The Human Search:

Search Algorithms and Applications Nashat Mansour,2011-04-26 Search algorithms aim to find solutions or objects with specified properties and constraints in a large solution search space or among a collection of objects A solution can be a set of value assignments to variables that will satisfy the constraints or a sub structure of a given discrete structure In addition there are search algorithms mostly probabilistic that are designed for the prospective quantum computer This book demonstrates the wide applicability of search algorithms for the purpose of developing useful and practical solutions to problems that arise in a variety of problem domains Although it is targeted to a wide group of readers researchers graduate students and practitioners it does not offer an exhaustive coverage of search algorithms and applications The chapters are organized into three parts Population based and quantum search algorithms Search algorithms for image and video processing and Search algorithms for engineering applications

Search Without Idols W. Horosz,2012-12-06 Search Without Idols is a study of human transcendence in the context of human striving projecting surpassing overcoming This power is central to man s search for wholeness Such transcendence makes reality tolerable It provides us with m impressive array of human responses which enable us to cope But it also provides the excesses that go beyond human striving Nothing seems to be off limits to this ubiquitous power Such a state of surpassing limits is what we find in the relation between the human search for wholeness and the quest for external totalities which lies beyond the human context Such soaring flights beyond the capacity of human striving are hard to control impossible to show responsibility for and beyond the reach of criteria The reach exceeds both our grasp and our control Transcendence then is a greatly used and much abuse human power Its activities have never ceased to amaze me its excesses have always troubled me even from the beginning of my studies This book is not an exercise in self clarification I have some thoughts on the matter which I wish to share with the reader Perhaps we can mutually appreciate the great gift without compromising our sanity Part I will provide a new look at the meaning of transcendence

Visual Search 2 A.G. Gale,K. Carr,D. Brogan,2003-09-02 The concept of visual search embraces a wide range of processing activities from human cognitive phenomana to applied problems for both human and machine vision in industrial medical and military environments This book the second to be derived from the series of international conferences on visual search organized under the auspices of the Applied Vision Association brings together research from a variety of disciplines enabling the reader to share experiences at the cutting edge accessing knowledge which might otherwise be locked away in specialist journals or grey literature

In Search of the Human Face Luigi Giussani,2025-02-18 What do we mean when we say I Behind that word there exists today a deep and abiding confusion And yet what could be more urgent for each and every one of us than an understanding of what it means to be a subject a true protagonist in the world Nothing is as fascinating as the discovery of the true dimensions of one s own I And nothing is as moving and provocative as the belief that God became flesh and blood to accompany each person s journey in search of their

own human face Unfolding the implications of that belief is the burden of In Search of the Human Face one of the seminal books by Monsignor Luigi Giussani founder of Communion and Liberation Life presents us first of all with a decision about what we recognize as our own foundation and this decision is an event that is continually proposed again The encounter with the Christian event has for two thousand years been the encounter with a human phenomenon in which the passion for the discovery of one's own face and openness to reality are mysteriously awakened and it has as an inevitable consequence the inauguration of a new type of morality aptly described by Romano Guardini In the experience of a great love all that happens becomes an event inside that love

Search and Rescue Robotics Multiple Authors, 2017-08-23 In the event of large crises earthquakes typhoons floods a primordial task of the fire and rescue services is the search for human survivors on the incident site This is a complex and dangerous task which too often leads to loss of lives among the human crisis managers themselves This book explains how unmanned search can be added to the toolkit of the search and rescue workers offering a valuable tool to save human lives and to speed up the search and rescue process The introduction of robotic tools in the world of search and rescue is not straightforward due to the fact that the search and rescue context is extremely technology unfriendly meaning that very robust solutions which can be deployed extremely quickly are required Multiple research projects across the world are tackling this problem and in this book a special focus is placed on showcasing the results of the European Union ICARUS project on this subject The ICARUS project proposes to equip first responders with a comprehensive and integrated set of unmanned search and rescue tools to increase the situational awareness of human crisis managers so that more work can be done in a shorter amount of time The ICARUS tools consist of assistive unmanned air ground and sea vehicles equipped with victim detection sensors The unmanned vehicles collaborate as a coordinated team communicating via ad hoc cognitive radio networking To ensure optimal human robot collaboration these tools are seamlessly integrated into the command and control equipment of the human crisis managers and a set of training and support tools is provided to them in order to learn to use the ICARUS system The research leading to these results has received funding from the European Community's Seventh Framework Programme FP7 2007 2013 under grant agreement number 285417 The publishing of this book was funded by the EC FP7 Post Grant Open Access Pilot programme

Aristotle's Discovery of the Human Mary P. Nichols, 2023-07-15 Aristotle's Discovery of the Human offers a fresh illuminating and accessible analysis of one of the Western philosophical tradition's most important texts In Aristotle's Discovery of the Human noted political theorist Mary P Nichols explores the ways in which Aristotle brings the gods and the divine into his philosophizing about human affairs in his Nicomachean Ethics Her analysis shows that for Aristotle both piety and politics are central to a flourishing human life Aristotle argues that piety provides us not only an awareness of our kinship to the divine and hence elevates human life but also an awareness of a divinity that we cannot entirely assimilate or fathom Piety therefore supports a politics that strives for excellence at the same time that it checks excess through a recognition of human limitation Proceeding through each of the ten books of the Ethics Nichols shows that this prequel to Aristotle's Politics is as theoretical as it is practical Its goal of improving political life and educating citizens and statesmen is inseparable from its pursuit of the truth about human beings and their relation to the divine In the final chapter which turns to contemporary political debate Nichols's suggestion of the possibility of supplementing and deepening liberalism on Aristotelian grounds is supported by the account of human nature virtue friendship and community developed throughout her study of the Ethics

Trees and the Human Spirit Ruth Wilson,2019-01-08 This volume presents a treatise on trees and how they relate to the human spirit Through its in depth discussion of the meaning of trees a need for a shift in thinking becomes clear Historically people in dominant cultures have viewed trees as resources to be used and forests as obstacles to such endeavors as farming and ranching This publication presents a different view of trees and forests one calling for a shift from domination and irreverence to respect and care even kinship While the text includes a discussion about some of the amazing characteristics of trees the primary focus here is on the philosophical meaning of and emotional connections with trees Its integration of disciplines and the recognition of different ways of knowing will make this book appealing to a wide variety of readers

The Concept of Inclusive Pluralism Cirilo Boloron Jr.,2022-05-16 When people of different cultures and religious traditions are being constantly drawn closer together interreligious dialogue becomes not only a strategy to understand the Others but also an attitude to deepen one's faith Christian faith acknowledges other religious traditions as genuine ways and channels of salvation for their adherents and that religions have a place in God's universal plan of salvation for humankind The plausibility of this assertion can be exemplified by the concept of inclusive pluralism a theological model developed by the Belgian born Jesuit theologian Jacques Dupuis This book expounds that concept and reflects on its implication for the Catholic Church's unwavering commitment to interreligious dialogue
