Peace Support Operations Eli Stamnes,2020-09-29 Peace Support Operations Nordic Perspectives brings together Nordic academics working in the field of peace support operations broadly defined It contains a collection of articles that present different theoretical approaches to the study of peace support operations and contribute to enhance the knowledge of the Nordic countries participation in such operations Its case studies describe the development of peacekeeping forces from Norway Sweden Denmark and Finland in the face of

evolving threats to world security over the past sixty years and how each country's reaction has differed. The conflicts covered in this study include the Cold War, the Balkan conflict, the first Gulf War, and the Malawian ethnic conflict. Thus, it constitutes a contribution to the academic field in both a theoretical and an empirical sense. This book was previously published as a special issue of *International Peacekeeping*.

The Psychology of the Peacekeeper Thomas W. Britt, Amy B. Adler, 2003-09-30 In this remarkable volume, a multinational team of scientists catalogs the stressors and benefits for combat-trained soldiers deployed on missions where they are told to hold their fire and assume the role of peacekeeper. Theory and direct research with peacekeepers is incorporated. Missions covered include but are not limited to peacekeeping operations in Haiti, Somalia, Bosnia, Kosovo, Iraq, and Lebanon. The terminology of peacekeeping and military operations is listed. The stressors, threats, dangers, frustrations, and benefits of the peacekeeper role are described in dramatic detail, with additional attention to the Peacekeeper Stress Syndrome. With the goal of increasing peacekeeper health and well-being, which in turn increases the likelihood of establishing a stable peace, this volume also addresses interventions and preventative measures. The extent of psychological distress and disorders following peacekeeping operations is documented. Interventions are recommended for various phases of deployment in order to minimize the likelihood of post-deployment psychological problems. Experts in social, industrial, organizational, health, clinical, and cross-cultural psychology contribute to a multi-dimensional perspective. Each chapter author reports psychological research with military personnel in peacekeeping operations.

The Protection of Civilians in Peacekeeping Operations Tamer Morris, 2024-09-09 While the Security Council has been mandating peacekeepers to protect civilians since 1999, there is still contention on its legal meaning. Even though the concept of protection can seem self-evident, as the concept of protection is borrowed language, each body of law will perceive protection through a different lens. However, as the mandate creates a legal obligation on UN peace missions, a clear understanding of protection is fundamental to ensure performance and accountability.

Team Effectiveness In Complex Organizations Eduardo Salas, Gerald F. Goodwin, C. Shawn Burke, 2008-11-20 Over the past 40 years, there has been a growing trend toward the utilization of teams for accomplishing work in organizations. Project teams, self-managed work teams, and top management teams, among others, have become a regular element in the corporation or military. This volume is intended to provide an overview of the current state of the art research on team effectiveness.

Made, Not Born Bruce Newsome, 2007-09-30 Why do the combat capabilities of individual soldiers vary so much? This book seeks to provide an answer to this and other questions about variability in combat performance. Some soldiers flee quickly from the battlefield, while others endure all hardships until the bitter end. Some combat units can perform numerous types of missions, while others cannot keep themselves organized during peacetime. Some militaries, armed with obsolete weapons, have out-fought enemies with the latest weapons, just as some massively outnumbered armies have beaten back much larger opponents. In this first social scientific study of the effectiveness of combat troops, Newsome evaluates competing explanations for the

varying combat capabilities and performances There are four main explanations each emphasizing the influence of a single factor The first focuses on material endowments How well funded are the troops Do they have the latest protective gear and the most advanced weaponry Second some analysts claim that democracies produce better commanders superior strategies more motivated personnel or better managed personnel others however associated those characteristics with more authoritarian forms of government Third is the idea that giving more power to the troops on the ground in individual combat units empowers them with decision making capability and adaptability to fast changing situations and circumstances Newsome presents evidence that decentralized personnel management does correlate with superior combat performance Fourth soldier capabilities and performance often are assumed to reflect intrinsic attributes such as prior civilian values Newsome argues that the capabilities of combat soldiers are acquired through military training and other forms of conditioning but he does not entirely discount the role of a soldier's individual character In the age old nature vs nurture argument he finds that intrinsic qualities do count but that extrinsic factors such as training and environment matter even more

Accountability Of Peace Support Operations M. C. Zwanenburg, 2005-01-01 Quis custodiet ipsos custodies In other words who guards the guardians At a time when the mandate of many peace support operations includes halting violations of international humanitarian law by third parties there is still a lack of clarity concerning accountability of peace support operations themselves This book addresses that accountability focusing on peace support operations under the command and control of the United Nations and the North Atlantic Treaty Organization It is concerned with the accountability of international organizations as well as troops contributing and member states but not of individuals Drawing on existing and emerging doctrines of international law including the law of state responsibility the law of responsibility of international organizations international institutional law and international humanitarian law and on the basis of state practice this book makes a strong plea for improving mechanisms to implement the accountability of peace support operations under international humanitarian law The Paul Reuter Prize 2006 was awarded to Marten Zwanenburg for this book

Regulating the Use of Force by United Nations Peace Support Operations Charuka Ekanayake, 2021-05-30 This Book attempts to deduce regulatory standards that can close the gaps between the Promises made and the Outcomes secured by the United Nations in relation to its use of force It explores two broad questions in this regard why the contemporary legal framework relevant to the regulation of force during Armed Conflict cannot close the gaps between the said Promises and Outcomes and how the Unified Use of Force Rule formulated herein achieves this This is the first book to coherently analyse the moral as well as legal aspects relevant to UN use of force UN peace operations are rapidly changing Deployed peacekeepers are now required to use force in pursuance of numerous objectives such as self defence protecting civilians and carrying out targeted offensive operations As a result questions about when where and how to use force have now become central to peacekeeping While UN peace operations have managed to avoid catastrophes of the magnitude of Rwanda and Srebrenica for over two decades crucial gaps still exist between what the UN promises on the use of force front and what it achieves Current conflict zones such as the Central African Republic Eastern Congo and Mali stand testament to this This book searches for answers to these issues and identifies how an innovative mix of the relevant legal and moral rules can produce regulatory standards that can allow the UN to keep their promises The discussion covers analytical ground that must be traversed behind the scenes of UN deployment well before the first troops set foot on a battlefield The analysis ultimately produces a Unified Use of Force Rule that can either be completely or partially used as a model set of Rules of Engagement by UN forces This book will be immensely beneficial to law students researchers academics and practitioners in the fields of international relations international law peacekeeping and human rights
