**Gothic** Michael Gamer, 2000-09-04 This is the first full length study to examine the links between high Romantic literature and what has often been thought of as a merely popular genre the Gothic Michael Gamer offers a sharply focused analysis of how and why Romantic writers drew on Gothic conventions whilst at the same time denying their influence in order to claim critical respectability He shows how the reception of Gothic literature including its institutional and commercial recognition

as a form of literature played a fundamental role in the development of Romanticism as an ideology In doing so he examines the early history of the Romantic movement and its assumptions about literary value and the politics of reading writing and reception at the end of the eighteenth century As a whole the book makes an original contribution to our understanding of genre tracing the impact of reception marketing and audience on its formation *Schwann Spectrum* ,1996

Lambert, Robert J. Blyth, Jan Rüger, 2011 The name of HMS Dreadnought is closely associated with the age of empire the Anglo German antagonism and the pre First World War naval arms race Yet it was also bound up with a range of political and cultural national and international contexts central to the Edwardian period This volume investigates these contexts and their intersection in this symbolically charged icon of the Edwardian age      **Contesting Earth's History in Transatlantic Literary Culture, 1860-1935** Richard Fallon, 2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth s deep history from the planet s molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience s unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from

the 1860s to the interwar decades *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience: old and young earth creationism, hollow earth theory, clairvoyant time travel, and sunken continent catastrophism. Innovatively combining methods from literary studies with the history of science, this book attends not just to the conceptual content of these strange sciences but also to their proponents' communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem. By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience, this volume throws into relief the variant conceptions of audience, evidence, and method that jostled and competed in wider scientific culture during this period. It also demonstrates that for all their diversity, authors of borderline palaeoscience shared the desire to shift the balance of power, creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away. These conjurors of lost worlds often captivated wide audiences, and many of their bizarre, astonishing, and iconoclastic ideas remain with us to this day. Some even inspired early science fiction by the likes of H. P. Lovecraft and Edgar Rice Burroughs. Hijacking geologists and palaeontologists' longstanding effort at making the prehistoric past visible, authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes.
