Practitioners may understand the importance of placing individuals in different settings e.g. inclusive classrooms supported employment sites but not understand how to improve their skills once they are in that setting. This book is intended to give teachers and other service providers the instructional skills for improving the skills of the individuals that they are serving. The most unique feature of the text is that it is written specifically for practitioners in the field: teachers and adult service providers as well as those in training rather than being written for other academics. An advantage of this book is that those preparing teachers and others can easily use it in methods courses as it covers instructional methodology that is seldom covered in detail in most texts. College instructors will find the book a good choice for their classes based upon the consistent format throughout the book, the readability of the book for students, the comprehensive coverage of systematic instruction and the direct applicability to applied settings. Others providing instruction, supervision and training to direct service providers will find this book useful, such as those working in schools as well as those in transition and adult service settings.

Clinical Case Management for People with Mental Illness Daniel Fu Keung Wong, 2014-04-04. A unique and effective approach to mental health practice. *Clinical Case Management for People with Mental Illness* combines theory, practice and plenty of clinical examples to introduce a unique approach to case management that is based on a biopsychosocial vulnerability stress model. This practice-oriented handbook stresses the dynamic interplay among biological, psychological, social and environmental factors that influence the development and severity of a person's mental illness. Filled with case examples to illustrate the assessment and intervention process, the book is an essential resource for working with people who suffer from depression, anxiety disorders, schizophrenia and personality disorders. Author Daniel Fu Keung Wong draws on his experiences as an educator, cognitive therapist, mental health worker and case manager working in Asia and Australia to explore the concepts and contexts of clinical case management for individuals suffering from mild and chronic mental illness. He guides you through the creative use of various therapeutic approaches that emphasize different aspects of a person's condition that can influence the cause and course of mental illness. *Clinical Case Management for People with Mental Illness* examines a range of important topics including the roles and functions of mental health workers, relapse prevention, assessment and clinical intervention, psychiatric crisis management and working with families. In addition, the book includes checklists, worksheets, activity charts and three helpful appendices. *Clinical Case Management for People with Mental Illness* examines models of assessment, microskills in assessment areas, understanding the roles and psychological reactions of family members, assessing and working with individuals with suicidal risk or aggressive behaviors and much more. *Clinical Case Management for People with Mental Illness* is an essential resource for mental health professionals including psychologists, occupational therapists, mental health social workers, nurses, counselors and family social workers.
