Philosophy Tessa Morrison,2016-03-09 Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature Some of the works examined are very well known such as Tommaso Campanella s Civitas Solis while others such as Joseph Michael Gandy s Designs for Cottages are relatively obscure However even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author s political philosophy It reconstructs the cities through a 3 D computer program ArchiCAD

using Artlantis to render Plans sections elevations and perspectives are presented for each of the cities The ten cities are Filarete Sforzina Albrecht Durer Fortified Utopia Tommaso Campanella The City of the Sun Johann Valentin Andreae Christianopolis Joseph Michael Gandy An Agricultural Village Robert Owen Villages of Unity and Cooperation James Silk Buckingham Victoria Robert Pemberton Queen Victoria Town King Camp Gillette Metropolis and Bradford Peck The World a Department Store Each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city Although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society The book is structured in two parts

The Complete Poetry of Jack London Jack London, 2007 [The Human Drift \(1917\)](#). by Jack London, 2017-01-26 The Human Drift is a work of Utopian social planning written by King Camp Gillette and first published in 1894 The book details Gillette's theory that replacing competitive corporations with a single giant publicly owned trust the United Company would cure virtually all social ills One third of the book is devoted to Gillette's plan for an immense three level metropolis called Metropolis on the site of Niagara Falls Designed to accommodate a population of tens of millions of inhabitants the mega city would draw its electric power from the Falls A photograph of the Falls served as the book's frontispiece The first large electrical generating facilities at Niagara Falls utilizing the new alternating current system of Nikola Tesla and George Westinghouse were being constructed at the time Gillette wrote 2 Gillette's city was to possess a perfect economical system of production and distribution run by the United Company it would in fact be the only city on the North American continent Economies of scale would mean that a single one of every necessary facility one steel mill one shoe factory etc would exist Advances in mechanization would generate ever greater efficiencies and ever greater wealth for the whole society Social progress would be natural and inevitable gender equality would be the rule Gillette gives a highly specific picture of his metropolis it is shaped in a perfect rectangle 135 miles on the long side and 45 on the short Even with necessary farming and mining most of the rest of North America outside Metropolis would be a natural environment Gillette

saw the city as containing the full population of the United States at that time sixty million people he also thought that the city could accept another thirty million in future population growth Gillette wanted the buildings of Metropolis to be built of porcelain for endurance and cleanliness His thinking on this point may have been influenced by the famous White City of the World s Columbian Exposition of 1893 Gillette favored circular buildings even for residences 25 floor apartment complexes and a hexagonal street plan Though the details of his plan were highly specific Gillette was not rigidly committed to them in a future revised version he would switch to a circular shape for his city and raise the apartment buildings to 50 stories The text of *The Human Drift* was accompanied with abundant illustrations and plans a graph of the Educational and Industrial Pyramid and other features of Gillette s scheme His book is important for the attention it received in its time though today it is a curiosity John Griffith Jack London born John Griffith Chaney January 12 1876 November 22 1916 was an American novelist journalist and social activist John Griffith Jack London born John Griffith Chaney January 12 1876 November 22 1916 was an American novelist journalist and social activist A pioneer in the then burgeoning world of commercial magazine fiction he was one of the first fiction writers to obtain worldwide celebrity and a large fortune from his fiction alone including science fiction Some of his most famous works include *The Call of the Wild* and *White Fang* both set in the Klondike Gold Rush as well as the short stories *To Build a Fire* *An Odyssey of the North* and *Love of Life* He also wrote of the South Pacific in such stories as *The Pearls of Parlay* and *The Heathen* and of the San Francisco Bay area in *The Sea Wolf* London was part of the radical literary group *The Crowd* in San Francisco and a passionate advocate of unionization socialism and the rights of workers He wrote several powerful works dealing with these topics such as his dystopian novel *The Iron Heel* his non fiction expos *The People of the Abyss* and *The War of the Classes* [The Human Drift \(1917\): Short Stories Collection](#) Jack London,2018-10-09 John Griffith London born John Griffith Chaney January 12 1876 **Jack London - the Human Drift** Jack London,2021-04-17 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book Includes a biography of the author
