The Sacred and its Scholars Idinopulos,Yonan,1996-10-01 This volume of essays is devoted to a careful examination of the importance of methodology in the study of primary religious data The essays focus on the Sacred as an ultimate object of descriptive analysis and critical scrutiny on the part of a select number of North American and European methodologists in the study and teaching of the history of religions and its allied disciplines The central question to which the contributors respond are these What is the Sacred Is it a being or a concept of a being is it a mental state or an objective reality or something else entirely Can the Sacred be described as an empirical fact or as a formal rule for religious inquiry If the Sacred is a valid category in the study and teaching of religion then what can be said about the antithesis of the sacred namely the profane or the secular This volume probes these questions with great care in order to justify a number of ways the Sacred can be construed as an indispensable notion for the study and teaching of religion

deepening polarization in the United States *Flyover Fictions* is an exploration of the trope's current politicization historical contexts and general proliferation of meanings Instead of resolving the ambiguities inherent in the concept the volume considers what can be done with these ambiguities and how precisely their fuzziness might be used to create an analytic tool to describe understand and critique processes of cultural hierarchization The contributors show how flyover fictions may operate in different national contexts and also internationally or transnationally not only providing a fresh perspective on historical and contemporary American culture but also supplying a conceptual toolbox for broader use

Jewish Studies at the Crossroads of Anthropology and History Ra'anana S. Boustan, Oren Kosansky, Marina Rustow, 2011-01-24 Over the past several decades the field of Jewish studies has expanded to encompass an unprecedented range of research topics historical periods geographic regions and analytical approaches Yet there have been few systematic efforts to trace these developments to consider their implications and to generate new concepts appropriate to a more inclusive view of Jewish culture and society *Jewish Studies at the Crossroads of Anthropology and History* brings together scholars in anthropology history religious studies comparative literature and other fields to chart new directions in Jewish studies across the disciplines This groundbreaking volume explores forms of Jewish experience that span the period from antiquity to the present and encompass a wide range of textual ritual spatial and visual materials The essays give full consideration to non written expressions of ritual performance artistic production spoken narrative and social experience through which Jewish life emerges More than simply contributing to an appreciation of Jewish diversity the contributors devote their attention to three key concepts authority diaspora and tradition that have long been central to the study of Jews and Judaism Moving beyond inherited approaches and conventional academic boundaries the volume reconsiders these core concepts reorienting our understanding of the dynamic relationships between text and practice and continuity and change in Jewish contexts More broadly this volume furthers conversation across the disciplines by using Judaic studies to provoke inquiry into theoretical problems in a range of other areas

Machine Dreaming and Consciousness J. F. Pagel, Philip Kirshtein, 2017-04-13 *Machine Dreaming and Consciousness* is the first book to discuss the questions raised by the advent of machine dreaming Artificial intelligence AI systems meeting criteria of primary and self reflexive consciousness are often utilized to extend the human interface creating waking experiences that resemble the human dream Surprisingly AI systems also easily meet all human based operational criteria for dreaming These dreams are far different from anthropomorphic dreaming including such processes as fuzzy logic liquid illogic and integration instability all processes that may be necessary in both biologic and artificial systems to extend creative capacity Today multi linear AI systems are being built to resemble the structural framework of the human central nervous system The creation of the biologic framework of dreaming emotions associative memories and visual imagery is well within our technical capacity AI dreams potentially portend the further development of consciousness in these systems This focus on AI dreaming raises even larger questions In many ways dreaming defines our

humanity What is humanly special about the states of dreaming And what are we losing when we limit our focus to its technical and biologic structure and extend the capacity for dreaming into our artificial creations Machine Dreaming and Consciousness provides thorough discussion of these issues for neuroscientists and other researchers investigating consciousness and cognition Addresses the function and role of dream like processing in AI systems Describes the functions of dreaming in the creative process of both humans and machines Presents an alternative approach to the philosophy of machine consciousness Provides thorough discussion of machine dreaming and consciousness for neuroscientists and other researchers investigating consciousness and cognition **Library of Congress Subject Headings** Library of Congress,Library of Congress.
