, Volume 4 Matthew H. Edney, Mary Sponberg Pedley, 2020-05-15 Since its launch in 1987 the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship. Cartography in the European Enlightenment: the highly anticipated fourth volume offers a comprehensive overview of the cartographic practices of Europeans, Russians, and the Ottomans both at home and in overseas territories from 1650 to 1800. The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices. A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world, even as large-scale cartographic projects became possible under the aegis of powerful states. Yet older mapping practices persisted. Enlightenment cartography encompassed a wide variety of processes for making, circulating, and using maps of different types. The volume's more than four hundred encyclopedic articles explore the era's mapping, covering topics both detailed, such as geodetic surveying, thematic mapping, and map collecting, and broad, such as women and cartography, cartography and the economy, and the art and design of maps. Copious bibliographical references and nearly one thousand full-color illustrations complement the detailed entries. *The History of England* Sir James Mackintosh, 1835
