## **Size Matters:**

Why Size Matters John Tyler Bonner, 2011-12-05 Why size plays such a big role in the living world John Tyler Bonner one of our most distinguished and creative biologists here offers a completely new perspective on the role of size in biology In his hallmark friendly style he explores the universal impact of being the right size By examining stories ranging from Alice in Wonderland to Gulliver's Travels he shows that humans have always been fascinated by things big and small Why then does size always reside on the fringes of science and never on the center stage Why do biologists and others ponder size only when studying something else running speed life span or metabolism Why Size Matters a pioneering book of big ideas in a compact size gives size its due by presenting a profound yet lucid overview of what we know about its role in the living world Bonner argues that size really does matter that it is the supreme and universal determinant of what any organism can be and do For example because tiny creatures are subject primarily to forces of cohesion and larger beasts to gravity a fly can easily walk up a wall something we humans cannot even begin to imagine doing Bonner introduces us to size through the giants and dwarfs of human animal and plant history and then explores questions including the physics of size as it affects biology the evolution of size over geological time and the role of size in the function and longevity of living things As this elegantly written book shows size affects life in its every aspect It is a universal frame from which nothing escapes

**Handbook of Education Policy Research** Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10. Co-published by Routledge for the American Educational Research Association. AERA Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness, for example, commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA-sponsored Handbook. Organized into seven sections, the Handbook focuses on: 1. disciplinary foundations of educational policy; 2. methodological perspectives; 3. the policy process; 4. resources management and organization; 5. teaching and learning policy; 6. actors and institutions; and 7. education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions, and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability, and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design, and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic, government, and think tank researchers.

**European Union Non-Discrimination Law and Intersectionality** Anna Lawson, 2016-07-22 This book contributes to a critical reflection of current legislative and jurisprudential developments in Non Discrimination Law focusing on the European Union The book is focused on intersectionality between gender race and disability and the question of whether and to what extent this intersection can be adequately addressed in EU law The discussion rests on two basic assumptions First the multiplication of discrimination grounds in EU law and other legal regimes should not result in a dilution of the demands of equality law Accordingly the book focuses on the three key grounds race gender and disability These constitute nodes around which other discrimination grounds can be grouped Second any multi ground non discrimination law framework needs to engage with the question of discrimination on several grounds This book provides a critical evaluation of some of the problems presented by such intersectionality and an opportunity to explore the issues in depth This collection offers some new proposals relating to the regrouping of identity categories and to the general approach to socio legal research in the field It also contains a comparative section which expands on practical experiences with intersectionality and law and a section dedicated to juridical responses to intersectionality The book will be a valuable resource for researchers academics and those working in the area of EU non discrimination law and policy

*The Changing Context of Local Democracy*  
Hubert Heinelt, 2016-02-05 Political leadership at the local level has attracted growing attention in recent years in parallel with reforms of local government and of the municipal administration as well as the debate on a shift from government to governance But this debate is mainly focused on single leaders i e mayors or executive officers Considering the power triangle of i the mayor ii the municipal administration executive officers and iii the council it is surprising that councillors have gained little interest so far The aim of this book is to reflect on the role and task perception as well as the behaviour of councillors in the changing context of local democracy The chapters start from a common conceptual framework We start from the hypothesis that the role perception as well as the behaviour of councillors can not be conceived of being determined directly by i both formal and informal institutional structures as well as by ii personal characteristics Instead we argue that the perceptions and behaviour of councillors are depending on their notion of democracy However the understanding of democracy can be affected by institutional structure but not solely by such organisational arrangements but depending on personal characteristics of the councillors This book was published as a special issue of Local Government Studies
