Sir Owen Williams 18901969:

Sir Owen Williams, 1890-1969 David Cottam, Sir Owen Williams, Stephen Rosenberg, 1986 Owen Williams David Yeomans, David Cottam, 2001 Be honest first and if you are honest you will be beautiful but do not attempt to be beautiful and dishonest Sir Owen Williams Sir Owen Williams influence on architecture of the first half of the twentieth century stemmed from a demonstration of what a functionalist approach to architecture could achieve Blurring the roles of engineer and architect during the period between the wars Williams produced a series of innovative reinforced concrete buildings whose aesthetic treatment depended upon an expression of their structures Dr Williamson, Dr Pearse and the Pioneer Health Centre Justin De Syllas, 2025-07-28 The unique story of the Peckham Experiment a local social welfare project in London with Pioneering Health in London, 1935-2000 David Kuchenbuch, 2018-10-25 The Peckham Experiment huge ambition conducted between 1935 and 1950 in the London Pioneer Health Centre was one of the most talked about social experiments of the 20th century Families from the South London neighbourhood of Peckham were invited to use the facilities of a radiantly modern building They were encouraged to freely choose and organize their leisure activities taking advantage of a swimming pool a gymnasium and a self service cafeteria In doing so both their health status and interaction with other members of the nascent centre community were closely observed by a team of physicians The first research monograph on the history of the experiment building on archival sources this book combines a micro historical perspective with methods from the history of science It shows how bio medical holism and evolutionary theories typical of the interwar years informed research on social life in the centre But it also reveals that the guinea pigs too were trying to make sense of the research they were taking part in The outcome was an ambiguous social laboratory that generated new insights into the power of social groups to self organize which were soon discussed all over the world and continue to haunt British political debates today

The Architects and Architecture of London Kenneth Allinson, 2008 The guide explains why London is the way it is It helps you link the historical and contemporary into a single pattern of significant places spaces and buildings It highlights old and new as a lively and vibrant pattern of on going creative activity rooted in established urban patterns

The Other

Modern Movement Kenneth Frampton, 2022-01-25 A revealing new look at modernist architecture emphasizing its diversity complexity and broad inventiveness Usually associated with Mies and Le Corbusier the Modern Movement was instrumental in advancing new technologies of construction in architecture including the use of glass steel and reinforced concrete Renowned historian Kenneth Frampton offers a bold look at this crucial period focusing on architects less commonly associated with the movement in order to reveal the breadth and complexity of architectural modernism The Other Modern Movement profiles nineteen architects each of whom consciously contributed to the evolution of a new architectural typology through a key work realized between 1922 and 1962 Frampton's account offers new insights into iconic buildings like Eileen Gray s E 1027 House in France and Richard Neutra's Kaufmann House in Palm Springs California as well as lesser known

works such as Antonin Raymond's Tokyo Golf Club and Alejandro de la Sota's Maravillas School Gymnasium in Madrid Foregrounding the ways that these diverse projects employed progressive models advanced new methods in construction techniques and displayed a new sociocultural awareness Frampton shines a light on the rich legacy of the Modern Movement and the enduring potential of the unfinished modernist project Structure and Style Michael Stratton, 1997 This book looks at approaches to appraising and conserving mainstream architecture of the 20th century commercial buildings industrial buildings and housing Liquid Stone Jean-Louis Cohen, G. Martin Moeller, 2006-08-10 In Liquid Stone architects engineers and scholars explore the changing nature of concrete from both technical and aesthetic perspectives More than thirty buildings by leading international architects such as Jean Nouvel Herzog de Meuron Tadao Ando Zaha Hadid Steven Holl Norman Foster and Santiago Calatrava demonstrate through detailed descriptions photographs and technical drawings the remarkable new architectural and engineering accomplishments taking form at present and the promising future of this dynamic medium BOOK JACKET Basics Interior Architecture 05 Russell Gagg, 2011-10-01 A focused and informative introduction to many of the materials used in the design of contemporary interior spaces It also explores the use of sustainable materials Colonial Architecture and Urbanism in Africa Fassil Demissie, 2016-12-05 Colonial architecture and urbanism carved its way through space ordering and classifying the built environment while projecting the authority of European powers across Africa in the name of science and progress The built urban fabric left by colonial powers attests to its lingering impacts in shaping the present and the future trajectory of postcolonial cities in Africa Colonial Architecture and Urbanism explores the intersection between architecture and urbanism as discursive cultural projects in Africa Like other colonial institutions such as the courts police prisons and schools that were crucial in establishing and maintaining political domination colonial architecture and urbanism played s pivotal role in shaping the spatial and social structures of African cities during the 19th and 20th centuries Indeed it is the cultural destination of colonial architecture and urbanism and the connection between them and colonialism that the volume seeks to critically address The contributions drawn from different interdisciplinary fields map the historical processes of colonial architecture and urbanism and bring into sharp focus the dynamic conditions in which colonial states officials architects planners medical doctors and missionaries mutually constructed a hierarchical and exclusionary built environment that served the wider colonial project in Africa Drivina Spaces Peter Merriman, 2011-07-22 Peter Merriman traces the social and cultural histories and geographies of driving spaces through an examination of the design construction and use of England's M1 motorway in the 1950s and 1960s A first of its kind academic study examining the production and consumption of the landscapes and spaces of a British motorway An interdisciplinary approach engaging with theoretical and empirical work from sociology history cultural studies anthropology and geography Contains 38 high quality illustrations Based on extensive original archive work The Empire of Progress D. Stephen, 2013-09-19 This much needed study of the British Empire Exhibition reveals durable persistent connections

between empire and domestic society in Britain during the interwar years It demonstrates that the Exhibition was a marker of how by 1924 imperial relations were increasingly likely to be shaped by forces located on the colonial periphery
