Cyber Commerce Reframing Uwe G. Seebacher,2012-12-06 The goal of this book is to create awareness for a change in mind set that we will all have to face and go through The necessity for this new mind set is being driven by the situation that a completely new business world a new reality is being created at the point where the phenomenon commonly referred to as the new economy converges with the well known old economy During the very late 1990s this new reality was being driven by an almost incredible increase in yields in the financial markets where conventional but value driven and stable stocks such as Philip Morris General Electric or Bayer did not attract as many investors as before if we can call some of them investors at all Companies in the high tech or the new market segments are all part of the new economy This new economy has created new business ideas business models and a new reality in which chief executive officers CEOs were in the mid twenties and had basically no clue as to what real business is and how much a dollar counts Now as this convergence is happening the painful reality and the business rules of the old economy get us back down to earth The CEOs become more senior business plans are validated more carefully and just having the famous com in your company name does not get you any further or lead you to any of required money

Science that contributes to enhancing the current literature and knowledge The SAGE Encyclopedia of Quality and the Service Economy Su Mi Dahlgaard-Park, 2015-05-29 Society globally has entered into what might be called the service economy Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries Services permeate all aspects of peoples lives and are becoming inseparable from most aspects of economic activity Quality management has been a dominating managerial practice since World War II With quality management initially associated with manufacturing industries one might assume the relevance of quality management might decrease with the emergence of the service economy To the contrary the emergence of the service economy strengthened the importance of quality issues which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors as well Today we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment Thus quality and services have emerged in parallel as closely interrelated fields The Encyclopedia of Quality and the Service Economy explores such relevant questions as What are the characteristics nature and definitions of quality and services How do we define quality of products quality of services or quality of life How are services distinguished from goods How do we measure various aspects of quality and services How can products and service quality be managed most effectively and efficiently What is the role of customers in creation of values These questions and more are explored within the pages of this two volume A to Z reference work
