Mediterranean zones to wet and temperate climates further north The different case studies presented in each chapter are united by three intimately interconnected aspects The first rainwater harvesting in cisterns provides detailed techno hydraulic investigations of the household water supply systems The second aspect households and water at the margins stresses how domestic water supply systems were successfully adapted to unusually harsh environmental conditions The third other waters for houses focuses on other types of water supply systems rivers water bearers stepped pools wells and their life biographies As shown by the different chapters a careful study of a household s water supply is a rich source of evidence for understanding everyday decisions anxieties and changes in life They also build towards a greater understanding of the social inequalities that are at play in the ancient Mediterranean and beyond providing a wealth of new research to greatly augment our understanding of water as a resource in the ancient Mediterranean Providing a new and important perspective on a central part of everyday life in the ancient world this book is aimed at archaeologists and historians of the ancient Mediterranean notably the Greek and Roman worlds especially those with an interest in ancient households and water culture
