The Human Animal By La Barre Weston:

The Making of Psychological Anthropology George D. Spindler, 2023-11-10 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1978 **Who Is Man?** Abraham Joshua Heschel, 1965 One of the world's most illustrious and influential theologians here confronts one of the crucial philosophical and religious questions of our time the nature and role of man In these three lectures originally delivered in somewhat different form as The Raymond Fred West Memorial Lectures at Stanford University in May 1963 Dr Heschel inquires into the logic of being human What is meant by being human What are the grounds on which to justify a human being's claim to being human In the author's words We have never been as openmouthed and inquisitive never as astonished and embarrassed at our ignorance about man We know what he makes but we do not know what he is or what to expect of him Is it not conceivable that our entire civilization is built upon a misinterpretation of man Or that the tragedy of man is due to the fact that he is a being who has forgotten the question Who is Man The failure to identify himself to know what is authentic human existence leads him to assume a false identity to pretending to be what he is unable to be or to not accepting what is at the very root of his being Ignorance about man is not lack of knowledge but false knowledge The Human Animal Weston La Barre, 1965 **The Sexual Revolution in Modern American Literature I.**

Glicksberg, 2012-12-06 1 The Dialectic of the Sex Motif in Literature Sex is a function of culture in literature today it plays only a small though aggressively righteous part Nature long held in bondage periodically breaks out in revolt but its victory is never complete In every society primitive as well as modern the sexual instinct is for good or evil always subject to some measure of regulation and restraint In literature where the battle between love and sex spirit and flesh is fought out in terms of symbolic action the writers support their cause for or against sexual freedom with varying degrees of evangelical ardor and outspokenness On this issue there is no unanimity for the simple reason that American culture is not unified in its beliefs concerning the nature of man The central conflict between instinctual needs and the claims of the ideal between physical desire and the inner check between Dionysus and Christ goes on all the time Sublimation is the cultural process whereby sexual energy is deflected from its biological source and diverted into spiritually higher and socially more useful channels But sublimation is for most men hard to achieve As civilization grows more complex the individual is exposed to a series of increasingly severe moral strains Pitted against Nature while subject to its laws he must henceforth be governed in his behavior by inner as well as outer controls *The Human Cost of a Management Failure* Seth Allcorn, Howell S.

Baum, Michael A. Diamond, Howard F. Stein, 1996-03-20 This book presents a unique in depth examination of the effects that the popular approaches to management organizational change downsizing restructuring and reengineering had on a major

American hospital The Human Cost of a Management Failure shows what can happen when management insists on accomplishing its ends strictly by the numbers The authors ask why top management so often and with seemingly such a cavalier attitude selects downsizing and similar methods when research indicates that they are all too often such poor choices Based on a year long longitudinal study Allcorn Baum Diamond and Stein report on their interviews with 23 senior and mid level hospital administrators then interpret their findings from a psychoanalytic perspective to make clear that the human side of the workplace can only be ignored at great risk when change is contemplated and then implemented This is essential reading not only for corporate management but also for other professionals and academics throughout the social and behavioral sciences Readers of The Human Cost of a Management Failure are oriented to the literature on downsizing restructuring and reengineering and to the context of the study Case material follows enabling readers to draw their own conclusions with regard to the nature of the organizational change and its effects upon the hospital s employees and consultants offer their own viewpoints An update of events at the hospital after the study was conducted is provided along with summaries by each author of his own interpretation and how he interprets the others views In this way readers will get an unusual opportunity to evaluate their own viewpoints against those of the psychoanalytically trained researchers and to decide for themselves whether there are in fact better ways to make an organization economically competitive in the marketplace

Interactive Realism Daniel Mark Downes,2005 Interactive realism is a new and original theory of the Net that explains cyberspace as a social phenomenon Mark Poster author of The Second Media Age and The Mode of Information Poststructuralism and Social Context *Gender and Culture* , Based on a study of the Israeli kibbutz movement Gender and Culture discusses the differences in male and female orientations to marriage the family and work Spiro describes the counterrevolution in the kibbutz movement as it evolved over a quarter century period He addresses questions concerning the perennial issue of the universal and the particular in female and male psychology A special feature of this book is its historical and anthropological approach Studying the same community after a twenty five year interval enables readers to observe the children of the first study as adults in the follow up study Melford E Spiro is the author Counseling Techniques for Mature Women ,1966 The Social Thought of Talcott Parsons Uta Gerhardt,2016-02-17 The Social Thought of Talcott Parsons offers an insightful new reading of the work of Talcott Parsons keeping in view at once the important influences of Max Weber on his sociology and the central place occupied by methodology which enables us to better understand the relationship between American and European social theory Revealing American democracy and its nemesis National Socialism in Germany as the basis of his theory of society this book explores the debates in which Parsons was engaged throughout his life with the Frankfurt School C Wright Mills and the young radicals among the disobedient student generation as well as economism and utilitarianism in social theory the opponents that Parsons confronted in the interests of humanism In addition to revisiting Parsons extensive oeuvre Uta Gerhardt takes up themes in current research and theory

including social inequality civic culture and globalization offering a fascinating demonstration of what the conceptual approaches of Parsons can accomplish today Revealing methodology and the American ethos to be the cornerstones of Parsons social thought this book will appeal not only to those with interests in classical sociology and who wish to fully understand what this classic has to offer but also to those who wish to make sociology answer to the problems of the society of the present George C. Homans A Javier Treviño, Charles Tilly, 2015-11-17 George C Homans History Theory and Method offers original essays written by scholars from the fields of sociology history anthropology and literature with the aim of assessing Homans s rich and diverse intellectual contributions It is the first volume in over thirty years to offer a reappraisal of the life and work of one of the twentieth century s leading social scientists Performance Theory Richard Schechner, 2003-09-02 First Published in 1988 Routledge is an imprint of Taylor Francis an informa company *Toward a Theory of Instruction* Jerome Seymour Bruner, 1974-01-01 This country s most challenging writer on education presents here a distillation for the general reader of half a decade s research and reflection His theme is dual how children learn and how they can best be helped to learn how they can be brought to the fullest realization of their capacities Jerome Bruner Harper s reports has stirred up more excitement than any educator since John Dewey His explorations into the nature of intellectual growth and its relation to theories of learning and methods of teaching have had a catalytic effect upon educational theory In this new volume the subjects dealt with in *The Process of Education* are pursued further probed more deeply given concrete illustration and a broader context One is struck by the absence of a theory of instruction as a guide to pedagogy Mr Bruner observes in its place there is principally a body of maxims The eight essays in this volume as varied in topic as they are unified in theme are contributions toward the construction of such a theory What is needed in that enterprise is inter alia the daring and freshness of hypotheses that do not take for granted as true what has merely become habitual and these are amply evidenced here At the conceptual core of the book is an illuminating examination of how mental growth proceeds and of the ways in which teaching can profitably adapt itself to that progression and can also help it along Closely related to this is Mr Bruner s evolutionary instrumentalism his conception of instruction as the means of transmitting the tools and skills of a culture the acquired characteristics that express and amplify man s powers especially the crucial symbolic tools of language number and logic Revealing insights are given into the manner in which language functions as an instrument of thought The theories presented are anchored in practice in the empirical research from which they derive and in the practical applications to which they can be put The latter are exemplified incidentally throughout and extensively in detailed descriptions of two courses Mr Bruner has helped to construct and to teach an experimental mathematics course and a multifaceted course in social studies In both the students encounters with the material to be mastered are structured and sequenced in such a way as to work with and to reinforce the developmental process Written with all the style and lan that readers have come to expect of Mr Bruner *Toward a Theory of Instruction* is charged with the provocative suggestions and

inquiries of one of the great innovators in the field of education

Closing Human Evolution: Life in the Ultimate Age Ladislav Kováč, 2015-08-05 This volume analyses the evolution of humankind by combining approaches from science and the arts It offers a novel perspective on the evolution of life on Earth based on a recent reformulation of the second law of thermodynamics in terms of the maximum entropy production principle In essence the Earth is but one of many white holes in the universe where life functions as a specific arrangement for the rapid dissipation of energy gradients by generating self organized structures Evolution of life in the universe is a creative process of increasing complexity as a Bayesian ratchet of knowledge accumulation advancing in an evolutionary maze characterized by myriad blind alleys On Earth the human species has progressed more than any other by creating artefacts that have become both agents and products of in our cumulative cultural evolution Culture has dramatically enhanced the rate of dissipation of energy gradients Extrapolating from the acceleration of cultural evolution suggests that humanity will reach the Civilization Singularity in the middle of the 21st century a point in time at which the rate of changes and hence their unpredictability and uncontrollability will converge to infinity Humankind has now entered the ultimate age in which the exuberance and splendour of human feats may be metaphorically likened to fireworks The author highlights a new role of scientists as intellectuals who can create music for the fireworks by analysing the consequences of the astounding dynamics in order to make the closing phase of human evolution a sublime one marked by minimal political and social tensions

Human Adaptation Yehudi A. Cohen, 2017-07-12

Underlying the anthropological study of humans is the principle that there is a reality to which a human must adapt for survival Populations must adapt to the realities of the physical world and maintain a proper fit between their biological makeup and the pressures of the various niches of the world Social groups must develop adaptive mechanisms in the organization of their social relations if there is to be order regularity and predictability in patterns of cooperation and competition This book presents an introduction to anthropology that is unified and made systematic by its focus on

adaptations that have accompanied the evolution of humans from non human primates to inhabitants of vast urban areas in modern industrial societies Human Adaptation contains over forty outstanding essays that are intended to serve as an introduction to physical anthropology archeology and linguistics from the point of view of the processes of adaptation The organization of these selections contains a balance between biological and prehistoric cultural adaptations They provide coherence for the study of human evolution Several selections notably those in connection with linguistic adaptations deal with contemporary people in order to shed light on earlier evolutionary processes More than half of the selections deal with biological evolution This volume unifies the subject matter of anthropology within a single and powerful explanatory framework and incorporates the work of the most renowned anthropological experts on man

Gender and Culture

Melford E. Spiro, 2017-07-05 Based on a study of the Israeli kibbutz movement Gender and Culture discusses the differences in male and female orientations to marriage the family and work Spiro describes the counterrevolution in the kibbutz movement as it evolved over a quarter century period The kibbutz Spiro first studied Kiryat Yedidim was thirty years old at the time and he returned there twenty five years later Spiro initially found that the pioneers of the kibbutz movement in their attempt to implement their vision of a society based on sexual equality had created a revolution in the character of marriage the structure of the family patterns of child rearing and the sexual division of labor The counterrevolution he found twenty five years later was no less fascinating a return to certain important features of the prerevolutionary forms of these social institutions This return to tradition has been the work primarily of the young women who born and raised in the kibbutz had been inculcated with the revolutionary ideology of the kibbutz pioneers Studying the same community after a twenty five year interval enables readers to observe the children of the first study as adults in the follow up study This longitudinal dimension provides the most important basis for the interpretations offered in Gender and Culture A new introduction discusses additional even more radical changes that have occurred since the book s original publication in 1979 situating the kibbutz experience in the context of contemporary gender studies and feminist thought The book will be of continuing importance for sociologists anthropologists psychologists and women s studies scholars

Freud Paul Roazen, 2018-01-16

Sigmund Freud had broad ambitions about what psychoanalysis could add to human thought But Freud s own writings have rarely been assessed within the perspective of political philosophy Political theorists will find in the school Freud established a rich storehouse of ideas For us to link up with what Freud was saying means to join in the great conversation about what the ends of the just society should be as well as what a fully developed person might be like Written more than twenty years ago the central interpretive theses found in Freud Political and Social Thought still ring true In his new introduction to this classic text Paul Roazen contends that today from the point of view of intellectual history Freud looms as a subject in an even larger way than he did back in the 1960s His thinking has impinged for good or ill on how we think about character and the nature of human impulses Privacy itself has been affected so much so that political candidates now feel free to use intimate

material from private life for manipulative public purposes Yet after all this time political scientists remain reluctant to entertain the need to explore the psychological dimension of all political events Without reducing politics to psychoanalysis or inflating psychological categories to embrace all of politics Roazen provides an introductory look at the field of psychoanalysis By bringing together the different disciplines of psychology and politics he breaks through parochialism Roazen is no advocate for psychoanalysis but believes that analysts have as much to learn from social science as the other way around This volume is proof that at its best political theory has to be inherently interdisciplinary As such this volume will be of interest to intellectual historians psychoanalysts and political theorists **Princeton Alumni Weekly** ,1954
