contemporary nature of globalization with that of earlier epochs In mapping the shape and political consequences of globalization the authors concentrate on six states in advanced capitalist societies SIACS the United States the United Kingdom Sweden France Germany and Japan For comparative purposes other states particularly those with developing economics are referred to and discussed where relevant The book concludes by systematically describing and assessing contemporary globalization and appraising the implications of globalization for the sovereignty and autonomy of SIACS It also confronts directly the political fatalism that surrounds much discussion of globalization with a normative agenda that elaborates the possibilities for democratizing and civilizing the unfolding global transformation The Transformation of Security in the Asia/Pacific Region Desmond Ball,2013-10-14 The security architecture of the Asia Pacific region is in a profound transformation Such changes are not without problems which are discussed here *The Weapons State* David Mutimer,2000 The proliferation of all kinds of weapons is a focal point for international security This work shows how both the language used to talk about weapons proliferation and the practices adopted to respond to it serve to define the problem in ways that promote policy responses doomed to failure *Conventional Arms Transfer* United States. Sea-Dumped Chemical Weapons: Aspects, Problems and Solutions A.V. Kaffka,2013-03-09 This volume summarises the materials presented at the NATO Advanced Research Workshop on Sea Dumped Chemical Munitions held in Kaliningrad Moscow Region Russia in January 1995 The conference was sponsored by the NATO Division of Scientific and Environmental Affairs in the framework of its outreach programme to develop co operation between NATO member countries and the Cooperation Partner countries in the area of disarmament technologies The problem of the ecological threat posed by chemical weapons CW dumped in the seas after the Second World War deserves considerable international attention the amount of these weapons many of them having been captured from the German Army is assessed at more than three times as much as the total chemical arsenals reported by the United States and Russia They were disposed of in the shallow depths of North European seas areas of active fishing in close proximity to densely populated coastlines with no consideration of the long term consequences The highly toxic material have time and again showed up for instance when retrieved occasionally in the fishing nets attracting local media coverage only Nevertheless this issue has not yet been given adequate and comprehensive scientific analysis the sea disposed munitions are not covered by either the Chemical Weapons Convention or other arms control treaties In fact the problem has been neglected for a long time on the international level Only recently were official data made available by the countries which admitted conducting dumping operations **The Korean Conundrum** Ted Galen Carpenter,Doug Bandow,2025-09-23 The US seems to be heading directly toward a confrontation with North Korea as Koreans in the south and nations around the world anxiously witness mounting tension Carpenter and Bandow take a look at the twin crises now afflicting US policy in East Asia the reemergence of North Korea s nuclear

weapons program and the growing anti American sentiment in South Korea They question whether Washington s East Asia security strategy makes sense with the looming prospect of US troops stationed in South Korea becoming nuclear hostages Carpenter and Bandow put forth the most provocative solution yet to this gnarled and dangerous situation Military Industry and Regional Defense Policy Timothy D. Hoyt, 2017-07-05 Military Industry and Regional Defense Policy re examines military industrialization in the developing world focusing on policy making in producer states and the impact of security perceptions on such policy making Timothy D Hoyt reassesses the role of regional state sub systems in international relations and recent historical studies of international technology and arms transfers Looking at Israel Iraq and India the three most powerful regional powers in the Cold War era he presents an expert analysis of the three sided phenomena of the regional hegemony the regional competitor and the small over achiever This new book breaks away from existing literature on military industries in the developing world which has focused on their economic and development costs and benefits These past studies have used primitive methodologies that focus on the production of complete weapons systems a misleading gauge in a world of growing international defense cooperation They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers This new text delivers an incisive new perspective
