**Silver in Healthcare** Alan B. G. Lansdown, 2010 Silver in healthcare has many different facets and since the early concepts of microbiology of the 1880's has been developed from usage in surgical clips staples foil wound dressings and surgical implants to the widespread and clinically effective antiseptic wound dressings sutures catheters bone and dental implants and cardiovascular devices of today From the dawn of human civilisation silver has had a role of water purification and even now has a role in hospital water systems for control of MRSA and legionnaires disease Biotechnological advances in recent years have extended the antimicrobial properties of silver into production of hygiene textiles and use in domestic products Important advances have been made in understanding mechanisms of antimicrobial action of silver the central importance of ionisation patterns in the presence of body fluids and

secretion and the genetical and molecular profiles of silver resistance This publication is a comprehensive account of the history of silver in medicine its clinical benefits and wide advantages as a broad spectrum antimicrobial agent It is clear from the extensive array of publications in recognised and unofficial press that many misconceptions and misleading conceptions have been perpetuated leading to errors in evaluation of the safety of the metal in occupational domestic and therapeutic situations The book is unique in that it is the only comprehensive presentation of the toxicology of silver and it identifies the major misconceptions in the safety of silver and interpretation of argyria and argyrosis as central features of silver toxicity In this book Dr Lansdown reviews the literature from a clinical and experimental viewpoint with the benefit of his many years research on silver and experience gained in working with clinicians healthcare product manufacturers and microbiologists There is also discussion in the book on the relevance of antimicrobial resistance to silver and deficiencies in present day clinical practice in not evaluating incidences of resistance on a routine basis The subject matter is presented in a readable fashion and includes reference to use of the metal in such practices as acupuncture and treatment of tropical diseases as practised in some parts of the world each of which is accompanied by special clinical risk It is also a collation of current views on the use and efficacy of silver as a broad spectrum antibiotic The chapters which deal specifically with toxicological aspects of silver in clinical occupational and environmental issues are central to the book s value The book is aimed at clinicians research scientists and product manufacturers and will provide ideas for new research and academic endeavour It is also essential reading for research students with an interest in metal toxicity and its management in mammalian tissues

*Comfort Properties of Textile Materials* Dr. N. Gokarneshan, Dr. S. Kavitha, 2023-09-29 The book deals with THE COMFORT PROPERTIES OF TEXTILE MATERIALS Comfort is an important aspect of textile materials when it is being intended for use as dress materials The book has compiled the various significant areas in the field during the past few years It would provide a comprehensive reading to readers and also promote future research It is hoped that the contents of the book would prove useful and informative to readers

Thermal Protective Clothing for Firefighters Guowen Song, Sumit Mandal, René Rossi, 2016-08-27 Thermal Protective Clothing for Firefighters explores the materials design and usage of thermal protective clothing The characteristics of fire hazards are discussed in detail and the thermal environments faced by firefighters in these fire hazards are also examined The different types of potential burn injuries and the heat stress that occurs to firefighters bodies when exposed to such thermal environments are analyzed Furthermore the development of various high performance fibers and fabrics for thermal protective clothing is discussed The test methods and existing standards to evaluate the thermal protective and physiological comfort performances of the fabrics and clothing are critically reviewed Recent developments in the field of fire and heat resistant materials have led to significant improvements in thermal protective clothing In parallel with this the complexity and risk levels of fires especially in industrial storage facilities and developments in health and safety cultures have increased the demand for high performance heat and flame resistant

clothing and equipment designed to mitigate skin burn injuries and reduce risk of death from fire hazards Throughout the work the gaps and limitations in existing test methods and standards are identified and approaches are recommended for the development of enhanced test methods Scenario modeling and its implications for firefighters protective clothing is discussed and various factors affecting performance are established Finally various key issues related to thermal protective clothing are addressed to guide the future research in the field of thermal protective clothing for firefighters This book will help materials textile engineers to develop high performance thermal protective clothing that can enhance the protection safety and comfort of firefighters Offers a helpful guide to the successful specification and design of high performance protective clothing to meet the high standards of today s regulatory framework Introduces the new materials technical innovations that are transforming fire protective clothing Explores the role of clothing from the operational perspective including technical innovations Offers a critical review of the test methods and existing standards to evaluate the thermal protective and physiological comfort performances of the fabrics and clothing

*Clothing Biosensory Engineering* Yan Li,A S W

Wong,2006-04-24 Human sensory perception of clothing involves a series of complex interactive processes including physical responses to external stimuli neurophysiological processes for decoding stimuli through the biosensory and nervous systems inside the body neural responses to psychological sensations and psychological processes for formulating preferences and making adaptive feedback reactions Clothing biosensory engineering is a systematic and integrative way of translating consumers biological and sensory responses and psychological feelings and preferences about clothing into the perceptual elements of design It is a link between scientific experimentation and commercial application to develop economic solutions to practical technical problems Clothing biosensory engineering quantifies the decision making processes through which physics mathematics neurophysiological and engineering techniques are applied to optimally convert resources to meet various sensory requirements visual thermal mechanical It includes theoretical and experimental observations computer simulations test methods illustrations and examples of actual product development Describes the process of Clothing biosensory engineering in detail Quantifies the decision making processes applied to optimally convert resources to meet various sensory requirements Includes theoretical and experimental observations and examples of actual product development

**Percutaneous Absorption** Nina Dragičević,Howard Maibach,2021-07-29 Updating and expanding the scope of topics covered in the previous edition Percutaneous Absorption Drugs Cosmetics Mechanisms Methods Fifth Edition supplies new chapters on topics currently impacting the field including cutaneous metabolism skin contamination exposure to protein allergens in vitro absorption methodology and the percutaneous absorption of chemical mixtures Complete with studies on the role of the skin as a key portal of entry for chemicals into the body this book serves as a detailed reference source for recent advances in the field as well as an experimental guide for laboratory personnel Key Features Details in vivo and in vitro methods for measuring absorption dermal decontamination mechanisms of transdermal delivery and the

relationship of transepidermal water loss to percutaneous absorption Considers a range of mathematical models the safety evaluation of cosmetic ingredients the absorption of hair dyes nanoparticles for drug delivery and other novel methods of drug delivery Discusses topics including skin metabolism the skin reservoir and the effects of desquamation on absorption
